Usage of this kind may cause serious damage. Except in an emergency,military vehicles will NOT be driven over any part of the landing surface,without the consent of the RAF Station Commander.(HQ AIF R.O. No.56)

"Approval has been given for extension of the provision of deferred pay to members of the A.I.F. after six months service in Australia or upon transfer to Darwin or such other operational stations as may be determined.
"Operational Stations. Consideration is being given to determining the places which are to be declared Operational Stations,but meantime DARWIN,PORT MORESBY,and RABAUL may be treated as Operational Stations for this purpose.
" Calculation of six months service: The period of 6 months service is to be reckoned from the day on which his pay as a member of the AIF commences,and will not be affected by any absence,forfeiture,or leave without pay,which may have occurred during that period.
"Officers of or above rank of captain. In the case of officers of or above rank of captain,deferred pay is deducted from the rate of active pay except to the extent of 1/- per day.It is,therefore,impracticable to make retrospective adjustments to the full extent of the deferred pay. The adjustment of rates showing the full amount of deferred pay will commence on 7 Aug 41,but for any period prior to that date for which the officer is elgible for deferred pay the adjustment will be effected by showing deferred pay as 1/- per day and leaving the active pay at the rate previously credite . In the case of any such officer who embarked for service outside Australia prior to 7 Aug 41,the adjustment will be made by crediting deferred pay at 1/- per day up to the date of such embarkation.
"Lieutenants and other ranks. In the case of Lieuts,W.Os NCOs and men the full amount of deferred pay will be credited from the date on which the member first becomes eligible for deferred pay.
"Revision of P.M.F.Allowance. In the case of members who have been entitled to an allowance of the difference between AIF and PMF rate of pay(in accordance with MBI.136 of 15 Nov.40), a re-calculation of such allowance will be necessary in respect of any such members who become entitled to deferred pay.The adjustment of rates,showing the full amount of deferred pay will commence on 7 Aug 41,for which the member now becomes eligible for deferred pay,the adjustment will be effected by showing as deferred pay the excess(if any) of the deferred pay over the PMF allowance;if the PMF allowance equals or exceeds the deferred pay no adjustment will be necessary;for this purpose the deferred pay of officers of or above the rank of Captain will be reckoned as 1/- per day" (HQ AIF MALAYA R.O. No.56 Para 11)

ANTI-MALARIAL PRECAUTIONS.

In view of the monsoonal season and the increase in the incidence of malaria,strict enforcement of malarial precautions will be undertaken by all ranks.

The present good record of the unit speaks for itself in regard to the value of enforcement of these precautio ns and it is the duty of every one to maintain good health,particularly as it entails only a little inconvenience.

The order relaxing dress precautions in the morning is cancelled,and commencing Monday 10 Nov 41 the original order will be enforced:- i.e. in the morning long sleeves and trousers until 0800 hrs. For those men leaving camp before 0800 hrs,the change to shorts will be made immediately prior to departure.

Evening precautions have not been strictly adhered to. It is the duty of all ranks to see that they are correctly dressed,particularly in regard to sox and stockings.

Carelessness in precautionary measures may lead to grave casualties and it is up to all to maintain their health.

The nuts must on no account be slackened off at all until the tyre is completely deflated.
C.Os will ensure that such warning is communicated to each driver as well as promulgated in Unit Orders. They will arrange for a qualified fitter from the nearest W/Shop etc. to give a demonstration to drivers of the method of construction, stripping and assemply of split wheels and the explain the means of identification other than the red paint on nuts or warning plates.
They will arrange for W/Shops or Unit tradesmen to paint the outer row of wheel nuts of split wheels immediately with red paint. Warning plates are being made and will be fitted to each split wheel, including spare. Units will keep in touch with W/Shops until the latter have fitted these plates.
W/Shops will be issued with a tin of red paint immediately (F20 not required) but must make application if further quantity is required. Similarly a first issue of warning plates will be made without indents (HQ AIF R.O. 66 of 24 Nov 41)

12. PREVENTION OF INFESTATION OF BARRACKS, HUTS, CAMPS, BY BED BUGS.
The following instructions will be adhered to by all units in order to prevent the infestation of barracks, huts, and camps by bed bugs, which are a potent source of dirt diseases.
Sustained individual effort is necessary to make any measures effective. One badly kept bed is sufficient to reinfest a whole room or hut.
(1) A specific day and hour each week will be fixed and this hour will be spent in anti-bug measures by occupants of the hut or block. 2/19 Bn will spend the hour between 0800 and 0900 hrs each Saturday on these measures.
(2) An NCO and anti-bug squad will be detailed for each hut and barrack room and will supervise and assist in cleaning as below:-
(a) Remove kit-boxes, beds, bedding, mosquito nets and equipment from barrack rooms and huts and scrub out thoroughly the barracks room or hut, paying particular attention to crevices and cracks, doors, windows and shutters.
(b) Search every article taken out for adult bugs and eggs, which look like pearly white pin heads. Search particularly seams of mattresses, tops of mosquito nets and crevices in beds.
(3) Infected wooden beds should be boiled where a bed boiler is available. Otherwise they should be treated with paraffin or Zaldecide. Iron beds should be flamed with a blow lamp when a blow-lamp is available.
(4) Mosquito nets will be laundered by boiling at least once every three months or more often if recommended by M.O. i/c Unit.
(5) Officers of the unit will, on inspection, pay particular attention to signs of bug infestations.
(6) If bugs are found, de-bugging should take place every day until no more bugs are seen. (HQ AIF RO No. 66 of 24 Nov.)
Note: Para 2 refers to barracks and hutted camps. In tented camps the senior soldier in each tent will be responsible for supervision of cleaning.

ADMN ORDER NO.13

The following is copy of ADMS dated 15 Dec 41

REPORT ON FORWARD DEPLOYMENT AREAS-13/14 DEC.

Hygiene and Sanitation.

Too little attention is being paid to hygiene and sanitation by units in deployment areas. Cooking areas have become fouled with fat and food drbis. The construction of latrines is very poor, shallow trench latrines are still in use in some places.

Evacuated Chinese houses on estates & in towns are a potential source of danger, with the accumulation of rubbish, rotting foodstuffs, & collections of human faeces.

It is realised that heavy rain& conditions of the ground render sanitary measures difficult, but unless steps are taken immediately to improve the general standard of sanitation and hygiene, the health of the tps willsuffer Attention is also drawn to the fact that all a/malarial drainage & oiling has ceased with the evacuation of townspeople, estate employees etc. This increases the danger of malaria greatly, and a/malarial precautions must be stressed again. Units can keep areas clear of tins & other receptacles which may hold water. Personnel can also carry out oiling of any breeding places within the immediate vicinity.

Recommendations.

Structure of deep trench latrines in all units should be done immediately. Timber & iron are available from demolition work, & satisfactory covers can easily be made for trenches. Burial of all waste foodstuffs, general cleaning up around unit B echelons, spraying areas surrounding cookers with Lysol or Izal.

Addition of oil, Lysol, or Izal to faecal accumulation or burial to adequate depth.

Burning of rubbish around town areas. General tightening up of hygiene & sanitation matters in all units.

Capt Greville and personnel of 2/5 Aust Fd Hyg Sec are now in the area to carry out certain of the duties and advise units, but without full co-operation of all units, it will be impossible for this small number of men to produce satisfactory results.

N.B.:-The practice of killing pigs and leaving the bodies andentrails etc lying exposed to flies is a serious offence. Numbers of personnel from units outside JEMALUANG area have also been offending in this regard.
Every officer and N.C.O. is responsible that such practices cease and that offenders are dealt with.

ROUTINE ORDERS

By

LT.COL. C.G.W. ANDERSON Commanding 2/19 Bn AIF Malaya
Date:- 3 Dec 41 Part 1 No.145

1. ADMINISTRATION.
As from 1 Dec 41 the following system will apply.The following will be read in conjunction with AIF S.O. Ch.111

(i) Evacuation for Medical Reasons:
(a) Personnel evacuated beyond R A P will be upon the X list and struck off the strength of their units.This applies notwithstanding that such evacuation is in fact for a short distance only,but movement for less than 24 hrs beyond R A P for such purposes as Dental inspections,consultations,eye testing,and similar purposes will not be treated as evacuation for this purpose.
(b) Subject to the qualifications appearing below personnel placed upon the X list are immediately replaceable by reinforcements.

(ii) Officers On X List:
(a) A proportion of reinforcement Officers has been permitted to remain with units.One of the reasons for this is to make such personnel immediately available to assist the unit during any temporary deficiency in Officer personnel. When an Officer is placed upon the X list he will not be replaceable by an Officer from reinforcements at base, except upon application by his C.O. approved by superior command and acceded to by HQ AIF. Such application should not be made unless the absent officer is expected to be away for a prolonged period or some urgent need exists for his replacement.Such urgency should be exceptional as every unit should train personnel to take over duties of superior officers at short notice and the temporary absence of officers provides opportunities for testing such personnel. Upon the outbreak of actual hostilities the replacement of officers in accordance with AFW 3008 will be automatic.
(b) When an order is made by HQ AIF directing replacement of an officer on the X list by a reinforcement officer such direction will in due course be included in Postings Order. When such an Order is made the evacuated Officer on discharge from medical unit will proceed to G.B.D. and be posted to the reinforcements of his unit.
(c) In other cases,subject to such period of convalescent treatment or leave as may be directed,the evacuated officer will return direct to his unit under direction of the appropriate authority controlling the zone in which he is situated and upon rejoining his unit will be struck off the X list.

(iii) Other Ranks on X List.
Generally.(a) Unless otherwise directed OR's not evacuated beyond ML will return direct to units.
(b) Personnel evacuated beyond MDS will come under control of Adm HQ and will proceed on discharge from medical unit to GBD where they will be posted to reinforcements of units and in due course rejoin the unit with reinforcements.
(c) Original members of units will,as far as practicable be returned to their own units from GBD by first available draft.
(d) The rapidity with which casualties can be replaced and the certainty with which units can be maintained at War Establishment depends greatly on the efficiency of the system by which casualties are notified to 2 Ech and the accuracy of returns.Page 2 of AFW 3009 must be accurately completed in full detail. Para 'E' of AFW 3009 will be compiled as laid down in Para 129,ASO.

(iv) Non Commissioned Officers.
(a) When an NCO is placed upon the X list the commander of his unit may either(a) transfer a substantive NCO from reinforcements with unit and post him in place of the evacuated NCO or (b) make an acting appointment in his place. Such acting appointments may be confirmed after the expiration of two months.

(Over)

AUSTRALIAN WAR MEMORIAL RCDIG1021334

The power to make acting appointments should not be readily exercised as the promotion and reversion of NCOs is not in the best interests of the service. Attention is drawn to AIF S.O. para.36 as amended which must be read in conjunction with this instruction.
(b) An acting NCO appointed in place of personnel on the X list will be reverted by Comd of unit immediately on return of evacuated NCO.
(c) An NCO on the X list on being posted to reinforcements of unit at GBD will as soon as fit for action in the field proceed with the next draft of reinforcements to unit notwithstanding that a substantive appointment may have been made in his place. The unit will therefore at times be over strength in the non-commissioned rank of personnel in unit. This will be adjusted at the first opportunity-thus, if a Cpl is one Cpl over strength as to rank, upon the evacuation of a Cpl he will be replaced from reinforcements by a pte only. No substantive or acting appointment will be made without special authority from HQ AIF until supernumerary NCO ranks have been absorbed.
(v) Warrant Officers on X List.
The procedure in relation to NCOs on the X list will apply to W.Os with the following exceptions:-
The appointment must be confirmed by GOC AIF. Acting rank will not be confirmed until the expiration of 3 months from date of appointment to acting Rank.
(vi) Trade Specialists:-The principles laid down in respect of NCOs on X list apply also to Trade Group specialists.
(vii) Camp Hospitals etc: In the case of units in reserve stations in respect of which the functions of ADS or MDS are being carried out by a Cam Hospital, CRS or CDS, these will be treated as equivalent to ADS or MDS.
(viii) Arms, Equipment and Personal Effects and Personal Records on Evacuation:- (a) Arms, equipment and personal effects will in all cases be taken with personnel proceeding beyond RAP to ADS or MDS and will be taken into store and will remain with ADS or MDS until patient either returns to unit or is moved beyond MDS.
(b) If personnel return from ADS or MDS to unit from which evacuated their arms, equipment and personal effects will be similarly returned. If personnel are evacuated under circumstances preventing arms & equipment or personal effects moving with them to ADS or MDS such arms and equipment and effects will be sent to the ADS or MDS to which such personnel are evacuated as soon as possible.
(c) For the purpose of carrying these directions into effect each ADS or MDs will provide the necessary storage space and will indent for the appropriate stationery.
(d) In order to ensure the due care and maintenance of arms and equipment in existing climatic conditions there will be attached to each ADS or MDS a private of the AAOC who will be under general supervision of the QM of the ADS or MDS respectively.
(e) Movement and control of arms and equipment and personal effects to ADS or MDS will be by divisional units under divisional direction. Beyond MDS they will be under the control of Adm HQ. It will be the responsibility of Adm HQ to secure the safe custody and due movement of such effects when moved beyond MDS.
(f) Basic documents will also move with personnel on evacuation.
(g) Subject to any directions that may be issued by Adm HQ the following will be the normal procedure in respect of personnel evacuated beyond MDS:-
Steel helmets, respirator, all personal clothing and effects, and all personal records will go with personnel to Medical Unit to which they are evacuated.
All War Equipment other than steel helmet and respirator will be forwarded by MDS to GBD periodically.
(ix) Evacuation to Detention Barracks and Return brom Detention Bks
Evacuation will be direct; arms, equipment, personal effects & basic documents will accompany personnel. Such personnel will be on X list and replaced by reinforcements but on release will be returned to unit and if necessary held supernumerary to Establishment pending absorption (HQ AIF R.O. No. 68, of 1 Dec 41)

AD N~~xxxxxxxxx~~ ORDER No.11

1. CAMOUFLAGE.
Owing to the present state of emergency and the consequant need of speed and simplification in the carrying out of camouflage work, all schemes in priority areas will be composed of "Toning Down", i.e., obliteration of all light reflecting surfaces. This applies to roads, roofs, weapon pits and trenches.
Particular care will be taken to see that posns are not given away by incautious drying of clothing, mosquito nets, sheets etc.
Mosquito nets should be stained by using a weak solution of Condy's Crystals, or, if this is not available, a mixture of tea or coffee.

PRECAUTIONS-A/GAS
In order to preserve curtains A/Gas it is desirable that they should not be worn by personnel until actual outbreak of hostilities.
Officers i/c units will use their discretion in this matter.
Empty petrol tins labelled "Gas Alarm" will be hung in convenient places at frequent intervals in camps and bivouacs to supplement rattles.
As the efficiency of detector paint is not maintained beyond a period of from three to four weeks, the date of application will be scratched on all areas of detector paint, on vehicles, or on such other places as it may be used.

SLIT TRENCHES IN OPERATIONS.
The decision as to whether slit trenches will be dug when troops are halted during operations must be made by the local commander. This will depend on the length of time likely to be spent in the area, the possibility and scale of air attack and the ground situation. The dimensions of such trenches will be:-

(a) 3 ft wide at top and minimum depth of 3 ft (when time permits)

(b) Increase to 4 ft and revet as soon as time permits.

Unless these trenches are sited under adequate cover, the excavated soil should be removed; otherwise it is easily spotted from the air and the presence of the air is disclosed.

These instructions supersede those issued in Army in India Training Memoranda No 4 para 11(c) and No 10 para 3.

ADMN ORDER No.9

A/MALARIAL MEASURES.
In some parts of Malaya our local defence against Malaria in the shape of field work has had to be destroyed,or cannot be progressed with,or our troops have to operate in areas where there is no protection at all by natural means.
Under these circumstances let all,in the Medical Services,play their part in bringing the local war to an early and successful conclusion. Our role today in Malaya is of greater importance in the long run than the role of guns and ammunition. I have often repeated in lectures & memoranda that war in this country is likely to be won or lost by the degree of effort on the part of the Medical Services in the prevention of malaria.
All now depends on the value of personal prophylaxis. All ranks know what should be done. Let every man see that it is done not ,erely tonigl or tomorrow night,but every night. Constant preaching,never ending supervision are necessary. Regimental Medical Officers above all have in their hands a responsibility such as regimental medical officers have not had in any campaign in history. May they realise that responsibility in all its gravity. Behind the regimental medical officers are the fiel ambulance commanders,who must lead,instruct,and advise.
The issue of orders regarding prophylaxis against malaria is not enough. Medical officers must all the time watch and see that these orders are carried out in detail.
The sheet anchor in the prevention of malaria is the mosquito net,but a mosquito net can be,and often is,used in such a way that it is valueless. Tired men may relax their precautions and it is the medical officer's solemn duty to see that this does not happen except under circumstances of military exigencies.
The Medical Service is responsible for keeping men fit to fight the enemy. Let that not be forgotten.
In most fighting areas suppressive quinine or atebrin is being used. This method of prevention is second only to the proper use of the mosquito net. The medical officer is directly responsible for seeing that this suppressive treatment is carried out rigorously when ordered.To implement that responsibility he must utilize the officer commanding the unit.

The above are extracts from HQ 8 Aust Div ADMS Circular No.38.

REPORT BY W.L.O GELU ON REPORT OF PARATROOPS BY ONE OF MY SENTRIES AND PATROL SENT OUT 10 DEC.41

Yesterday 10 Dec 41 my Battery Cdr instructed me to clear the houses in tin mine areas 843267 and 842257,which wqs done to bhe best of my knowledge. At 1740 hrs a sentry reported light could be seen in one of the houses. I deceided to investigate,advising Bty Capt. I left at 1750 hrs with 6 O/Rs. On arriving at the house one native was leaving with two bags over his shoulder. I shone my torch and ordered him to halt. He immediately dropped his burden and ran. I fired and missed. At the same time I heard another person moving about inside. I went in leaving the former to the two men on that side of the house to which he ran and saw him disappearing between the side of the house and the roof. These two people escaped on searching the house one native was found hiding under a bed. We sent him to Btl HQ. The house is a store of some kind containing petrol,drums of oil, rice etc. I intend to investigate this house further to-day and will submit a further report.

Report by Sentry at 2030 hrs.10 Dec 41.

Visibility,dark. Bright illumination from large star.

I saw what appeared to be a star falling.Then it passed between myself and skyline of forward jungle slope opposite across gully 300 yds away. I then thought it may have been a bomb. As it did not explode I reported to N.C.O. of Guard that I thought I had seen what could have been a paratroop. This happened during the firing of shots in the same locality.
