R. W. ... Capt for Maj.,

Report of position at UGAS Right Flank from Recce 4May 41 1130- 1400 hrs.

1. The object was to ascertain what was holding up communication between B Coy UGAS and posts 8,9,10 and preventing investigation in this area of the enemy's posn.
2. UGAS B Coy holds all its positions R 11-16. A Coy 2/1 Pioneers hold R 9 and R 10 and R 8 is held by some of the 2/9 Bn.
3. Along the arc A B C on attached map tracing the enemy have established an MMG post. C was the limit of penetration and they now appear to be only in A-B-about 12/1400 yds from 12 on a bearing of from 305° - 335° They have fixed lines of fire between R 12 and R 10 and between R10 and R 8 which makes them difficult to approach in daylight. In addition they appear to have several A Tk rifles and possibly an A TK gun. Behind on approx the same bearings they appear to be covered by some of their Arty since they show flares when its fire is too close to them. Their arc starts from 3 disabled enemy tks - bearing 305°; R 12 is also subject to sniping.
4. There are apparently a number of A TK guns about the White House at 40044276, but it could not be ascertained whether these were disabled or not. The White House is subject to-surprise snipers fire which prevents investigation in the daytime.
5. It would appear that the only way to attack the MMG post is from the SW and NE- necessarily at night time. A night patrol to R8 and to the White House to investigate the A Tk guns could provide the necessary diverting fire from the SW while a further patrol attacked from the NE. Additional covering fire could be provided by R12 who have a fixed line on the posn.
6. R 12 reports that Enemy planes were dropping packages to the men in this posn - possibly food&ammunition. This would seem to indicate a certain break in their communication with the balance of their forces and provides stronger reasons for taking them before they can link up again.
7. Spasmodic shell fire was experienced by B Coy this morning chiefly around R 14. The rest of the front is quiet and little or no movement seen.

Palerano Area	16.4.41		Unit moved to Bondi Beach in rear area. Reported German bringing up artillery & surplus transport moved to beach areas. During stay in Bondi Palerano area extensive repair work was carried out, including vehicles, that had been machines jammed, bombed, one that was hit by a shell from Messerschmitt, a captured German Tirupp bomb job was commissioned & handed over to Engineers. an R.P.F Ford from an mine land & several jobs that had been driven into shell holes & slit trenches. Since unit has been in Palerano area 83 springs have been repaired in addition to general service work.	
Bondi Beach.	17.5.41		Unit busy on general service work, die bombers have shot up a number of vehicles & springs & radiators are main trouble. Spring steel is very scarce but vehicles are generally in good serviceable condition. Service mechanics & deconditioning are main occupations. Spring trouble is being gradually overcome & at the moment there are no vehicles out of commission due to spring & radiator failure. Unit is well clothed & recreation is held on such a scale that men are doing their own cooking & paper & eating from Brigade cook house. Water is plentiful & although working hard men are	

happy & content
