SECRET

EXERCISE "SEAGULL"

Subject: CONFIRMATION OF DECISIONS - NO 2.

HQ 1 Aust Corps
27 Jan 45.
G/6389/SD.

7 Aust Div
9 Aust Div
1 Aust Base Sub Area
4 Aust Armi Bde

CHEMICAL WARFARE POLICY

1. It is not Allied Policy to initiate the use of chemical warfare. Further, it is considered unlikely that the JAPANESE will use chemical warfare, except in retaliation to allied use.

2. Consequently anti gas clothing and equipment will not be carried by units of 1 Aust Corps and 1 Aust Base Sub Area, but will be landed with 17 ACD as follows -

- (a) Clothing and Equipment - with dets of 17 ACD
for units of 1 Aust Corps landing D plus 12 and
D plus 13.
- (b) Clothing and Equipment - with remainder of 17
ACD landing with the
Build Up Force.

RESPONSIBILITY OF 1 AUST BASE SUB AREA AT NUSA

3. Development of NUSA is to be a US responsibility. No Base Sub Area commitments envisaged at this stage.

RESPONSIBILITY OF 1 AUST BASE SUB AREA AT TOWAKINE

4. Base will not have commitments in the TOWAKINE area unless PORT TUEAH proves unsatisfactory for the establishment of an Aust Base, thus involving change in present policy. This is considered unlikely. If 7 Aust Div Group requires to use TOWAKINE, it will be used under arrangements that formation, a beach group and possibly docks operating personnel being allotted by Corps for this purpose.

CLOSE SEAING DEFENCE OF THE COVERING POSITION

5. Para 41 of 1 Aust Corps Outline Plan refers. Arrangements for additional personnel and weapons to enable 1 Aust Base Sub Area to assume this responsibility on D plus 7 will be made by HQ 1 Aust Corps from the resources of reserve units.

TOPOGRAPHICAL

6. LAKE MURDI is suitable for the landing of seaplanes.

7. Movement of tracked vehicles on the coastal plain in the area PORT TUEAN - GILLAMATONG appears to be limited only by existing swamps and vegetation. Mountains backing the coastal plain are steep and covered by rain forest; movement is probably limited to roads.

8. VIGA RIVER banks are 4' to 6' high from mouth to square 8638 - thereafter increasing to 15' to 30'. No information on tidal conditions is available.

9. TUBAN RIVER banks are from 4' to 6' high.

ARMAMENT OF AMPHIBIAN TANK BN

10. Amphibian tanks are LVT(A)(4) equipped with 75 mm hows.

1 AUST PARACHUTE BATTALION

11. Is now on the COB of 1 Aust Corps and formations may submit requests for its employment.

MAINTENANCE PROJECT

12. The following is promulgated in furtherance of Sec 5 (Engineers para 4 (water supply), and Sec 11 Water -

- (i) CANARC tanks, as listed in Sec 5 para 4(a) of 1 Aust Corps Maintenance Project, will be issued to 9 Aust Div at Staging Area 1 prior to embarkation.
- (ii) 9 Aust Div will require to arrange the early landing of the tanks and ancillary stores, their erection, and the establishment of water points.
- (iii) Water to fill these tanks will be available from LSTs. The LSTs will pump it ashore. 9 Aust Div will require to arrange details of pumping with USN and/or individual LSTs, ensuring inter alia that tanks are suitably sited initially.
- (iv) Permanent (or semi-permanent) water points, supplied from land sources, must be established as early as possible, preferably operating by not later than D plus 3 - to avoid necessity of continued supply of sea borne water.
- (v) It is expected that water from the first bores drilled by Boring Pl, if required, will be available on or about D plus 8. No sound estimate can be given of probable yields, but, based on experience in AUSTRALIA, 2000 to 3000 gallons per bore per day might be expected.
- (vi) All above notwithstanding, all 1 gallon cans provided under Section 11, para 1(iv) must be landed full, both for ready carriage in the advance, and as a safeguard against interruptions of seaborne supplies.

NAVAL LIGHTERAGE PONTOON CAUSEWAYS

13. 9 Aust Div will be responsible for launching, manning and maintenance of all NL Pontoon causeways required to bridge the water gap from LSTs to shore.

UNDERWATER OBSTACLES

14. 9 Aust Div will be responsible for breaching all obstacles above the point where LCVPs will breach at low water spring tides.

EXERCISE "SEAGULL"

Subject: DIVISIONAL OUTLINE PLANS

HQ 1 Aust Corps
27 Jan 45.
G/6394/SD.

7 Aust Div
9 Aust Div
1 Aust Base Sub Area
4 Aust Armd Bde

1. Divisional Outline Plans will be submitted to this headquarters by 31 Jan 45.
2. These will include the proposed distribution of 9 Aust Div Group to shipping allotted, showing, by days of arrival at the far shore, the following -
 - (a) brigade groups (composition to be indicated, separately if desired).
 - (b) details of units and sub units not allotted to brigade groups.
3. Tables on similar lines to Appendix 'D' and Appendix 'L' of 1 Aust Corps Outline Plan would be acceptable as a means of presenting this information.

1 AUST FAR BN

1. 1 Aust Para Bn is available to 7 Aust Div (planning as 9 Aust Div) for the T.E.N.P.I operation as indicated by GS 1 Aust Div.
2. For exercise purposes 1 Aust Para Bn is located at Staging area 1. GHQ are making shipping available, on dates to be decided, for the early move of 1 Aust Para Bn to C.M.Z., where it is intended that the unit be emplaned.
3. GHQ advise that thirty six C47 type aircraft can be made available at S.Y.L. on the date required, for the movement of 1 Aust Para Bn to C.M.Z. In addition, fighter escort for the C47s is to be provided.

EXERCISE "SEAGULL"

Subject: CONFIRMATION OF DECISIONS No 4.

HQ 1 Aust Corps
26 Jan 45.
G/6401/SD.

7 Aust Div
9 Aust Div
1 Aust Base Sub Area
4 Aust Armd Bde

PROVISION OF ADDITIONAL A&E FACILITIES

2. (a) The total vehicles shown in 1 Aust Corps Outline Plan to be landed up to D plus 14 is 3119 heavy vehicles and mechanical equipment and 6076 light vehicles guns and trailers. This includes the US forces but excludes AAIF.
- (b) It is intended to land 100 Aust Bde Wksp (less det) on D plus 4 approximately. This will ensure that sufficient workshop facilities are in the objective area to effect all repairs necessary without overloading the 2nd echelon repair facilities of the division. It is expected that all vehicles arriving in the objective area will be in A1 mechanical condition prior to embarkation, which should reduce the initial repair commitment.
- (c) It is also proposed to move the remainder of 120 Aust Bde Wksp and the brigade workshops of 1 Aust Base Sub Area to a higher priority in the Build Up Forces.
- (d) Stage 1 waterproofing should be carried out in AUSTRALIA by formation workshops. The remainder is a unit responsibility with A&E supervision. Infantry troops workshop will be available in each staging area to assist supervision.

TREATMENT OF SURFACE WATER BY STRENS CONTAMINATED BILHARZIA (SCHISTOSOMIASIS) AND CHOLERA.

2. (a) Cases of BILHARZIA and CHOLERA have been reported on HORROCKS ISLAND. Definite information as to the strains affected is not available, but in view of the heavy fouling of the area by native population all water must be treated when used for drinking, cooking, clothes washing or bathing.
- (b) Methods of purification against BILHARZIA are shown in Army Manual of Hygiene and Sanitation 1934' pages 183 and 184.
- (c) CHOLERA is killed by super chlorination of water supply - one scoop more than shown by HORROCKS test - dosing is then necessary.

- (d) 'Army Manual of Hygiene and Sanitation 1934' pages 180 and 181 gives detail of general preventative measures.

WATER SUPPLY FROM STREAMS

3. No detailed information of the limit of tidal effect on fresh water of streams is available, but with the possible exception of the VIGA RIVER, streams should be similar to those in NEW GUINEA and be fresh to the mouth. Discharge rates of the VIGA RIVER indicate that this may also remain fresh to the mouth. Its discharge rates are -

- (a) maximum 3650 cu ft per sec
(b) mean 550 cu ft per sec
(c) minimum 230 cu ft per sec

HANDLING OF ENGINEER STORES IN THE BEACH MAINTENANCE AREA AND THE TEMPORARY MAINTENANCE AREA

4. (a) The Beach Gp RAE will NOT be responsible for holding or issuing RAAF or base construction stores. However until the engineer dump is operative in the temporary maintenance area all engineer stores must pass into the beach maintenance area engineer dump. It is expected that the engineer dump in the temporary maintenance area will be operative by D plus 3.
- (b) 2 Aust Fd Coy of 1 Aust Corps Tps is being landed on D Day to establish and man the engineer stores dump in the temporary maintenance area. A detachment of this company will be available to segregate and hold RAAF and base construction stores in the beach maintenance area engineer dump until they can be moved to the temporary maintenance area.
- (c) There is yet no firm distinction between engineer stores for corps troops and divisions. The 4,600 measurement tons of general engineer stores and 3,400 measurement tons of bridging equipment shown in Appendix 'H' to 1 Aust Corps Maintenance Project comprising the initial maintenance of both 7 and 9 Aust Divs includes the initial corps dump stocking. Of these stores, those demanded by the assault division and earmarked as such at the staging area, together with beach maintenance area construction stores will be moved direct to the beach maintenance area stores dump where the beach group stores platoon will be responsible for their reception, holding and issue. It is suggested that divisional demands should be for not more than 10 day's requirements. The balance of the corps engineer stores, base construction stores and RAAF engineer stores will be moved direct to the temporary maintenance area as soon as possible, but a detachment of 2 Aust Fd Coy will remain in the beach maintenance area stores dump to handle any corps, base or RAAF engineer stores dumped there in transit which may be caused by the necessity for a rapid turn round of transport.

AVAILABILITY OF FRESH WATER FROM LST

5. Although 50,000 gals are available from each LST, the quantity which can be drawn is limited by the LST pumps which pump from 3000 to 5000 gals per hour.

◆ TOPOGRAPHICAL INFORMATION - COVERING POSITION

6. (a) Contoured maps are not available. The coastal plain rises to approximately 50 feet above sea level at the commencement of the foothills. The area between the foothills and the sea is comparatively flat.
- (b) No further information regarding swamps is available.
- (c) All available information regarding soil is included in appendix 'F' to 1 Aust Corps Intelligence Summary.
- (d) No details of subterranean water levels are available.
- (e) Average monthly rainfall for the period is given in 1 Aust Corps Intelligence Summary para 13(h). No further information is available.
- (f) No further information of vegetation is available

(g) No photographs of the VIGA RIVER are available.

TOPOGRAPHY - GENERAL

7. Generally information available has been given in 1 Aust Corps Intelligence Summary. Further information on particular points will be given if it can be obtained. The only sources from which additional information can be gained are limited to -

- (a) Terrain studies of which the important information has already been issued.
- (b) Requests to guerrillas for information. Answers to these requests normally take at least 18 days to obtain.
- (c) Additional air photos. Recent demands for these have not been met and due to requirements for other operations there is little chance of additional air photo cover.

(NOTE: Efforts will be made by the Corps Intelligence Centre to supply information which could reasonably be expected to be available in this exercise and which is essential for divisional tasks. Generally the planning must be based on the information and maps already supplied).

CANARC TANKS

8. (a) For details of responsibility for erection, maintenance and receiving of water see 1 Aust Corps Confirmation of Decisions No 2 of 27 Jan 45. (Para 12 sub paras (ii) and (iii)).
- (b) The length of hose for pumping water from LST and capacity of pumps is given in C.E. 1 Aust Corps letter CEO 6363 of 27 Jan 45 addressed to CSRE 7 and 9 Aust Div.
- (c) Hoses are of canvas manufacture and can be raised over roads.

WATER SUPPLY

9. The assault division will be responsible for the provision of water for the whole force ashore until D plus 4 when I Aust Corps assumes control.

EMPLOYMENT OF DOCKS OPERATING COYS AND PORT MAINTENANCE FLTS

10. The role of these units is to load and unload shipping and they will NOT be available for work on beaches.

BULK OIL

11. The site for Stage 1 of bulk oil installation as indicated on the First Key Plan was chosen to avoid pipes crossing working beaches or the beach maintenance area. The siting of surge tanks is the responsibility of I Aust Base Sub Area (see para 14 below).

SITING OF BEACH MAINTENANCE AREA AND THE TEMPORARY MAINTENANCE AREA INSTALLATIONS

12. The beach maintenance area will have preference over the temporary maintenance area in the siting of their installations. If the beach maintenance area installations can be sited to assist in the layout of the temporary maintenance area this should be done.

COMAND AND EMPLOYMENT OF DUKW FLTS

13. DUKW platoons and beach groups will be under command of 9 Aust Div (1 Aust Corps Outline Plan Appendix 'B' serials 2,3,21 and 33 refer). The DUKWS are provided solely for the purpose of unloading craft.

PROVISION OF ENGINEER STORES FOR DIVISIONS AND BEACH GROUPS

14. With two beach groups being committed on D Day, the initial demand for engineer stores made by the assault division must include requirements for the beach maintenance area stores for both beach groups.

The 300 tons per day being landed in the early stages includes corps, divisional and beach group engineer stores. The proportion of this 300 tons required for divisions and beach groups is entirely a divisional matter. Any increase or decrease in divisional requirements causes a corresponding decrease or increase in stores for Corps in order to maintain the 300 tons per day. (Para 4(c) refers).

BEACH GROUP RESPONSIBILITY FOR DETAILED ISSUES

15. (a) AASC Bulk issues will be made by beach group to the AASC of the division which will be responsible for detailed issues.
(b) ORD Detailed issues will be made by the ordnance beach detachments within the limits of the range of ordnance stores carried in that detachment.

COMMAND OF BEACH MAINTENANCE AREA

16. An appreciation by I Aust Combined Ops Sec does not favour the combining of the beach maintenance areas of the two beach groups into one beach maintenance area.

NAVAL PONTOON CATSIWAY

17. The manning, erection and maintenance of NL Pontoon Causeways is the responsibility of the assault division. (I Aust Corps - Confirmation of Decisions No 2 of 27 Jan para 43 refers.)

SIGNAL MAINTENANCE STORES

18. Details required by 7 Aust Div will be advised later.

EQ SHIP SIGNAL SECTIONS

19. 12 and 40 Aust WT Secs (lt) will be included in 7 Aust Div Groups and 3 and 7 Aust WT Secs (lt) will be included in 9 Aust Div Group as corps troops allotted. These units should be marked "not to disembark" and they should not be included in force totals for maintenance.

AIR

20. (a) Tac R by the air observer can be reported on the air support net.

(b) Tac R by Air OP can be reported through the aircraft to battery net or direct to division if their set is tuned to Air OP frequency.

(c) Tac R by Tac R Sqn can be reported by the aircraft to ground set provided at divisional headquarters.

21. GHQ SOI. 6-5 of 7 Nov 44 allocates frequencies for ground air cover. These are -

(a) common tactical frequency 4475 Kcs

(b) alternate common tactical frequency 4180 Kcs

(c) alternate com on tactical frequency 4305 Kcs

Choice of frequencies is made by RAAF and notified to army through ALCs.

22. CCBP-5 will be used for ground panel displays. Corps will advise divisions of blocks of identification panel display numbers allotted them. The suballocation of these numbers to units will be notified by divisions to this headquarters.

If required, local assignment meetings will be notified by this headquarters.

23. Details of recognition and identification systems to be used will be issued in the Corps OO.

EMBARKATION SIGNAL RESPONSIBILITY

24. 1 Aust Corps Signal Instruction No 4 issued with 1 Aust Corps Outline Plan, para 25 refers. Further details will be notified.

COMMUNICATION AIRBORNE OBSERVER TO ARTILLERY WHEN ENGAGED IN ARTILLERY RECONNAISSANCE

25. Airborne observers may carry out artillery reconnaissance (1 Aust Corps Outline Plan appendix 'I' para 7 refers). This should be necessary only before the Tac R Sqn is established and for tasks not capable of being done by air OPs. Details of the communication not for airborne observers carrying out artillery reconnaissance is being examined and will be advised.

ASSAULT AND LIGHT SCALES FOR ARMoured SQUADRON AND TROOPS

26. 1 Aust Corps G/6059/SD of 6 Jan 45 shows details of both assault and light scales for an armoured squadron group. It is not the intention of 1 Aust Corps to publish details for an armoured troop

but these can be produced by formations using as a basis the regimental and squadron groups. Ancillary units and sub units required for these groups may be included as formations require.

VOYAGE RATIONS

27. Voyage rations will be drawn from Staging Area Maintenance by formations who will be responsible for their stowage.

NAVAL BOMBARDMENT

26. Amend 1 Aust Corps Outline Plan Appendix 'H' - Proposed Naval Bombardment Plan as follows -

(a) delete sub para 2(c) and substitute -

"(a) Bombardment of the objective area by the above ships beginning first light on D Day. These ships will be available at call for supporting naval fire until 1800H D Day. Air strikes will NOT be made in the area of the assault beaches if such strikes limit the extent of the naval bombardment".

(b) delete para 2(c) and substitute -

"(c) From 1800H D Day until 1800H D plus 4 supporting fire from 2 CHs, 4 DDs, 6 LCI(R) and 4 LCI (G). After D plus 4 supporting fire from 2 DDs until D plus 30 with heavier ships at 6 hours call".

CORRIGENDUM

27. Amend 1 Aust Corps Confirmation of Decisions No 2, para 14, second line, delete "breach" insert "beach".

EXERCISE "SEAGULL"

Subject: CONFIRMATION OF DECISIONS No 5.

HQ 1 Aust Corps
29 Jan 45.
G/6406/SD.

7 Aust Div
9 Aust Div
1 Aust Base Sub Area
4 Aust Armd Bde

LOCATION OF ENEMY DUMP AREAS

1. From the limited information available it is believed that supply areas in order of magnitude are situated at -

- (a) SIRAWAI - Aer, POL, Sups
- (b) NUSA - Aer, POL, Sups
- (c) BIMBINIE - Aer, Sups
- (d) TUGAYA - Aer, Sups

2. Apart from these dumps POL, bombs and ammunition for aircraft are dispersed in the airfield areas at NUSA, DEIDONG, GILLAMATONG, TUGAYA and SIRAWAI.

ENEMY USE OF MT FCR SUPPLIES

3. Moderate traffic has been reported between NUSA and SIRAWAI carrying both troops and supplies. It is thought that the only use of MT for supply purposes is at NUSA, SIRAWAI and BIMBINIE. Supply for troops in coastal areas is by barge.

KEMPAI BRIDGE

4. Bridge at KEMPAI has not been repaired.

PONT TUBAN DEFENCE

5. The dual purpose 120 mm guns located on the point south of PONT TUBAN are sited for coast defence and can engage targets in C and D sectors.

JAPANESE TANKS

6. The latest information available concerning enemy tanks on MORONES is as follows -

- (a) small number of light and medium tanks have been observed in the SIRAWAI and NUSA areas and light tanks at TUGAYA and BIMBINIE.
- (b) It is thought that the total tank strength in MORONES is 24 tanks.

- 2 -

(c) no information has been received of the specific type of light or medium tanks.

JAPANESE ARMY ORGANISATION

7. It is not known which regiments of enemy divisions are type
A. Existing information is conflicting.

EXERCISE "SEAGULL"

Subject: TOPOGRAPHICAL INFORMATION - EAST COAST OF MORONES

HQ 1 Aust Corps
28 Jan 45.
G/6400/SD.

7 Aust Div
9 Aust Div
1 Aust Base Sub Area.
4 Aust Armd Bde.

ADDENDUM

1. Reference 1 Aust Corps Intelligence Summary Operation "SEAGULL", Part II, paragraph 13(c) -

last line on page - for "west coast" read "east coast".

GENERAL

2. Map references given refer to MORONES sheet 4 miles to 1 inch.

3. Beaches on the east coast are small, infrequent, and may be reef bound. Conditions are aggravated by the fact that the coast is exposed to the NE season.

4. Except where beaches are known to be well sheltered, heavy surf is experienced on the east coast. vide paragraph 13(c) of 1 Aust Corps Intelligence Summary. Usually the surf is lightest between 0100 hrs to 1000 hrs when conditions may vary from a 2 ft to a 6 ft surf. Squalls, during which all but the very well sheltered beaches are untenable, are frequent. All roadsteads off the coast are open and ships cannot unload into small craft while the NE wind is at any strength. These conditions may prevail throughout 24 hrs each day, but under favourable conditions some unloading into small craft should be possible between 0100 hrs and 0600 hrs.

SANLANGOE - KENAPAI

5. SANLANGOE BAY. 200 yards of sheltered beach with firm sand exists on the north shore of the bay, south of the airstrip. Underwater gradient is estimated to be 1 in 10. Beach is reef bound, but a gap is known to exist, although details of width, depth and location are unknown. Landing craft should be able to beach with only a small water gap.

6. Coast between SANLANGOE BAY and KENAPAI INLET is unsuitable for landing craft.

7. KENAPAI INLET. A sheltered beach of firm sand approximately 175 yards long exists on the west shore. North and south shores are steep sided, giving an average depth of water within the inlet of 3 to 4 fathoms. The beach on the west shore is steep to end landing craft should beach with a small water gap. The entrance to the inlet is 200 yards wide but then navigable width of water for ships of 20 ft draught is believed to be approximately 150 yards. It would be necessary for naval personnel to survey and mark the approaches before ships could enter. KENAPAI INLET is believed to be free from reefs.

8. The hinterland is similar to that found in the GILLAWATONG area, that is, scattered coconuts and sparsely timbered evergreen plantation areas. There is little if any swampy ground.

9. KENAPAI - MARAVAG. 2000 yards of firm sandy beach exists to the north of KENAPAI, the centre of the stretch being at 233073. The beach is believed to be reef free and approaches appear to be clear. The underwater gradient is estimated to be 1 in 30. The beach has a width of 10 to 40 yards at high water and 45 to 75 yards at low water. It is exposed to the NE season when conditions in paragraph 4 above apply. The hinterland is similar to that of KENAPAI INLET.

10. The coast between this beach and MARAVAG is unsuitable for landing craft.

11. 250 yards of firm sandy beach on the north shore of MARAVAG BAY in the vicinity of 224106 appears suitable for use by landing craft up to LCM size. Although the beach itself is well sheltered in the NE season, anchorage conditions in paragraph 4 above apply. Beach appears to be reef free but flat with a gradient estimated at 1 in 40.

12. MARAVAG - DOKIG. The only suitable beach in this sector is 100 yards of firm sand on the north shore of DOKIG INLET. It is sheltered in the NE season and is thought to be usable by landing craft. A reef extends across the entrance to the inlet approximately 800 yards offshore. A gap in this reef about 150 feet wide is known to exist in the vicinity of DOKIG POINT 222130.

13. DOKIG - NUSA. No suitable beaches for landing craft exist except at NUSA.

ALP WIRELESS EQUIPMENT

1. The type of set is decided mutually between the Naval and Army Headquarters concerned. Limiting factor is anticipated type of terrain, and so ALPs may be equipped with pack sets or heavier equipment carried in jeep, half-track or DUKW to enable them to travel with the forward troops.

CONTROL OF AIR REQUEST NET

2. Control is exercised by Support Aircraft Controller when necessary, but normal procedure is for any set on the net to come up at any time, after listening to ensure net is clear.

CODING OF REQUESTS

3. Requests for immediate air support are NOT coded. A "SHACKLE" code is provided by GHQ for messages requiring some degree of security such as pre-arranged requests for subsequent operations. "Combined Assault Code" is NOT used on the air request Net.

SUPPORT AIRCRAFT PARTIES (Reference Serial 40 Appendix 'B' to 1 Aust Corps Outline Plan).

4. (a) Support Aircraft Party No 1

(i) Situated at senior Land Force HQ ashore.

(ii) CC - Naval Air Officer

(iii) OC is Deputy Support Aircraft Controller and will assume control of all forms of air support when directed by the Support Aircraft Co-ordinator afloat.

(b) Support Aircraft Parties No 2 and 3

(i) Situated at divisional headquarters

(ii) CC - Naval Air Officer

(iii) OC may assume control of support aircraft on his front, when directed by Support Aircraft Controller afloat.

CARRIER AIRBORNE AIRCRAFT

5.

Type	Name	Normal radius of action in miles	Normal bomb load in lbs
VF	CORSAIR (F4U)	400	1000

1 Aust Base Sub Area

Reference and Question	Answer
<u>Reference Para 14:</u> Engineer stores shipped through Staging Areas.	Includes Base. Reference Maintenance Project Appendix 'H' serial 5.
<u>Question:</u> Are these divisional stores only or do they include Base as well?	
<u>Reference Para 15:</u> Allocation of engineer equipment and MT notified through engineer channels.	No. The allocation involved divisions only. Information will be made available by CE if required.
<u>Question:</u> Has 5 Aust CE (Wks) been included in distribution?	
<u>Reference Para 19(b):</u> RAAF Works Wing under command CE (Wks).	Yes
<u>Question:</u> Presume under command Base for local administration?	

Reference and Question	Answer
<u>Reference Para 21(b):</u> Plan for employment AA regiments <u>Question</u> What tasks are being allotted to 1 Aust Base Sub Area AA regiments	Policy is not yet firm. At this stage would appear to be - If four composite anti-aircraft regiments are necessary - (a) Base installations FORT TUBAK area - 2/2 Aust Comp AA Regt (b) MONACO 2 - 2/3 Aust Comp AA Regt
<u>Reference Para 34(b):</u> Detachment 1 Aust ARD (130 pers) is going to Staging Area 2 only. <u>Question</u> What arrangements are being made for holding reinforcements in Staging Area 1.	Reinforcements at Staging Area 1 can be handled by 1 Aust Corps Reception Camp. This will be for a short period only as reinforcements will probably be absorbed shortly after their arrival at Staging Area 1.
<u>Ref Para 35:</u> LOB Policy. <u>Question</u> Does this apply to Base Units going in with Assault and Follow Up troops?	No
<u>Reference Para 35(b):</u> Light scale. <u>Question</u> Do 1 Aust Base Sub Area units D to D plus 14 go in with Light Scale? If so, tents shelter halves required.	Para 36 is applicable to all units of 1 Aust Base Sub Area
<u>Reference Para 36(a):</u> Remaining units move on Normal Scale. <u>Question</u> Does this apply to all base units) or does the previous para apply?	

Reference and Question	Answer
<u>Reference Appendix 'D' Part 2</u> <u>Page 2, serial 27:</u> <u>Malaria Control Unit.</u>	Yes. Will be altered in Corps 00.
<u>Question</u> Should this read 13 MCU?	
<u>-----</u>	<u>-----</u>
<u>Reference Appendix 'F'</u> <u>Priority 1B:</u> <u>Malaria Control Unit</u>	Yes. Will be altered in Corps 00
<u>Question</u> Should this read 14 MCUT?	
<u>-----</u>	<u>-----</u>
<u>US Forces (incl US Navy) and RAAF</u> Mention made only of RAAF Works Wing under command CE (Wks).	(a) 1 Aust Base Sub Area will control for local administration and local defence; but this control, may in fact, be limited to the usual interservice liaison.
<u>Question.</u> (a) What is relationship of units to 1 Aust Base Sub Area? Does 1 Aust Base Sub Area control for local administration and local defence of area? If so desire deal with one HQ of each group only.	(b) A naval port directorate is to be made available approximately one month prior to an operation. This will be attached to HQ 1 Aust Base Sub Area. (c) A request has been made for the attachment of an air force component to HQ 1 Aust Base Sub Area. To date no reply has been received. 1 Aust Base Sub Area will be advised of the decision.
 (b) Previously accepted in principle that a component of RAAF, Navy and USASCS would be attached to Base HQ. Does this principle still apply, and if so, when are they likely to be available?	(d) There will be no element of USASCS with HQ 1 Aust Base Sub Area.

BEACHES AND LANDING FACILITIES FROM GILLAWATONG TO TOWAMINE

Ref Maps : PORT TUEAN) 1 inch to 1 mile
TOWAMINE)

GENERAL

1. The coastal characteristics are rocky reef bound points with sand beaches in the inlets. Offshore conditions of beaches are drying mud flats from 200 to 500 yards wide with narrow channels cutting through them from the sea end turning to run parallel with the shore between the flats and the beach. The combination of mud flats and channels makes the landing of any type of mechanical vehicle over the mud flats practically impossible. However, after careful survey these channels could be used by craft up to LCIs for landing of stores. The only feasible landing beaches are set out hereunder.

POSSIBLE LANDING BEACHES FOR SMALL CRAFT

BEACH 747612 - 738409

2. 1000 yards black sand with mud banks extending 300 to 400 yards offshore. These mud banks are covered by approximately 3ft of water at high tide. A channel approximately 80 ft wide is present towards the western end of the beach which leads to an inshore channel approximately 90 ft wide running parallel to the beach. With the exception of the hills on the eastern extremity of the beach the hinterland is flat and consists of overgrown plantation area and scattered timber.

BEACH 636515 - 632511

3. 500 yards of black sand with offshore mud bank 250 to 300 yards wide and exposed at low tide. Channel entrance at NE end of beach and inshore channel are similar to beach in para 2 above. LCIs should be able to use the beach after careful survey. Hinterland is flat and consists of overgrown plantation area and scattered timber.

- 2 -

BEACH 582541 - 579545

4. 500 yards of black sand, mud banks are not visible but offshore reef covered by a maximum of 4 ft of water at high tide narrows the approach to the beach to 50 yards in the centre. Native craft used this gap and the beach to load coconuts. LCVs and LCWs may be able to use this beach. Hinterland is coconut plantation.

BEACH 544559 - 535560

5. 600 yards of black sand. Offshore mudbanks estimated 300 to 400 yards wide are cut by three channels connecting with the inshore channel. Channels are similar to those described in para 2 above. Hinterland is coconut plantation.

HARBOURAGE FOR SMALL CRAFT

6. No suitable harbourage is known to exist between GILLAWATONG and TOMAKINE.

ENEMY HEADQUARTERS

7. HQ of 2 Bn, 95 Inf Regt is thought to be in one of the houses in TOMAKINE at approximately 348637. Owing to scale of available maps other headquarters as indicated in Appendix 'A' to 1 Aust Corps Intelligence Summary Operation "SEAGULL" cannot be pin-pointed.

MOVEMENT OF ARTILLERY

8. As a working figure it is estimated that the movement of enemy guns to bring fire to bear on the landing areas will take twice the time required for HT movement of troops.

EXERCISE "SEAGULL"

Subject: CONFIRMATION OF DECISION NO 10.

HQ 1 Aust Corps
3 Feb 45.
G/6500/SD.

7 Aust Div
9 Aust Div
1 Aust Base Sub Area
4 Aust Army Edc

USE OF NAVAL SMOKE

1. All naval ships in the Attack Force are prepared to make smoke to assist the landing force to land with the minimum of casualties. Policy in this respect will be decided by the army commander in conjunction with the naval commander.
2. If shipping is being shelled or subjected to air attack the naval commander, in order to protect shipping, may on his own initiative, order smoke to be made.

TREATMENT OF SURFACE WATER CONTAMINATED BILHAZIA

3. Reference this headquarters G/6401/SD of 28 Jan, Confirmation of Decisions No 4 para 2(b) - one of the methods of treatment of surface water contaminated with BILHAZIA given in the Army Manual of Hygiene and Sanitation 1934, page 184 is by straining and storage for a period of 48 hours. Owing to a different type of vector expected in the objective area, this period of storage should be increased to 96 hours.

SUPPLY DEPOT PLATOON WITH ADDITIONAL BEACH GROUP WITH ASSAULT DIVISION

4. It is considered that the supply depot platoons in the assault division are sufficient for the supply of all forces included in that division. The request for an additional supply depot platoon to accompany the second beach group with the assault division is not approved.

DEMANDS FOR AIR PHOTOGRAPHY (Para 10 Appendix I to 1 Aust Corps Cutline Plan refers)

5. Demands for air photography will be passed over the air request net from Air Liaison Parties to Command Group 1 Aust Corps. Here, all demands will be co-ordinated to avoid duplication, and passed direct to the Support Aircraft Controller over the inter-command support aircraft net.

6. Missions will be flown by VTBs, normally allotted for photography by carriers, film developed on board, and two copies dropped at the requesting agency. If required, further copies will be delivered by normal DRLS.

SECRET

EXERCISE "SEAGULL"

Subject: 7 AUST DIV OUTLINE PLAN OPERATION "SEAGULL"

HQ 1 Aust Corps
8 Feb 45.
S/6714/SD.

7 Aust Div

1. In principle the plan submitted is accepted.
2. Decisions required by 7 Aust Div and comments on the Outline Plan are given in the following paragraphs.
 - .. D Day and H Hour
 3. (a) Recommendations will be made to US Forces requesting alteration of D Day to 26 Mar 45 and H Hour to 0730H.
(b) It is thought that this recommendation will be accepted. 7 Aust Div may therefore plan accordingly.

Auster Aircraft

4. (a) Forward Echelon HQ S/472.0503/SD was cancelled by that headquarters on 22 Nov 44. Latest advice is that the establishment of 1st AOP Flight is to be increased to two detachments each of six AUSTER aircraft.
(b) The allotment of six aircraft to each division would not Corps without any resources. Should six aircraft be left with the assault division after D plus 4 the six aircraft with the follow up divisions would be required for use by Corps. It is not desired at the moment to alter the initial allotment to formations and, therefore the decision given in para 4 of Confirmation of Decisions No 1 will stand.

Anti-Aircraft Artillery Resources

5. Based on the location selected for the beach maintenance area and appreciation of the anti-aircraft requirements for the protection of the beach maintenance area, port construction and airfields show that one composite anti-aircraft regiment less one troop light anti-aircraft is required on D Day and the complete regiment on D plus 4.

Dental Units

6. The allocation of a dental officer with assistants to each field ambulance for the reason stated is approved, but the remainder of the unit with stores will not be moved with the assault force.

Oil Barges

- 7.
- (a) There will be no bulk storage established ashore until completion of Stage 2 of bulk oil installation on D plus 20. From D plus 5 to D plus 20, surge tanks only are operative ashore, each of 500 barrels capacity, fed by flexible pipe line from bulk oil barges offshore. These barges themselves constitute the bulk storage up to D plus 20.
 - (b) Serial 11 Appendix 'H' to 1 Aust Corps Maintenance Project applies only to Stage 1 bulk oil installation stores. This method of transporting Stage 1 stores to the objective area is standard current US practice.
 - (c) Surge tank installations require 48 hours for erection. The units to perform this task arrive at the objective area on D plus 2. Therefore the oil barges must arrive not later than D plus 2 if the tanks are to be operative on D plus 5.

Planning by Brigades

8. It is agreed that planning for 'C' Bde provides a better exercise than planning for 'M' Bde, and it is agreed that planning should be on this basis.

Additional units for 'M' Bde GP

9. The OOB of 'M' Inf Bde GP will be amended by adding from the follow up division:-

- (a) det LAD (Type C) attached to Tk A Btry
- (b) det Tk A Regt Sig Sec attached to Tk A Btry
- (c) one line sec provided from corps troops allotted to the follow up division.
- (d) three air liaison parties provided from US Forces allotted to the follow up division.
- (e) two support aircraft parties provided from US Forces allotted to the follow up division.

Naval Bombardment

- 10.
- (a) The naval bombardment programme requested by 7 Aust Div requires a greater bombardment force than that available for the operation.
 - (b) Naval vessels will be available for support of the landing in the area GILLA ARONG-PORT TUGAN and for the diversion at SIRATAI. A request will be made to GHQ for the retention of three cruisers and eight destroyers from those vessels shown in para 1 of Appendix 'H' to 1 Aust Corps Outline Plan until pm D plus 2 to provide support of the landing at SIRATAI.

Adjustment of shipping Allocation

- 11.
- (a) The request for additional shipping (4 LSI) to be used on D Day is approved. This increment is provided in order to allow increased landings of personnel only - the total figures of vehicles/stores

shown at Appendix 'G' to the Outline Plan being already the maximum which can be handled. Amended allocation of shipping is -

Ser ial	Type	No allott- ed	Particulars
1	LSM	1	HMS "LOTHIAN" Force HQ Ship
2	LSI	2	HMS "GLEBEARIN" Alternative HQ Ship
3			HMAS "MANOGRA"
4			HMAS "MANEELA"
5			HMAS "WESTRALIA"
6			OCE GLEBEARIN TYPE
7			OCE MANOGRA TYPE
8			OCE MANEELA TYPE
9			OCE WESTRALIA TYPE
10	AKA	1	USS "ALGORAS" (AKA 8)
11	AK	4	STANDARD LIBERTY CLASS
12	APD	5	STANDARD TYPES
13	LST	60	40X ELEVATOR, 60% HAUL DECK RAMP TYPES (ASSUMED FOR PURPOSES OF PLANNING)
14	LSM	5	STANDARD TYPES
15	LSD	3	USSs "CARTER HALL" "WASHLAND" and "LITTLEFIELD"
16	LCI	16	75% GANGWAY, 25% CENTRE LINE RAIGNED TYPES.

It is understood that descriptive data and stowage plans, relating to serials 1 to 10 inclusive, are held by 1 Aust Military Landing Gp.

- (b) In order that this headquarters can finalize the allocation of force to shipping and to permit naval arrangements for convoys it is desired that changes in Appendices 'G' and 'H' consequent on 11(a) above be notified as soon as possible.

Use of LSTs at NEWAIAI

12. It is agreed that conditions will preclude the use of LSI for 'C' Bde Gp landing at NEWAIAI. Adjustment may be made using suitable types of shipping allocated in para 11(a) above.

Air Support

13. (a) The carrier borne aircraft allotted for the operation are only sufficient to permit air support in the actual area of landing from D Day onwards. All targets prior to D Day, and targets outside the actual areas of landing subsequent to D Day, will normally be dealt with by land based aircraft operating under GHQ control.
- (b) Accordingly requests for air attack prior to D Day and for subsequent attacks outside the actual areas of landing will be made to this headquarters for submission to GHQ. These requests should include precise details and priorities of the targets.

Destruction of Enemy Defences by Air and Naval Bombardment

14. (a) Paras 11(d) (iii) and 12(b) states that AA guns at GILLAMATONG and the heavy guns SOUTH of PORT TUBAU are to be destroyed. Neither air attack or naval bombardment can be counted on to ensure complete destruction of these weapons, but the navy will guarantee neutralisation by bombardment from first light to H Hour. After H Hour further neutralisation by SFCPs should be possible. More positive steps to ensure the destruction of these guns appear to be called for.
- (b) Air attack on these guns on D minus 1 would militate against surprise, interfere with the general cover plan, and is therefore not approved.
- (c) A copy of the deception plan will be issued to divisional commanders only on 8 Feb 45. From this it will be appreciated that all air and naval arrangements prior to D Day will be co-ordinated by Corps.

Routing of 'C' Bde Convoy

15. It is intended that 'C' Inf Bde Gp arrive at the MONCO area early D plus 1, and remain afloat as a reserve until night D plus 1/D plus 2 when they will be routed evasively to arrive off HEWAPEI at first light D plus 2.

Move of 'A' Bde against TOMAKI

16. Para 2(b) of 7 Aust Div Outline Plan states that 'A' Bde will be prepared to move through 'K' Bde for its advance against TOMAKI not before D plus 2. As the bulk of the enemy reserves are in a position to move on TOMAKI it is desired that consideration be given to having this brigade prepared to move earlier.

Additional Battalion for Beach Group

17. Advice has been received that the extra battalion for the additional beach group under command of the assault division is not required by 7 Aust Div. It is pointed out that the capacity of a beach group to handle 1500 tons daily is based on the inclusion of an additional battalion with the beach group for labour. Unless 7 Aust Div make provision for additional labour comparable with a Pioneer Battalion the capacity of the beach group to land stores must be decreased accordingly. If 7 Aust Div do not propose to include the additional battalion it is desired that they advise this headquarters of their proposals for providing equivalent additional labour.

Beach Maintenance Areas

18. (a) It is considered that the beach maintenance area, as disclosed in the First Key Plan, is not of adequate size.
- (b) On examination, it appears that dump areas are contained within an area of 1000 yards by 1000 yards with a beach frontage of 1000 yards and that distances between dumps do not offer sufficient dispersion. Traffic routes measure four miles. Units in routes are required to carry approximately 2 vehicles per minute on D Day, plus turning round of beach group transport after H plus 1 hours. In view of this delays and congestion to transport seem inevitable.

- 5 -

Therefore it is considered that the beach group target will only succeed provided -

- (i) the maintenance area is enlarged
- (ii) the frontage of the area to the beach is increased.
- (c) With regard to the location of dumps it is considered that if the temporary bulk oil site is to remain as shown in the First Key Plan of the temporary maintenance area, Appendix 'C' to 1 Aust Corps Maintenance Project it will be jammed between the DUKW park and the beach battalion area without a safety zone in the event of bombing strikes on the bulk oil installation. It is suggested, therefore, that the DUKW park be moved to a position ~~is~~ towards the area indicated as the RAE dump in order to provide a safety margin.

Discharge Q.R.D plus 4

19. The amount shown of 4876 tons is greater than the beach groups can handle and should be reduced to the 3000 maximum permitted.

EXERCISE "SEAGULL"

Subject: CONFIRMATION OF DECISIONS NO. 11

HQ 1 Aust Corps
9 Feb 45.
G/9257/SD.

7 Aust Div
9 Aust Div
1 Aust Base Sub Area
4 Aust Armd Bde

WAR USAGE RATES

1. Reference 1 Aust Corps Outline Plan paras 31(a) and 33(a). The proposed amendment to the quantity of ammunition to be provided for initial maintenance cannot be accepted by higher authority as provision action has already been taken, and is based on 30 days AUST WUR INTENSE rate. Provision of initial maintenance of ammunition for exercise "SEAGULL" will therefore be amended to conform with the existing provision i.e. 30 days at the rate given in column C of Appendix 'A' to 1 Aust Corps G/6384/SD of 26 Jan 45.

EVACUATION OF CASUALTIES

2. In the early stages of the operation, all cases except those too serious to be moved will be evacuated to Staging Area 2. As hospitalization becomes available in the objective area the maximum number of cases will be retained, except that if casualties exceed hospital capacity, the cases which require longer periods for recovery will be evacuated to AUSTRALIA or to hospitals not in the objective area.

EXERCISE "SEAGULL"

Subject: C AUST DIV OUTLINE PLAN

HQ 1 Aust Corps
10 Feb 45.
G/6553/SD.

9 Aust Div

1. Decisions required by 9 Aust Div and comments on the outline plan are given below.

Additional LSTs

2. The three additional LSTs required by 9 Aust Div will be made available from the Corps Planning Reserve.

3. It is considered that the vehicles and stores stowed in twenty four LSTs can be discharged on D Day. However, in order to minimize congestion of stores and vehicles, it is recommended that 9 Aust Div plan to have most of the tactical vehicles forward of the dump areas by H plus 8 hours at which time the movement of stores from the beaches to the dumps should begin.

4. The recommendations given in para 11(a) of 9 Aust Div G.4/26/1 of 3 Feb are approved.

5. In order that this headquarters can finalize the allocation of force to shipping and to permit naval arrangements for convoys, it is desired that changes in the allocation of forces to shipping consequent on the above be notified as soon as possible.

Landing of 21 Aust Inf Bde Group

6. It is considered that the advantages gained by landing 21 Aust Inf Bde before 20 Aust Inf Bde are considerable, and that the slight risk of 21 Aust Inf Bde Group being committed within the covering position should be accepted. Consequently, the proposal given in para 11(b) of 9 Aust Div G.4/26/1 of 3 Feb is approved. In case of absolute necessity, Commander 9 Aust Div will have authority to employ 21 Aust Inf Bde Group within the covering position.

1 Aust Para Bn

7. Dependent on the strength of the battalion employed, from thirty seven to fifty C47s or equivalent types are required to transport 1 Aust Para Bn. Unless GHQ has these planes standing by, which is most uneconomical and therefore unlikely, a minimum of three days prior notice would be required before the planes would be available. In addition the battalion requires two days to prepare planes and load for an operation, giving a minimum of five days notice required before actual take off.

8. The following provision action would be required -

(a) Movement of 1 Aust Para Bn to LEYTE for emplanement. It may be accepted that GHQ would provide additional shipping for this purpose.

(b) An Air Force officer would be required for planning purposes, from D minus 30.

(c) Rehearsal to be carried out, preferably about D minus 10.

9. It is desired that 9 Aust Div submit more details in regard to the intended task to be allotted 1 Aust Para Bn as, on the information at present given, it is difficult to decide if its employment is warranted.

Air - Reference para 20(b) and (c) of Outline Plan

10. Latest methods favour naval support up to and including H Hour and it is not now normal practice to lift naval bombardment in favour of air attack. The exception is bombing above say 5000 feet which can proceed concurrently with naval bombardment: the actual bombing height being dependent on the range at which the naval guns are firing. Generally naval resources have proved adequate to neutralise the landing beaches, thus releasing air resources for other tasks.

11. Air bombing, like naval bombardment is not effective in detonating underwater mines, for mines such as the JAPANESE horned type, require either a direct hit or "near miss" within approximately 10 feet to cause detonation. Even in the case of a heavy concentration by air standards many mines would be missed. In addition any bombs above 50 lbs may make unduly large craters at or about LCV(P) or LCM beaching points.

12. The jungle edge and bunkers extend to within 250 yards of the underwater obstacles. For strafing parallel to the beach Air Force require a minimum safety distance of 250 yards. Engineer parties working on underwater obstacles will be at the minimum safe distance.

13. Air Force will not strafe beaches whilst naval bombardment is taking place, even in the case of fire from LCIs(G). Therefore supporting fire for engineers working on the underwater obstacles must come either from Navy or Air Force and not both. All things considered, it is thought that naval support by smoke or LCIs(G) would be more suitable. In this regard, your opinion as to whether additional LCIs(G) are required for the operation, is desired.

Beach Obstacles

14. Para 23 of 9 Aust Div plan states that RAE 9 Aust Div with assault infantry will make gaps in beach obstacles. It is considered desirable that engineers to breach the obstacle should be independent of the assault infantry, whose supporting engineers should be free of responsibility until they hit the beach. The engineers making the LVT gaps can then carry on and make the LST gaps and then participate in the handling of the NL Pontoon Causeways.

15. The estimated time of ten minutes for breaching the obstacle for LVTs appears unduly optimistic. It is considered that a minimum of forty minutes should be allowed for this task.

Use of LVTs

16. The role of LVTs is to support the initial assault for the covering position and assist in the discharge of shipping. These vehicles are not designed for use beyond the covering position and their general employment in such a role cannot be accepted. All LVTs are due to revert to Corps command on D plus 4. Applications for the use of a limited number of LVTs outside the covering position for a particular purpose will be considered on their merits.

D Day

17. It is proposed to recommend to GHQ that D Day be altered to 26 Mar 45, in order to obtain more suitable tidal conditions for the breaching of underwater obstacles. H Hour to remain as 0730H. It is desired that 9 Aust Div consider this, and advise if the proposal is acceptable to them.

Anti Aircraft Artillery Resources

18. Based on the location selected for the beach maintenance area and appreciation of the anti-aircraft requirements for the protection of the beach maintenance area, port construction and airfields shows that one composite anti-aircraft regiment less one troop light anti-aircraft is required on D Day and the complete regiment on D plus 4.

Destruction of Enemy Guns

19. Neither air attack nor naval bombardment on the heavy guns south of PORT TUBAN can be counted on to ensure complete destruction of these weapons, but the Navy will guarantee neutralisation by bombardment from first light to H Hour. After H Hour further neutralisation by SFCPs should be possible. More positive steps to ensure the destruction of these guns appear to be called for.

EXERCISE "SEAGULL"

Subject: CONFIRMATION OF PROVISIONS FOR 13

to 1 Aust Corps,
16 Feb 45.
G/6652/SD.

9 Aust Div

1. Information supplied at the request of 9 Aust Div.

POSSIBLE LANDING POINTS, SOUTH AND EAST OF PORT TUBAU

2. (a) General

The conditions in the PORT TUBAU area have been considered in 1 Aust Corps Intelligence Summary Operation SEAGULL - Confirmation of Additional Information.

The area considered is from 800225 to 800164

(b) 800225 - 800191

Coastline consists of coral cliffs 30 to 30 ft high with fringing coral reef extending for 30 yds offshore and exposed at low tide. A gap in the reef gives access to a 50 yd stretch of narrow coral sand beach at 800191. A short watercourse at this point cuts the cliff giving a timbered re-entrant through which infantry could easily reach the hinterland. This short stretch of beach appears suitable for use by small craft. Hinterland is lightly timbered with secondary growth and isolated patches of coconuts.

(c) 800191 - 800164

Coastline of coral reef and cliffs is similar to that described above. At 913155 coconuts were loaded over the reef from a jetty which has been destroyed. At 915160 there is a channel through the reef leading to 75 yds of coral sand suitable for use by small craft. It appears that supplies for the enemy troops manning the guns on the peninsula are landed at this point as there are signs of activity, and a path has been cut in the cliff. Hinterland is coconuts backed by timbered highground.

(d) 220164 - 000164

Discharge frs. river Ojil has caused banks of soft mud which extend for approximately 600 yds off shore over the entire sector and are covered by only 1 ft of water at high tide. Channels exist through the mud banks but they appear to be shallow. There is no beach, the mangroves extending to the waters edge except for the two stretches of flat timbered country at either extremity of the sector. Except for these extremities the hinterland is dense mangrove swamp.

DETAILS OF STREAM CROSSINGS

3. Information on two additional stream crossings are given in accordance with the pre-forma already issued.

- (a) (1) 43, (2) PORT TUBAN 1/53360. (3) 858419,
(4) coconuts, (5) wet, (6) fordable,
(7) swift, (8) 20'/50', (9) 25'/35',
(10/11) 4'/5', (12) mud, (13) flat,
(14) - , (15) no bridge.
- (b) (1) 44, (2) PORT TUBAN 1/63360, (3) 045457,
(4) rainforest, (5) wet, (6) fordable,
(7) swift, (8) 15'/20', (9) 25'/30', (10/11)
3'/5', (12) gravel, (13) steep, (14) - ,
(15) no bridge.

EXERCISE "SEAGULL"

Subject: CONFIRMATION OF DECISIONS NO 14.

HQ 1 Aust Corps
28 Feb 45.
G/C/SD/TD,

7 Aust Div
3 Aust Div
1 Aust Base Sub Area
4 Aust Armd Bde

DIDONG AIRSTRIP (Reference map MOROMES 4 miles to 1 inch 215063)

1. (a) Dimensions 6000 ft by 330 ft.
- (b) Disused, gravel surface overgrown with about 18 inches grass. Some unfilled bomb craters.

AIR MAINTENANCE

2. (a) A limited number of transport aircraft could be made available to drop or land supplies in forward areas.
- (b) The aircraft will be based at LEYTE initially and after D plus 4 will operate from MONACO.

AIR COMMUNICATIONS TO FORWARD AREAS

3. (a) Air-sea rescue CATALINAS staging at PORT TUBAN on normal air-sea rescue work could be used for this purpose subject to rescue requirements. A maximum of two to three trips per day may be anticipated. Regular DRIS is not practicable. Requests will be made to HQ 1 Aust Corps which will pass them to Support Aircraft Controller for decision and action.
- (b) To supplement the CATALINAS, Air OPs are available and, at a later stage, when advanced airfields are developed, nine BEAUFORTS from 83 Army Co-operation Wing will be available to the Corps for inter-communication purposes.

(c) Characteristics of Aircraft

BEAUFORT

Passengers - 5

Pay-load - 1500 lbs plus 2 x 250 lb supply containers under wings.

- 2 -

CATALINA

Pay-load - up to 250 miles range 7000 lbs
Packages limited to 3 feet by
2 feet by 2 feet.

EVACUATION OF CASUALTIES BY AIR

4. If roads to forward areas are unsuitable for evacuation of casualties, two C47s can be made available on request and advice that advanced airstrips are suitable for operation. Requests for aircraft will be passed to HQ 1 Aust Corps.

AVAILABILITY OF LAUNCHES

5. It is anticipated that a 38 foot launch of ten or fifteen knots will be allotted to each division for command purposes.

LIGHT SCALES FOR PIONEER BATTALIONS OF BEACH GROUPS

6. Approval is given for the landing of pioneer battalions of beach groups on normal scale of personnel, provided LOS personnel are embarked in separate craft. Divisional pioneer battalions landing with the assault divisions will be landed on light or assault scale as prescribed.

EXERCISE "SEAGULL"

Subject: EMPLOYMENT OF 1 AUST PARACHUTE BATTALION

HQ 1 Aust Corps
16 Feb 45
G/6653/CD.

7 Aust Div
9 Aust Div
1 Aust Base Sub Area
4 Aust Armd Bde
1 Aust Para Bn

1. 1 Aust Para Bn, 1 Aust Para Tp RAE and one mobile parachute maintenance unit RAAF, is available to 9 Aust Div for paratroop or airborne landing operations on MOROMES ISLAND. These units are placed under command 9 Aust Div for planning purposes from 17 Feb 45.

Sea Movement

2. (a) 1 Aust Corps is arranging early movement of the above units from AUSTRALIA to arrive at Staging Area 1 by 25 Feb 45.
- (b) The units, less rear base elements, will be moved from Staging Area 1 to LEYTE in additional shipping being provided by GHQ, to arrive not later than D minus 14. 9 Aust Div will be responsible for embarkation arrangements.
- (c) 1 Aust Corps is moving the rear base elements from Staging Area 1 to the objective area as early priority in the Build Up Force.
- (d) 1 Aust Corps is arranging movement of forward base elements from LEYTE to MONACO after D plus 4, but before D plus 10.

3. The airborne operation will be mounted from US air bases in LEYTE.

Availability of Aircraft

4. Forty one C47s or equivalent types are required to lift the airborne force. A minimum of five days notice prior to take off is required to assemble and load the aircraft.

Rehearsal

5. Sufficient aircraft to carry out a rehearsal at LEYTE will be available about D minus 8.

Air Cover

6. Allied Air Forces are providing adequate fighter cover for the transport aircraft during the rehearsals and the operation.

Re-Supply

7. Transport aircraft with fighter cover will be available for re-supply of the airborne force. Re-supply will be pre-arranged from LYTE until normal methods can be used.

Composition of Forces

8. The composition of -

- (a) Airborne Force
- (b) Rear Base Element
- (c) Forward Base Element

--- is shown as Appendix 'A' attached.

Outline Plan

9. 9 Aust Div will submit to HQ 1 Aust Corps by 26 Feb 45 its outline plan for the employment of 1 Aust Para Bn, 1 Aust Para Tp RAE and one mobile parachute maintenance unit RAAF.

PARTICULARS OF PORT TUBAN REEF

1. Width of Reef

Width varies from 10 yards to 20 yards. It is widest in the centre section between the two gaps (ref PORT TUBAN sheet 884268 and 886233).

2. Nature of Surface

Reef surface is reported to be rough/making crossings by LVTs difficult. ^{thus}

3. Slope of Sides

Reef sides are reported to be sheer.

4. Capacity of LVTs to cross Reef

(a) On 28 Mar 45 reef will be covered by 1.8 ft of water at high water and dries out to a height of 2.2 ft at low water.

(b) It is thought that LVTs could cross within 1 hour either side of high water but the casualties would be very high.

5. Depth of Water between Gaps

(a) It is known that the depth will permit passage of Liberty ships after careful daylight naval survey of gaps have been buoyed.

(b) LCM, LCV or LVT4 can pass through the gaps without previous naval survey providing visibility is 20 yds or over.

HW SPRINGS

6. Height of high water springs is 6 ft - see para 13(g)
Intelligence Summary Operation "SEAGULL".

- 2 -

AIR PHOTOGRAPHS

7. No air photographs giving coverage over the reef are available.

EXERCISE "SEAGULL"

Subject: NAVAL FIRE PLAN

H, 1 Aust Corps
20 Feb 45
G/5555/51.

9 Aust Div
1 Aust Base Sub area
4 Aust Armd Bde

1. The Naval Fire Plan attached as Appendix 'G' to 1 Aust Corps Operation Order 1 includes details of fire support at KENAPAI. This has been included to comply with 7 Aust Div Outline Plan for Operation "SEAGULL". 9 Aust Div Outline Plan does not require naval fire support at KENAPAI. Paras 7 and 8 of Appendix 'G' will, therefore, be deleted by 9 Aust Div.

2. Approval is given to 9 Aust Div request for an additional 4 LCI(R) and 4 LCI(G) to support the landing at NOXACO from 4 Hour D Day until 1800H D plus 4.

EXERCISE "SEAGULL"

Subject: CONFIRMATION OF DECISIONS NO 16.

HQ 1 Aust Corps
26 Feb 45.
G/6755/SD.

1 Aust Base Sub Area

Reference 1 Aust Base Sub Area G/757.1 of 21 Feb 45.

CHEMICAL WARFARE POLICY

1. In 1 Aust Corps Confirmation of Decisions No 2 it is pointed out that it is considered unlikely that the JAPANESE will use chemical warfare. It is further considered that, should the enemy do so, it will be used in the form of toxic smoke, gas shells and mortars and CW bombs against forward combat troops and tanks.

With the degree of air superiority possessed by Allied Forces it is not anticipated that wholesale chemical warfare will be employed by the enemy.

For these reasons no change is being made in the Chemical Warfare Policy of this formation and paras 1 and 2 of Confirmation of Decisions No 2 remain unaltered.

HQ BEACH SUB AREA

2. A HQ Beach Sub Area has been introduced in the above exercise for scheme purposes only, to consider the possible method of control of both beach groups. It is realised that there is no second in command in the base sub area, but his appointment has been assumed for this exercise.

EXERCISE "SEAGULL"

1 AUST CORPS OPERATION ORDER 1 Copy

18 Feb 45

Ref Maps - MORONES 4 miles to 1 inch
PORT TUBAN 1 inch to 1 mile
TOMAKINE 1 inch to 1 mile

INFORMATION

1. The following is contained in 1 Aust Corps Intelligence Summary Operation "SEAGULL" and Confirmation of Additional Information dated 17 Feb 45.

- (a) Strength and approximate location of enemy land forces and coastal defences.
- (b) Enemy air and naval intelligence.
- (c) Topographical information.
- (d) Dispositions and strengths of guerilla forces.

2. 6 Aust Div is concentrating at AITAPE preparatory to coming into Corps reserve.

3. 1 Aust Para Bn is placed under command 9 Aust Div for planning purposes.

INTENTION

4. 1 Aust Corps will capture the island of MORONES to permit its development as an advanced base and the establishment of air and naval facilities on this island.

METHOD

Summary of 1 Aust Corps Plan

5. (a) The initial landing will be carried out by 9 Aust Div Group landing the bulk of its units by D plus 6 and the remaining elements by D plus 12.
- (b) 7 Aust Div Group will form the Follow Up Force and will land from D plus 7 to D plus 11 through the beachhead area secured by 9 Aust Div.
- (c) 6 Aust Div will remain as corps reserve at AITAPE.

Force Order of Battle

6. Is attached as follows -

- (a) Summarised Order of Battle 1 Aust Corps - Appendix 'A'
- (b) 9 Aust Div Group with 21 Aust Inf Bde - Appendix 'B' Group under command.

- 2 -

- (c) 7 Aust Div Group less 21 Aust Inf Bde - Appendix 'C'
Group
- (d) Units 1 Aust Corps Troops and units
1 Aust Base Sub Area NCF allotted to - Appendix 'D'
divisional groups (landing D Day to
D plus 14.)
- (e) Priority List for Build Up Force - Appendix 'E'
- (f) RAAF units - Appendix 'F'

Task of 9 Aust Div

7. 9 Aust Div will land in the MONACO area and will -

- (a) Seize and hold a covering position in the area
GILLIMATONG-PORT TUBAN as shown in Trace 'Y'
attached, to protect the landing of the
remainder of the force, to cover the
establishment of an Aust Base Area in the area
of landing, and to permit the early establishment
of light naval and air facilities in this
locality.
- (b) Control the landing of 21 Aust Inf Bde Group
and its move against TOMAKINE until HQ 7 Aust
Div takes over command.
- (c) Capture NUSA to secure harbour facilities for
the Allied Forces.

8. As soon as the covering position is secure, operations for
the capture of NUSA and TOMAKINE will be pressed vigorously.

Task of 7 Aust Div

9. 7 Aust Div will -

- (a) Land in the area secured by 9 Aust Div.
- (b) Seize and hold TOMAKINE to permit its use as a
port and probable development as an advanced base.
Operations for the capture of TOMAKINE will be
pressed vigorously.

10. HQ 7 Aust Div will take over command of 21 Aust Inf Bde
Group as soon as possible after HQ 7 Aust Div has landed.

Paratroops

11. Details issued separately.

Security

12. Instructions for security measures are attached as
Appendix 'O'.

Deception Plan

13. Issued separately to divisional commanders only.

Naval Commitments

14. Allied Naval Forces are supporting the operation by -

- (a) Transporting and landing the Force and
providing naval protection for the operation.

- (b) Providing naval bombardment in accordance with Appendix 'G' attached.
- (c) Arranging for fighter cover for convoys.
- (d) Providing close air support for the landing until relieved of this responsibility by land based aircraft on D plus 8.
- (e) Denying enemy seaborne reinforcements and supplies to MORONES ISLAND.
- (f) Establishing motor torpedo boat bases on MORONES ISLAND to permit of their operation by D plus 2. After D plus 2 establishing naval facilities on MORONES.

Allied Air Force Commitments.

15. Allied Air Force, with land based aircraft operating from bases in SAMAR, LEYTE, MINDORO and LUZON, is responsible for the following tasks -

Prior to D Day

- (a) Masking our intention by large scale offensives on strategic targets.
- (b) Neutralisation of enemy activities including destruction of hostile shipping at APARRI and SAN FERNANDO in northern LUZON and port installations within striking distance of the area of intended operations.
- (c) Providing fighter cover for convoys in co-operation with Allied Naval Forces.
- (d) Providing long range anti-submarine and surface ship patrols for protection of convoys in co-operation with Allied Naval Forces.

D Day and thereafter

- (e) Continuing neutralisation of enemy activities within striking distance of the area of intended operations as necessary.
- (f) Assisting Allied Naval Forces in denying enemy seaborne reinforcements and supplies to MORONES ISLAND.
- (g) Taking over responsibility for the provision of close air support from Allied Naval Forces on D plus 8, at a time to be mutually arranged by the two commanders.
- (h) Provision of transport aircraft on a limited scale.

Air Support Plan

16. Is attached as Appendix 'H'.

Arty

17. (a) 9 Aust Div will arrange for -

The landing on D Day of 53 Aust Comp AA Regt less one light anti-aircraft troop.

The landing on D plus 4 of the remainder of 53 Aust Comp AA Regt.

(b) 1 Aust Corps is arranging for 2/2 Aust Comp AA Regt to land by D plus 11.

(c) The regiments mentioned in (a) and (b) above will be required for use within the covering position.

18. 9 Aust Div will be responsible for anti-aircraft defence until D plus 4 in accordance with Annex 'K' attached.

19. After D plus 4 CCRA 1 Aust Corps will co-ordinate -

(a) Requests for naval gunfire.

(b) Plans for employment of anti-aircraft regiments on corps tasks within the covering position.

20. Air warning will be provided as follows -

(a) Prior to establishment of Fighter Control Centre - on the High Frequency local airwarning network.

(b) When Fighter Control Centre is established - by line or radio telephony from Fighter Control Centre.

Engrs

Naval Lighterage Pontoon Causeways

21. (a) All naval lighterage pontoons for LST causeways are being provided under GHQ arrangements and are being brought to the far shore on LSTs.

(b) 9 Aust Div will be responsible for the manning, erection and maintenance of naval lighterage pontoon causeways until relieved of this responsibility by 1 Aust Corps.

Underwater Obstacles

22 (a) 9 Aust Div will be responsible for breaching the obstacles described in G/6385/SD of 26 Jan 45, and all obstacles inshore of that obstacle.

(b) The removal of obstacles seaward of the above obstacle is the responsibility of the US Navy.

Airfield Construction

23. The following airfield facilities will be established in the MONACO area by RAAF Works Wing.

Airfield PORT TUBAN Sheet	Location	Accommodation for	Required by	Remarks
MONACO 1	8339	Two fighter squadrons	D plus 5	
MONACO 1	8339	Four fighter squadrons One Tac R squadron	D plus 6	
MONACO 1	8339	Six fighter squadrons One Tac R squadron	D plus 7	Strip extended for staging of medium bombers
MONACO 1	8339	Six fighter squadrons One Tac R squadron Three medium bomber squadrons One Communication flight	D plus 10	
MONACO 2	9039	Six fighter squadrons Three medium bomber squadrons	D plus 30	

24. 9 Aust Div will be responsible for -

- (a) Facilitating the work of RAAF Works Wing in construction of airfields listed in the above table until D plus 4 when 1 Aust Corps will assume responsibility.
- (b) The construction of a strip for Air OPs to be operative not later than D plus 1.

D Day

25. 28 Mar 45.

E Hour

26. 0730H

Command

27. (a) GOC 1 Aust Corps will command 1 Aust Corps and 1 Aust Base Sub Area throughout the operation.
- (b) In addition to the tasks given in paragraph 14 above the Commander Allied Naval Forces is responsible for landing units of 1 Aust Corps and 1 Aust Base Sub Area in the order and at the time and place required by GOC 1 Aust Corps.

Command at the Objective Area

28. 9 Aust Div will command all units in the objective area from D Day to D plus 3 both days inclusive, and during this period, is responsible for their disembarkation. Except in the case of operational necessity 9 Aust Div will not employ units not allotted to 9 Aust Div Group on tasks other than those allotted them by HQ 1 Aust Corps.

29. On D plus 4 it is intended that HQ 1 Aust Corps assume command of -

- (a) All units 1 Aust Corps and 1 Aust Base Sub Area not allotted to 9 Aust Div Group.
- (b) HQ Beach Sub Area, 1 Aust Beach Group and 2 Aust Beach Group.
- (c) US Amphibian Tank Bn, US Amphibian Tractor Bn and Boat Bn Engineer Special Brigade.

30. It is intended that the following units come under command HQ 1 Aust Base Sub Area -

On D plus 7

- (a) All units of 1 Aust Base Sub Area.
- (b) HQ Beach Sub Area, 1 Aust Beach Group and 2 Aust Beach Group.

On D plus 11

- (c) Anti-aircraft units allotted to beach maintenance, port and airfield defences.

Defence of the Covering Position

31. It is intended that 1 Aust Base Sub Area assume responsibility for close seaward defence of the area on D plus 7. Additional personnel and weapons to enable 1 Aust Base Sub Area to assume this responsibility will be provided by HQ 1 Aust Corps from the resources of reserve units.

32. On D plus 14 it is intended also that 1 Aust Base Sub Area assume responsibility for the anti-aircraft and local defence of airfields and beach and port installations within the covering position.

Responsibility for Development of Beach and Temporary Maintenance Areas

33. Beach Maintenance Areas. 9 Aust Div will be responsible for the development of the beach maintenance areas. For scheme purposes, a separate headquarters to command both beach groups, to be known as HQ Beach Sub Area, will be placed under command 9 Aust Div until D plus 4. This headquarters will be commanded by the 2 i/c 1 Aust Base Sub Area and staffed by 1 Aust Combined Ops Sec.

34. Temporary Maintenance Area. The following will be responsible for the development of the temporary maintenance area -

- (a) 1 Aust Corps - from D plus 4 to D plus 6 (both inclusive)
- (b) 1 Aust Base Sub Area - D plus 7 onwards.

Shipping

35. The following documents will be issued separately after receipt of further information required from divisions -

- (a) Outline Allotment of Force to shipping - Appendix 'L'
- (b) Allotment of shipping to embarkation - Appendix 'M'
groups

36. After D plus 14 allocation of shipping and control of convoys are being effected under LHQ arrangements.

Embarkation

37. Formations will be responsible for the allocation of shipping space and for embarkation arrangements at the respective staging areas as follows -

9 Aust Div

- (a) Units of 9 Aust Div Group, as indicated in Appendix 'B'. attached.
- (b) Units of 1 Aust Corps Troops and 1 Aust Base Sub Area landing D Day and D plus 1.
- (c) RAAF units landing on D Day.
- (d) USN units landing D plus 1, D plus 2 and D plus 3.
- (e) One third of the thirty days initial maintenance held at Staging Area 1. These stores will be loaded to permit discharge by D plus 7.

7 Aust Div

- (f) Units of 7 Aust Div Group as indicated in Appendix 'C' attached.
- (g) One third of the thirty days initial maintenance held at Staging Area 2. These stores will be loaded to permit discharge by D plus 11.

EQ 1 Aust Corps

- (h) 1 Aust Corps Troops not allotted to divisions located at Staging Areas 1 and 2 landing D plus 2 to D plus 14 inclusive.
- (i) Units of 1 Aust Base Sub Area not attached to divisions located at Staging Areas 1 and 2 landing D plus 2 to D plus 14 inclusive.

RAAF

- (j) RAAF units from Staging Areas 3 and 4 landing after D Day.

38. LHQ or Adv LHQ is responsible for allocation of shipping and embarkation arrangements for -

- (a) 1 Aust Corps Troops and units of 1 Aust Base Sub Area embarking from AUSTRALIA to arrive in the objective area between D plus 2 and D plus 14.

- (b) 1 Aust Corps Troops, units of 1 Aust Base Sub Area and elements of divisional troops located in the staging areas and scheduled to arrive in the objective area after D plus 14.

Convoy Groupings

39. Details of the composition and conduct of convoys are given in extracts from the Naval Plan issued separately.

Rehearsals

40. (a) Rehearsals for units of 9 Aust Div Group and 21 Aust Inf Bde Group will be carried out under arrangements HQ 1 Aust Corps on 6 Mar 45.
- (b) The object of the rehearsals will be to land all personnel, vehicles and stores of 9 Aust Div Group and 21 Aust Inf Bde Group landing on D Day and to carry out necessary development of the beachhead and tactical moves inland.
- (c) Stores and vehicles will be reloaded at the conclusion of the rehearsals.

LOB Policy, Assault and Light Scales

41. 9 Aust Div Group and 21 Aust Inf Bde Group
- (a) Assault brigades and attached units will embark on assault scale. 9 Aust Div will arrange for increase to light scale on D plus 1 and to normal scale by D plus 14.
- (b) Reserve brigades and attached units will embark on light scale. 9 Aust Div will arrange for increase to normal scale by D plus 14.
- (c) Unit vehicles and equipment to build up formations in sub paras (a) and (b) above to normal scale will be brought to the far shore by unit LOB parties.
42. Remaining units of 1 Aust Corps and 1 Aust Base Sub Area
- (a) These units will move on normal scale.
- (b) LOB personnel for these units will move in the same convoys as their respective units but in separate craft.

Maintenance Policy

43. (a) Arrangements will be made by 9 Aust Div and 7 Aust Div for initial maintenance vide paras 37(e) and 37(g) respectively.
- (b) A further 20 days initial maintenance (except MT petrol and automotive diesel fuel) will be landed by D plus 14 under Corps arrangements.
- (c) A further 15 days MT petrol and automotive diesel fuel will be landed by D plus 14 under Corps arrangements.
- (d) Normal maintenance is to begin on D plus 15 under LEQ arrangements.

Reserves

44. 60 days Force reserve is being moved to the far shore under HQ arrangements as follows -

- (a) 30 days by approximately D plus 60.
- (b) 60 days by approximately D plus 75.

War Damage Rates

45. The following AUST WUR for initial maintenance and Force reserve of ammunition will apply -

- (a) Initial maintenance - 30 days INTENSE
- (b) Force reserve - 30 days INTENSE
30 days MODERATE

ADM

Maintenance Project and First Key Plan

46. Issued separately.

INTERCOMMUNICATION

Location of Headquarters Afloat

- 47. (a) Command Group HQ 1 Aust Corps - Force HQ Ship HMS "LOTHIAN"
- (b) Stand by Command Group HQ - Force HQ Ship HMS "LOTHIAN"
9 Aust Div
- (c) Stand By Command Group HQ - Stand By HQ Ship
1 Aust Corps HMS "GLENEAGLES"
- (d) Command Group HQ 9 Aust Div - Stand By HQ Ship
HMS "GLENEAGLES"

Location of Headquarters Ashore

- 48. (a) Command Group 1 Aust Corps will disembark on D plus 1 and will move to the SERASSO CREEK area(reference PCRT TUBAN sheet 9035).
- (b) Adv HQ 1 Aust Corps closes at Staging Area 1 on D minus 4 and re-opens D plus 4 in the SERASSO CREEK area.
- (c) Rear HQ 1 Aust Corps closes at Staging Area 1 on D plus 4 and re-opens D plus 13 in the SERASSO CREEK area.

Signal Plan

49. Issued separately.

Wireless Silence

50. Wireless silence will be maintained by all army wireless stations afloat until H minus 1 hour. Emergency communications afloat will be passed over Navy channels prior to H minus 1 hour. Listening watch will be kept from 1800H on F minus 1.

Time Zone

51. Time zone suffix will be 'H'.

Codes

52. Codes will be adopted as follows -

- (a) Combined Assault Code - for all encoding other than cipher messages, in the initial phases up to 0600H on D plus 3.
- (b) "Troncode" - for all encoding by field units, subsequent to 0600H on D plus 3.
- (c) "Slidex" - for RT code.

Visual Signalling and Fire Control Codes

53. Procedure given in GHQ SOI 26 will be followed -

- (a) The following blocks of three figure groups for use with CCBP8 are allotted to formations for sub-allotment to units under their command for Unit Identification Panels.

1 Aust Corps	400 to 449
7 Aust Div	450 to 549
9 Aust Div	550 to 649
1 Aust Base Sub Area	650 to 699

- (b) Formations will advise HQ 1 Aust Corps details of the sub-allotment of the above groups to units.

Recognition and Identification Policy

54. Procedure given in GHQ SOI 28 to 32 inclusive will be followed. The basic publications and index columns for use in conjunction with SOI 29 30 and 31 will be issued separately.

55. Code words for locations have been issued separately.

56. Code word for the operation will be "SEAGULL".

Appendix 'G' to 1
Aust Corps Operation
Order 1.

NAVAL FIRE PLAN

PART I - GENERAL PLAN

MONACO AREA

1. The ships forming the naval fire support groups for bombardment and close support in the MONACO area on D Day are -

- (a) 2 CA - 8 x 8"; 8 x 4"
- (b) 3 CL - 15 x 6"; 8 x 5"
- (c) 4 DD - 5 x 5"
- (d) 8 DD - 4 x 5"
- (e) 4 LCI(G) - 1 x 3"; 1 x 40 mm
- (f) 6 LCI(R) - 288 x 4.5 rockets; 2 x 40 mm

2. The missions of the fire support groups on D Day will be -

Between H minus 117 and H minus 7 minutes

- (a) 3 CL and 12 DD - bombard selected targets between PORT TUBAN and GILLIYATONG.
- (b) 2 CA - neutralise and, if possible, destroy 4 x 105 mm guns at the SOUTH end of the PORT TUBAN peninsula.
- (c) 4 LCI(G) - give close inshore support during the period engineer demolition parties are working on the beach obstacles.

Between H minus 7 minutes and H Hour

- (d) 3 CL and 12 DD - bombard selected targets between PORT TUBAN and GILLIYATONG, but not within 500 yards of the landing beaches.
- (e) 2 CA - continue the mission given in 2(b) above.
- (f) 4 LCI(G) - give supporting fire on the landing beaches.
- (g) 6 LCI(R) - discharge one outfit of rockets. These may be fired in one salvo at H minus 7 minutes with a MPI on the beach, or as a series in multiples of 24 rockets when the MPI will move inland as the craft move in with the assault waves. Decision as to the method of employment will be advised by 9 Aust Div. After discharge of rockets LCI(R) will engage targets of opportunity with gunfire.

Between H Hour and 1800 Hours

- (h) 3 CL and 12 DD - give supporting fire at call from SFCPs or on pre-arranged targets.

- (j) 2 CA - stand off the guns on the PORT TUBAN peninsula until it is known that the guns are captured or destroyed. The 2 CA are then available for tasks as in sub para 2(h).
- (k) 4 LCI(G) - will give close support at call or engage opportunity targets. Calls for close support will be made through Naval Landing Wave (Beach Control R/T channel).
- (l) 5 LCI(R) - will re-load with rockets and are then available to engage pre-arranged targets or opportunity targets. Calls for close support will be made through Naval Landing Wave (Beaching Control R/T channel). Two hours are required to re-load LCI(R).

3. From 1800H D Day to 1800H D plus 1 the following ships are available to give fire support in the MONACO AREA -

- (a) 2 CL - 15 x 6"; 8 x 5"
- (b) 6 DD - 4 x 5"

These ships are part of the force given in para 1.

4. From 1800H D Day to 1800H D plus 4 the following ships are available to give fire support in the MONACO AREA -

- (a) 2 CA - 8 x 8"; 8 x 4"
- (b) 4 DD - 5 x 5"
- (c) 4 LCI(G) } characteristics as in para 1.
- (d) 6 LCI (R) }

These ships are part of the force given in para 1.

5. The ships given in paras 3 and 4 will be at call from SFCPs or on pre-arranged targets. Part of the Force may be used for coastwise operations during which each cruiser used must be escorted by 2 DDs. Close support from LCI(G) and LCI (R) will be called for as given in sub paras 2(k) and 2 (l).

6. The fire support group from 1800H D plus 4 until 1800H D plus 30 will be 2DD with heavier ships at 6 hours call. DD will be prepared to fire at call from SFCPs or at pre-arranged targets. DD will be relieved daily at 1800H. The names of ships coming on station are to be communicated to HQ 1 Aust Corps by the Naval Liaison officer, who will be advised by the army of the areas in which ships are required. The two relieving DD are to be in the anchorage during daylight hours of the day they are to take over duty. Arrangements will be made to place SLOs on board during this time.

RENAPAI AREA

7. The ships forming the fire support group for bombardment at RENAPAI on D plus 1 are -

- (a) 1 CL - 15 x 6"; 8 x 5"
- (b) 2 DD - 4 x 5"

These ships are to be taken from the force given in para 1.

8. The missions of the KENPAI fire support group will be to give supporting fire at call from SFCPs or on pre-arranged targets as required between first light and 1800H on D plus 1.

PRE-ARRANGED TARGETS

9. 9 Aust Div will submit to this headquarters by 26 Feb, details of the pre-arranged targets in the MONGO and KENPAI areas, the amount of fire required on each and allocation of SFCPs to ships. The details will be decided in conference with the Corps naval representative.

SIRAWAI AREA

10. A diversionary raid under GHQ arrangements is being carried out at SIRAWAI on D Day. The Naval Force for the bombardment is -

- (a) 2 CL - 9 x 6"; 8 x 5"
- (b) 4 DD - 4 x 5"

These ships are in addition to those allocated in para 1.

11. The mission of the diversionary force will be the bombardment of selected targets, including beaches in the vicinity of SIRAWAI, from H minus 117 minutes until H Hour D Day.

AMMUNITION ALLOWED FOR BOMBARDMENT

12. The total allowances of ammunition to ships for all fire support missions is given in Part II of this appendix.

FIRE SUPPORT COMMUNICATIONS

13. Frequencies, call signs and code names which will be used by fire support ships and naval bombardment troops are shown in Part III of this appendix.

NAVAL SMOKE

14. All naval ships in the attack force are prepared to make smoke for the landing force.

15. 9 Aust Div will submit to this headquarters by 26 Feb requirements for naval smoke. The details will be decided in conference with the Corps naval representative.

.....

PART 2 - TOTAL AMMUNITION ALLOTTED
FOR BOMBARDMENT.

SHIPS IN MONACO AREA (H minus 2 hours D Day to 1800H D plus 4)

1. (a) 2 CA - AUSTRALIA and SERPENSIRE each -

8" HE	-	680
6" SAP	-	200
4" HE	-	400

- (b) 4 DD - FLETCHER, RADFORD, JENKINS and L. VALLETTE each -

5" AAC	-	750
5" Common	-	125
5" WP	-	50

SHIPS IN MONACO AREA (H minus 2 hours to 1800H D plus 1)

2. (a) 2 CL - NASHVILLE and PHOENIX each -

6" HE	-	1050
5" AP	-	300
5" AAC	-	800
5" WP	-	40

- (b) 6 DD - GILLESPIE, MORRIS, HUGHES, RUSSELL, MUSTIN
and STEVENSON each -

5" AAC	-	600
5" Common	-	100
5" WP	-	40

SHIPS IN MONACO AREA (H minus 2 hours to 1800H D Day) and at
KENAPAI (H Hour to 1800H D plus 1)

3. (a) 1 CL - BOISE

6" HE	-	1050
6" AP	-	300
5" AAC	-	800
5" WP	-	40

- (b) 2 DD - HOBBY and WELLES

5" AAC	-	600
5" Common	-	100
5" WP	-	40

SHIPS AVAILABLE FOR FIRE SUPPORT (1800H D plus 4 to 1800H D plus 30)

4. 2 DD (to be relieved daily, names to be communicated) each -

5" AAC	-	600
5" Common	-	100
5" WP	-	40

SHIPS OF THE DIVERSIONARY FORCE (H minus 2 hours D Day to H Hour D Day)

5. (a) 2 CL - TUSCALOOSA and AKRON each -

6" HR	-	450
6" AP	-	180
5" AAC	-	400
5" WP	-	45

- (b) 4 DD - ARDEN, MULLANY, ABNER READ and HUTCHINS each -

5" AAC	-	750
5" Common	-	100
5" WP	-	40

6. LCI(G) each -

3" AAC	-	750
3" Common	-	250

7. LCI(R) each -

Outfit of 288 rockets
5 re-fills of rockets

8. All Ships -

40 mm - 5000- 10000 rounds
20 mm - 5000- 10000 rounds.

~~S E C R E T~~

Exercise "SEAGULF"

Appendix 'H' to 1
Aust Corps Operation
Order 1.

AIR SUPPORT PLAN
PART I

GENERAL

1. Close Air Support is being provided until D plus 1 by an Escort Carrier Group of 8 CVZ (128 fighters and 50 dive bombers/torpedo bombers). On D plus 8 this group is leaving the area and responsibility for close air support is being taken over by land based aircraft.
2. The carrier borne aircraft allotted for the operation are sufficient only to permit air support in the actual areas of land operations from D Day to D plus 8. All targets prior to D Day, and targets outside the actual areas of land operations subsequent to D Day and until D plus 8, will normally be dealt with by land based aircraft operating under GEC control. 9 Aust Div will submit by 26 Feb 45 requirements for pre-arranged targets beyond the scope of close support aircraft. Approved requests will be forwarded by this headquarters to GEC for consideration.
3. Subsequent to D plus 8 close air support will be provided by land based aircraft operating from airfields within the covering position.

CLOSE AIR SUPPORT D DAY TO D PLUS 7

4. From D Day to D plus 7 inclusive the procedure for control and submission of requests for close air support is -
 - (a) All support aircraft are to be controlled by the Support Aircraft Controller (Commander Support Aircraft) afloat in the Headquarters Ship. Requests for air support may be granted or disallowed at his discretion. The senior army formation commander may refuse any request by a subordinate headquarters prior to its submission to the Support Aircraft Controller.
 - (b) Requests for support may originate from battalion, brigade or divisional headquarters. For this purpose headquarters of each battalion and brigade have an Air Liaison Party (Naval) attached, and Support Aircraft Parties are attached to corps and each divisional headquarters. Air Liaison Parties (Naval) and Support Aircraft Parties are in wireless communication with the Support Aircraft Controller afloat. The Support Aircraft Controller may delegate full control of the support aircraft to OC No 1 Support Aircraft Party (Corps) who is Deputy Support Aircraft Controller ashore, or partial control to OCs Nos 2 and 3 Support Aircraft Parties (Divisions) for operation on their own respective fronts. See diagram attached.

- (c) Approved requests are passed from the Support Aircraft Controller to an Air Co-ordinator who is airborne over the area of operations. The Air Co-ordinator identifies that target and guides the supporting aircraft on to it. He is also able to converse with any Air Liaison Party and receive any supplementary direction which may assist him to identify targets.
- (d) After Command Group I Aust Corps lands, control of support aircraft is to pass from the Support Aircraft Controller afloat to the Support Aircraft Controller ashore; the latter's function is identical with that of the Support Aircraft Controller afloat. The Support Aircraft Controller ashore retains control until the departure of carrier based aircraft.
- (e) Army Air Liaison Officers, specially trained as airborne officers, have been allotted to the Escort Carrier Group. These officers are available to fly in carrier based aircraft and report activities of own and enemy ground troops, carry out naval and field artillery ranging and message dropping.
- (f) Requests for air photography will be passed over the air request net from Air Liaison Parties to Command Group I Aust Corps, where requests will be co-ordinated to avoid duplication, and passed direct to the Support Aircraft Controller over the inter-command support aircraft net. Film will be developed on board the carriers and two copies dropped at the requesting agency. If required, further copies will be delivered by normal DRLS.

TYPES OF CLOSE AIRSUPPORT AVAILABLE

- 5. (a) Straffing attacks - .50 calibre MGs and rockets
- (b) Dive and low level bombing - AP, SAP, GP bombs up to 1000 lbs. Incendiary bombs.
- (c) Smoke - Smoke curtain installation (SCI), white phosphorous (WP) smoke bombs.

CLOSE AIR SUPPORT PROGRAMME

- 6. A suggested programme utilising the available aircraft (128 VP and 96 VTB) and allowing for fleet protection, unserviceability and casualties, is shown in Part II to this appendix.

AIR OP PLIGHT

- 7. (a) Six Air OP (AUSTERS) will be landed on D Day, and when emergency strips have been constructed by 9 Aust Div will be available to carry out short range reconnaissance, artillery observation of fire and emergency communication flights. Tasks given to these aircraft will be notified to Support Aircraft Controller through the air request net.
- (b) On D plus 4, these aircraft will revert to control of 1 Aust Corps.
- (c) Allocation of AUSTERS to divisions will be based on operational requirements.

- 3 -

CLOSE AIR SUPPORT D PLUS 8 TO D PLUS 30

8. Dependent on the progress of airfield construction six fighters, one tac R, and three medium bomber squadrons will be available for close support. ... Types of armament as shown in paragraph 5 above.

REQUESTS FOR CLOSE AIR SUPPORT AND AIR PHOTOGRAPHY

9. See Part 3 attached to this appendix.

FIGHTER PROTECTION AGAINST ENEMY AIR ATTACK

10. D Day to D plus 7 inclusive

By carrier based aircraft in conjunction with protection of the fleet and shipping; controlled by Fighter Director afloat.

11. D plus 8 and thereafter

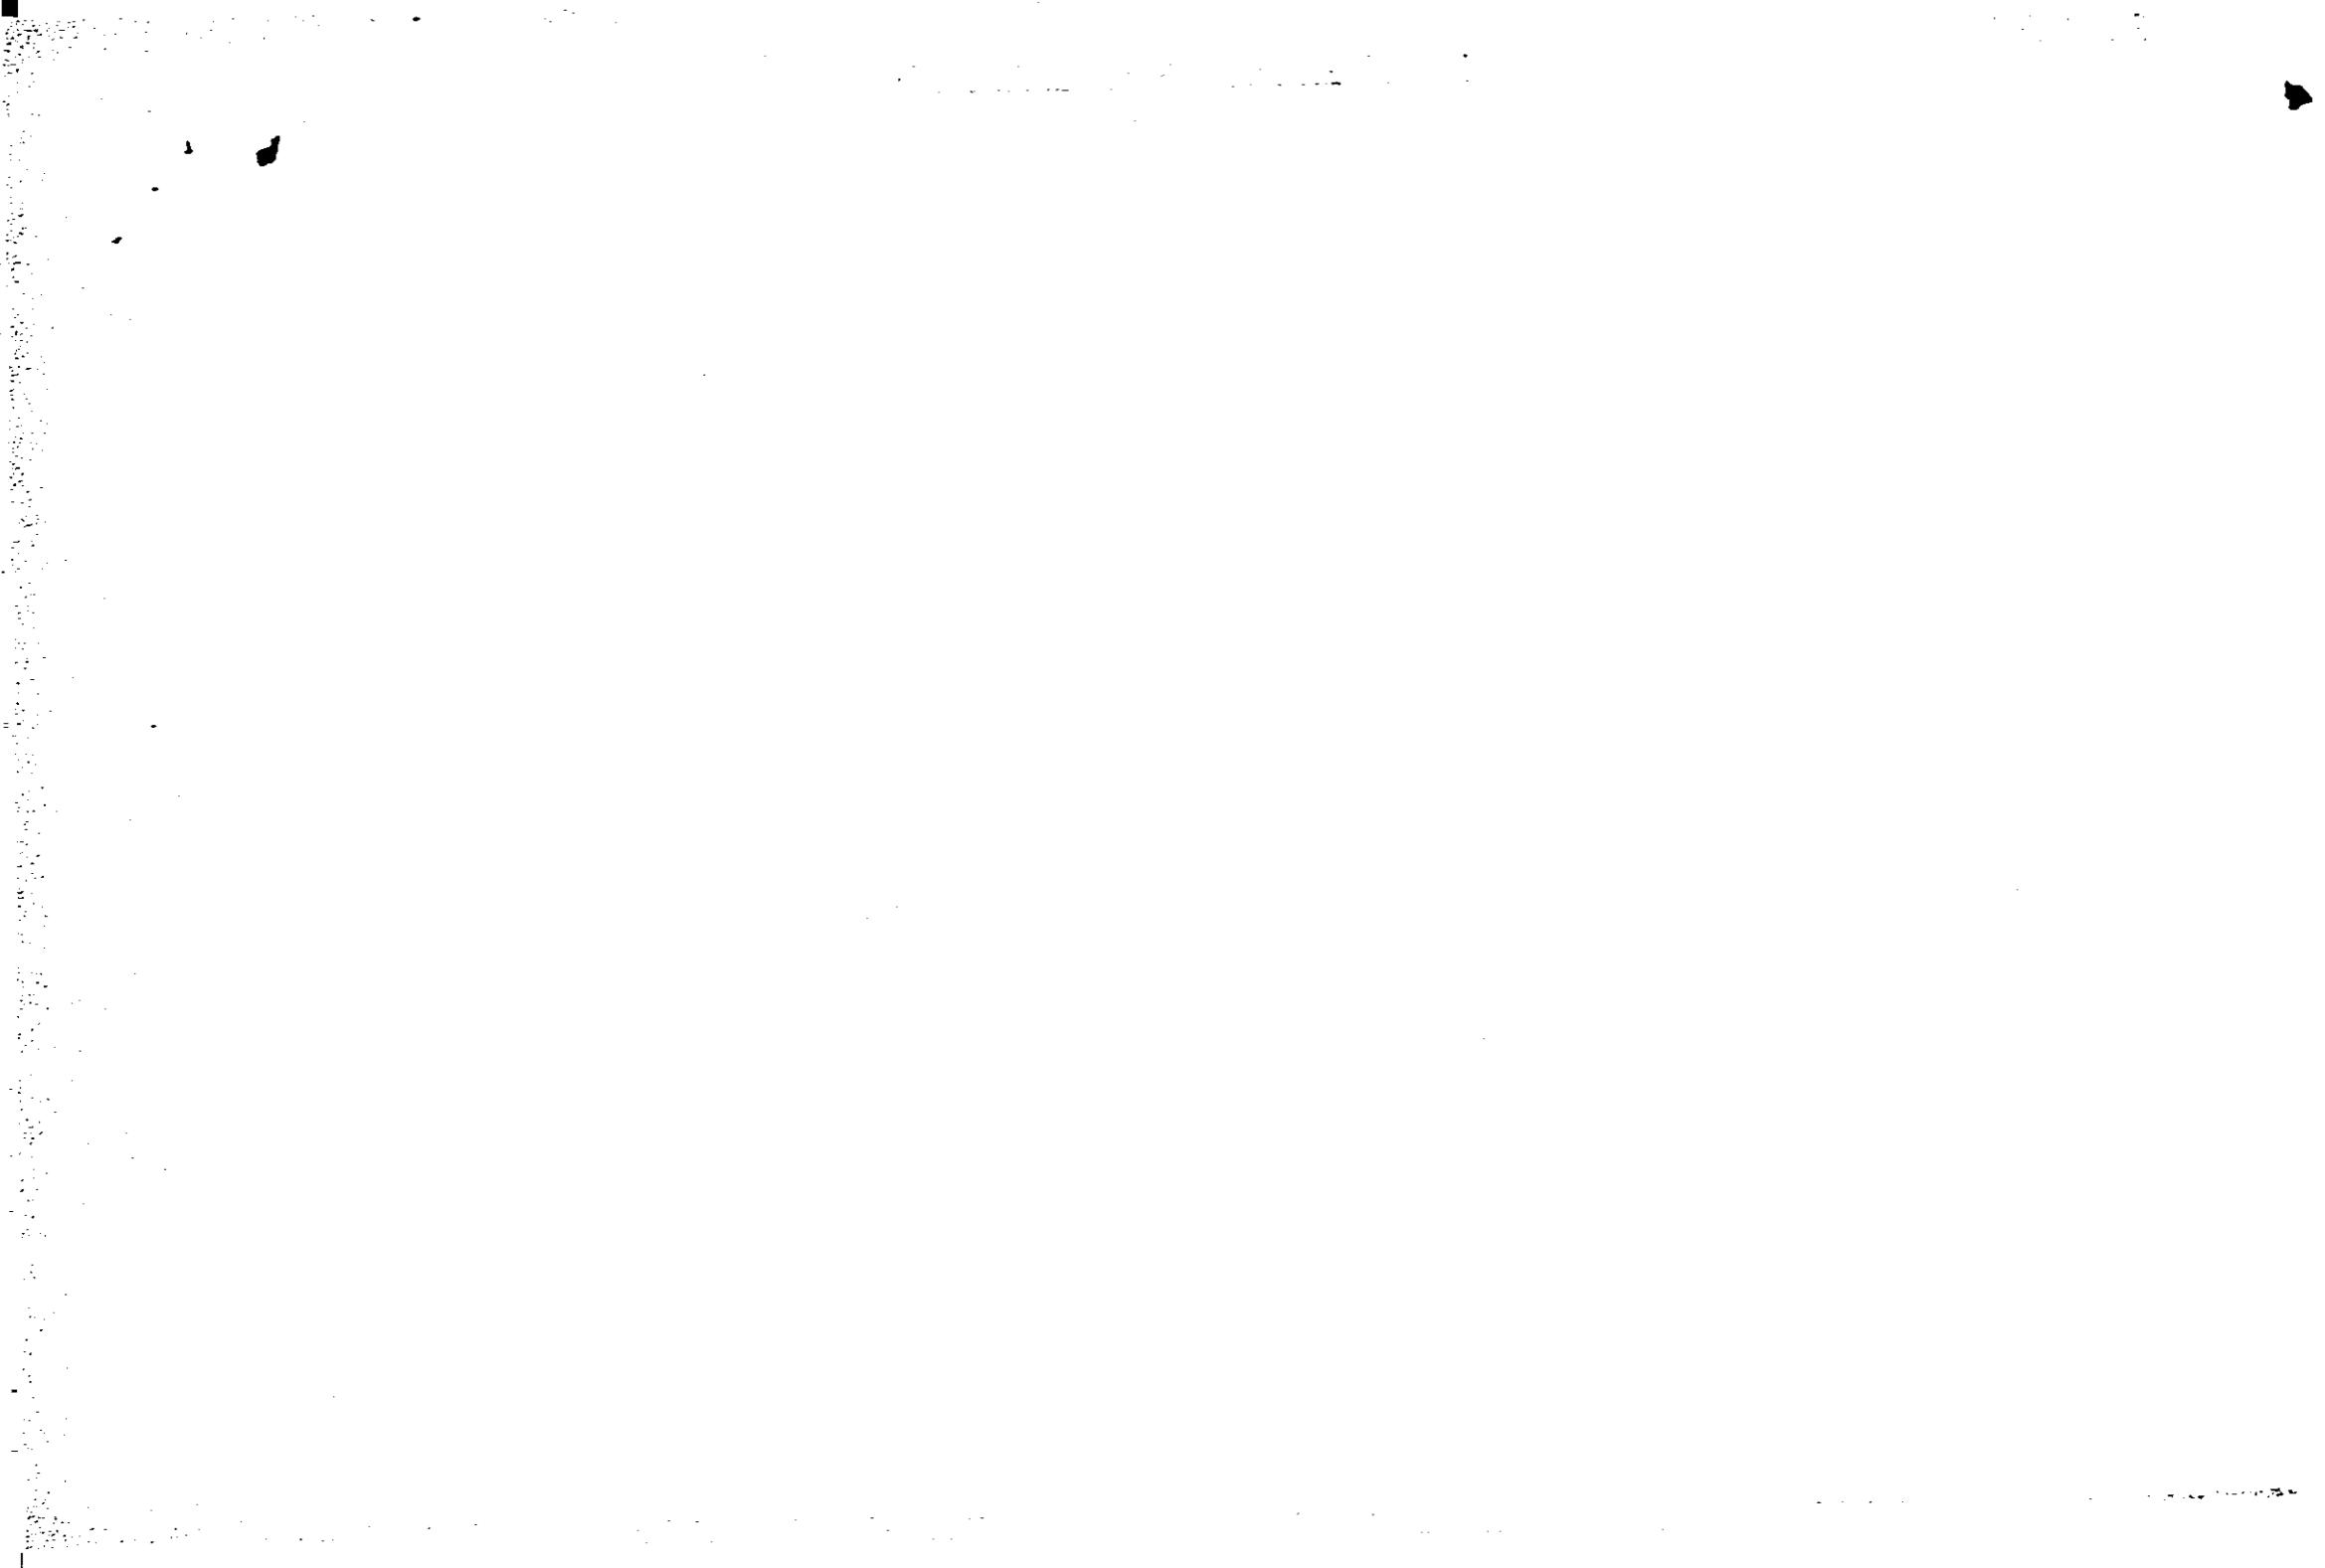

By fighters based on MORONES ISLAND controlled by Fighter Sector Controller.

PART II

CLOSE AIR SUPPORT
PROGRAMME

Serial	Day	Number of Aircraft Available	Time		Remarks
			From	To	
1	D Day	24 VF 27 VTB	First Light	H Hour	Available for attack on pre arranged targets as desired by 9 Aust Div, or any opportunity targets offering.
2	D Day	4 VTB	First Light	H plus 2 hrs	Smoke aircraft on air alert for opportunity tasks
3	D Day	12 VF 9 VTB	H Hour	H plus 10 hrs	Air alert-on station continuously orbiting pre-arranged positions, on call for close support targets as required by ground troops.
4	D Day	12 VF 18 VTB	H plus 1 hr	Last Light	Available on call for special targets as required. Maximum two sorties per aircraft/day. Remain on carriers until ordered off by SAC.

the first time, and the author's name is given as "John Smith". The book is described as being bound in red leather with gold tooling, and it is noted that the title page is slightly faded.

Serial	Day	Number of Aircraft Available	Time		Remarks
			From	To	
5	D Day	4 VTB	First Light	Last Light	Air-borne observers - available as required for recce-artillery/ naval recce and message dropping
6	D Day		First Light	Last Light	Photo recce on 2½ hrs notice.
7	D Day	4 VTB	H plus 2 hrs	Last Light	Smoke aircraft on 4 hrs notice
8	D plus 1 until land-based take over close support	12 VP 9 VTB	First Light	1800 hrs	Air alert as for serial 3.
9		12 VP 18 VTB	First Light	Last Light	Special targets as for serial 4.
10		4 VTB	First Light	Last Light	Airborne observers as for serial 5.
11			First Light	Last Light	Photo recce at 2½ hrs notice
12		4 VTB	First Light	Last Light	Smoke at 4 hrs notice

NOTE: 9 Aust Div will submit by 26 Feb 45 requirements for attack by close support aircraft on pre-arranged targets and recommended modifications to the above programme.

PART III

CLOSE AIR SUPPORT BY LAND BASED AIRCRAFT FROM D PLUS 8 ONWARDS
COMMUNICATIONS

1. RAAF will provide the following communications -
 - (a) Air Support Parties allotted on a scale of one per divisional headquarters and a further two per division for allotment to forward brigades at the discretion of the divisional commander.
 - (b) All Air Support Parties linked on the air request net to the Air Support Section situation with HQ 1 TAF.
 - (c) Communications between the Air Support Section and supporting aircraft bases as shown in diagram attached.

PROCEDURE FOR CONTROL AND SUBMISSION OF REQUESTS FOR CLOSE AIR SUPPORT

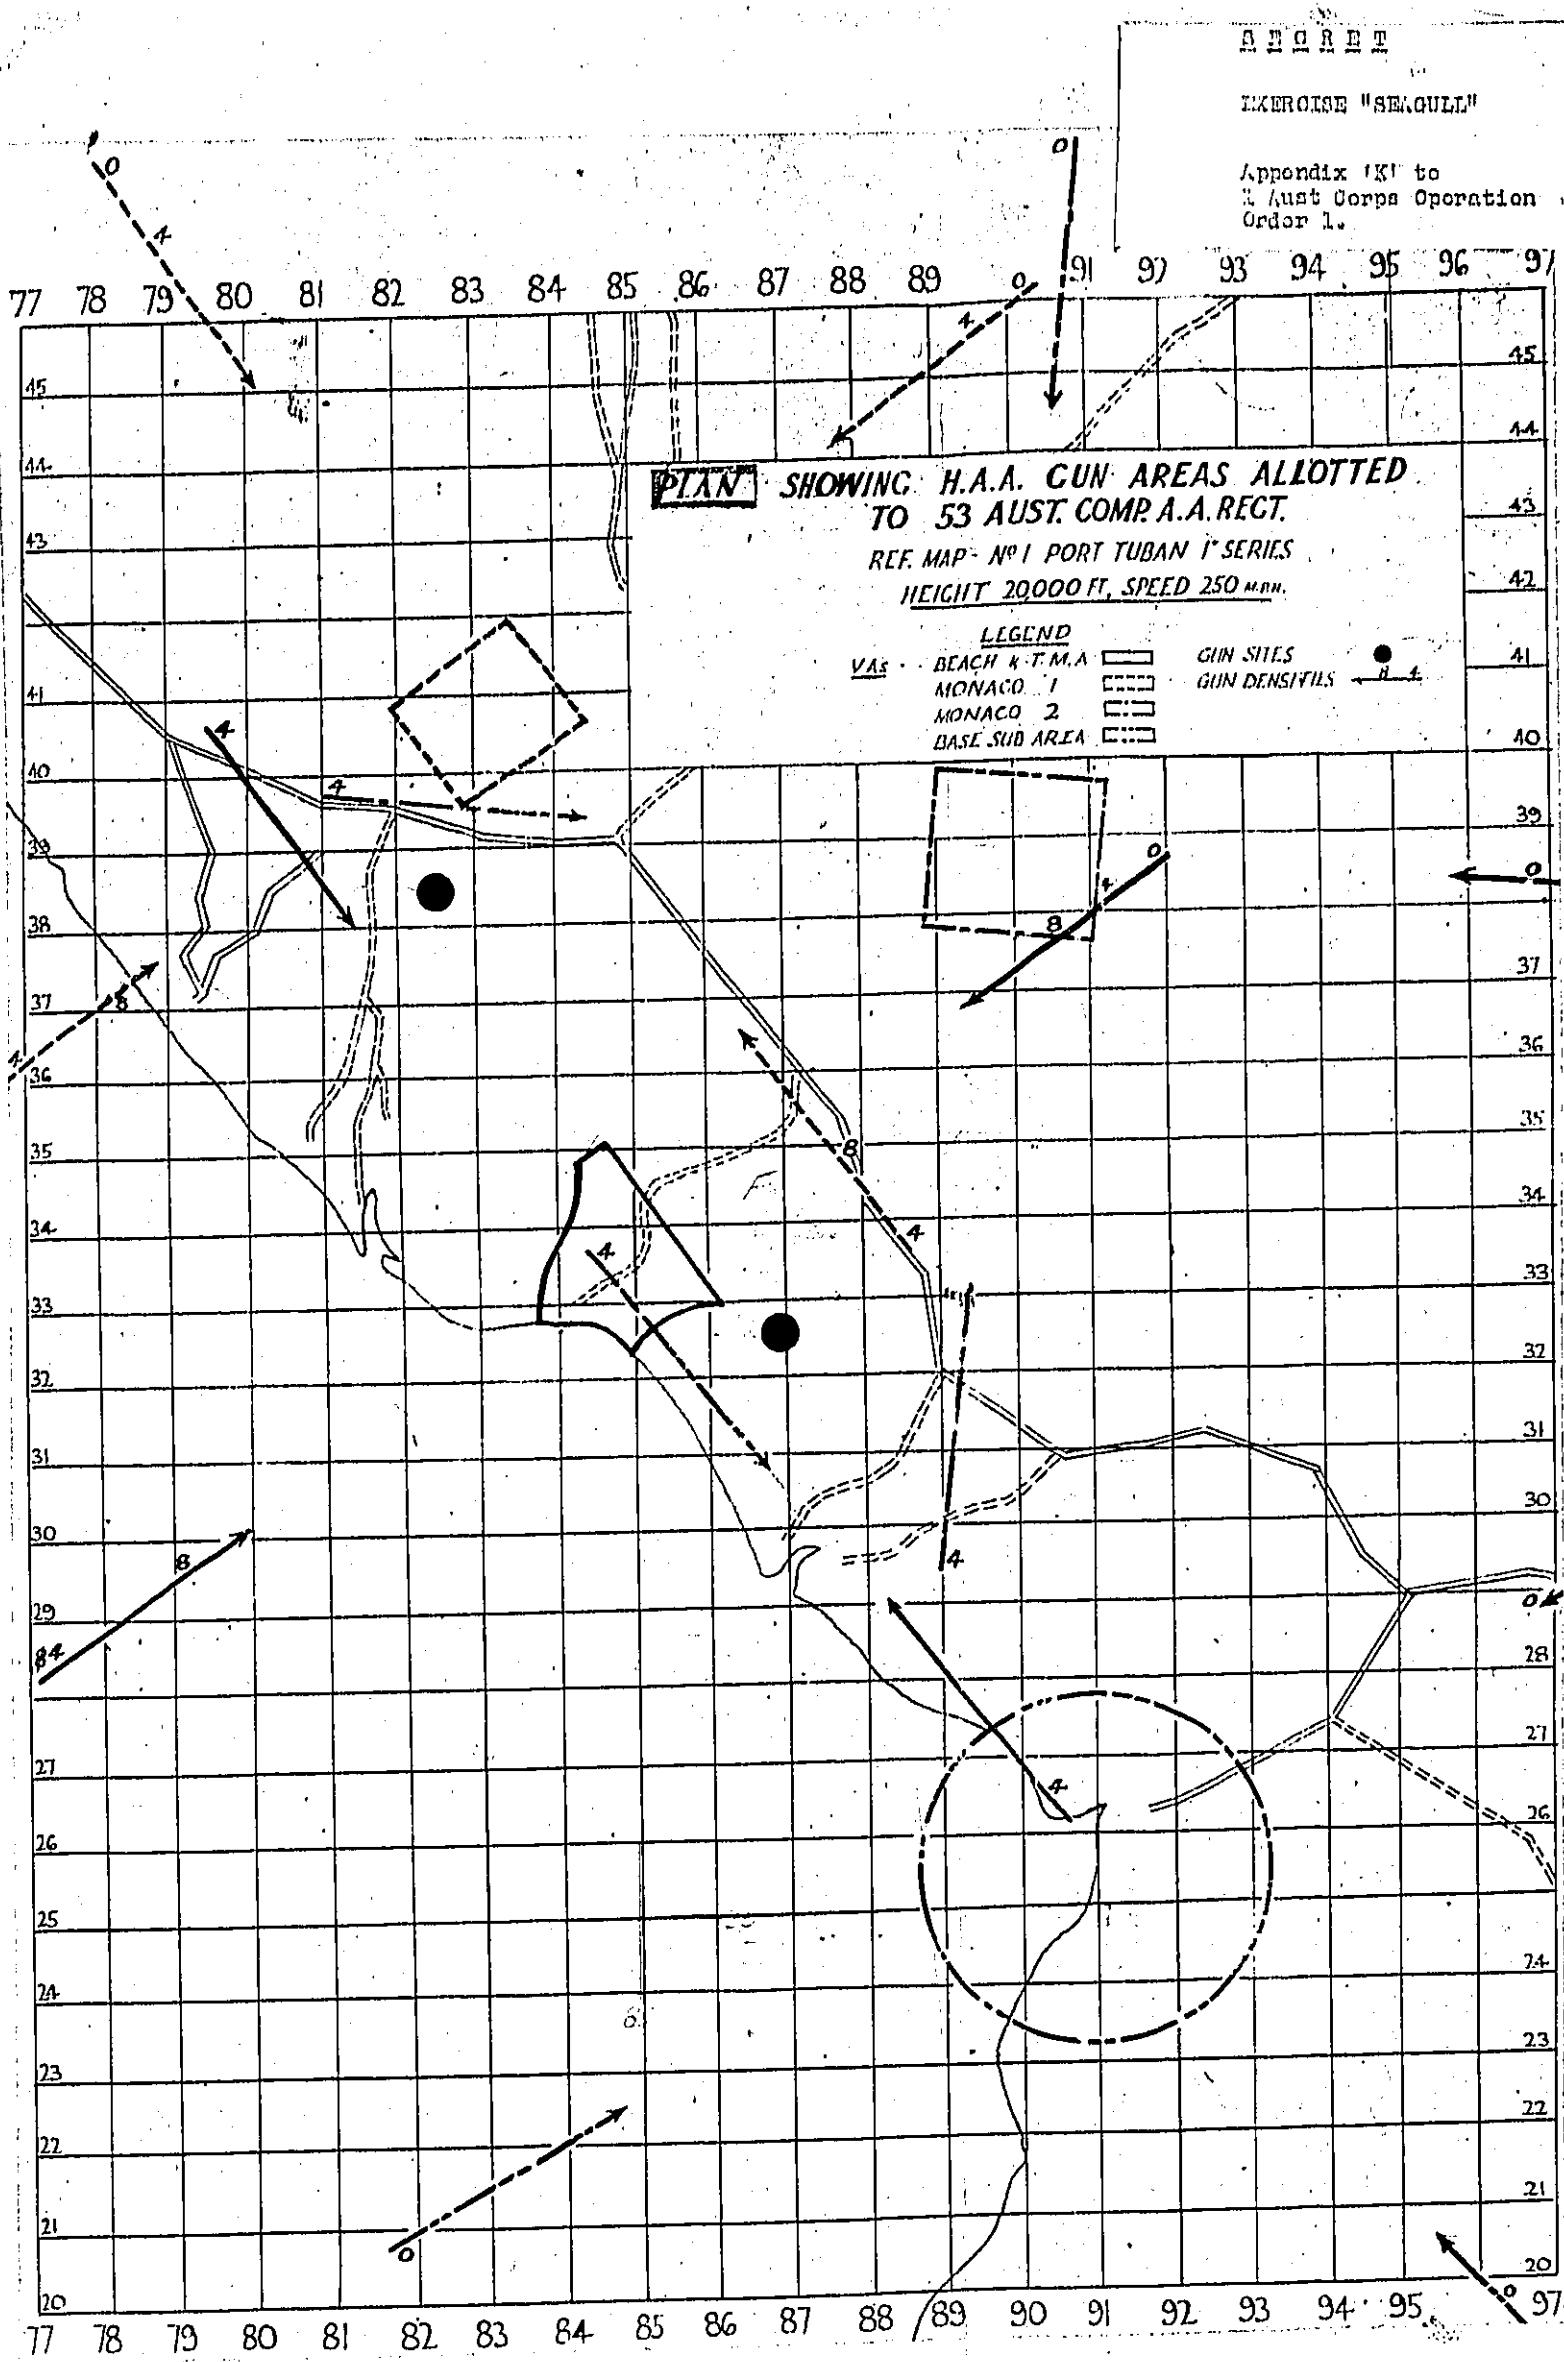

2. Requests originated by forward troops will be passed back over army communications to brigade headquarters where they will be considered by the brigade commander advised by the Air Support Party officer. Requests approved by brigades and those originating at divisional level will be passed by the respective Air Support Parties over the air request net to the Air Support Section where they will again be considered by the Air Support Section officer, acting on behalf of the AOC RAAF, in collaboration with a corps representative, before supporting aircraft are ordered to attack.

3. All stations on the air request net will maintain listening watch, and higher headquarters may veto any request by subordinate formations.

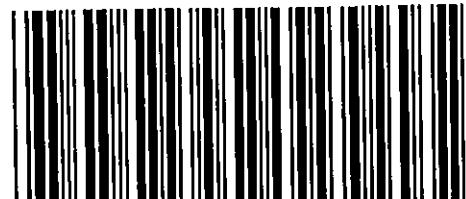

4. When supporting aircraft are airborne they will be controlled on the ground - air net from either the Air Support Section or any one of the Air Support Parties at the discretion of the Air Support Section Officer. Strike results may be passed from supporting aircraft direct to the Air Support Party concerned over the ground - air net.

5. Requests for air photography will be passed over the air request net in the same manner as requests for close air support.

.....

0010981

~~SECRET~~

EXERCISE "SEAGULL"

Appendix 'O' to 1 Aust
Corps Operation Order 1

SECURITY MEASURES

PLANNING

1. Dissemination of information will be restricted to the minimum staff commensurate with efficiency and even then individuals will be told only sufficient detail to enable them to perform their particular tasks.
2. The time table for disclosure of the plan to subordinate formations and troops is as follows -
 - (a) Brigade Commanders Not before D minus 45
 - (b) Battalion Commanders Not before D minus 30
 - (c) Company Commanders Not before sailing date minus 7
 - (d) Platoon Commanders Not before sailing date minus 4
 - (e) Troops Not before sailing date minus 2

CENSORSHIP

3. Franking of Correspondence
 - (a) Special care will be taken by unit franking officers to ensure that presence of units in the staging areas is not disclosed.
 - (b) Prior to sailing date minus 7, field censorship personnel will conduct spot checks of outgoing mail of all units in the staging areas. After sailing date minus 7 field censorship personnel will arrange for all outgoing mail to be recensored.

4. Telegrams

From sailing date minus 7, cable and telegram facilities will be withdrawn from all ranks, except that cables and telegrams may be sent in special cases. All such telegrams or cables will be submitted to the field censorship company before despatch.

Copy No

1 AUST CORPS SIGNAL INSTRUCTION NO 4

OPERATION "SEAGULL".

INFORMATION

1. 1 Aust Corps will capture the Island of TORONKE to permit its development as an Adv Base and the establishment of Air and Naval facilities.

2. The initial landing will be made by 9 Aust Div Task Force followed beginning D + 7 by 7 Aust Div Task Force. 6 Aust Div will remain as Corps reserve at EWAN.

3. The following Corps Signal units will be under Cond 9 Aust Div :-

53 Comp AA Rgt Spt Sec
2 Aust Line Sec
Det 2 Aust Wireless Sec (Lt)
3 Aust Wireless Sec (Lt)
7 Aust Wireless Sec (Lt)
3 Aust Pigeon Sec

4. The following Corps Signal Units will be under Cond 7 Aust Div :-

2/1 Comp AA Rgt Spt Sec
3 Aust Line Sec
Det 2 Aust Wireless Sec (Lt)
12 Aust Wireless Sec (Lt)
40 Aust Wireless Sec (Lt)
6 Aust Pigeon Sec

INTERFIC

5. Signals 1 Aust Corps will provide communications during assault and subsequent stages of operation "SEAGULL".

METHOD

Wireless

6. Communications to be established as in appendices shown below :-

Appx W 1 Starting area communications
Appx W 2 Initial communications H - 2 hrs.
Appx W 3 HQ 9 Aust Div ashore
Appx W 4 1 Aust Corps Comd Gp Ashore
Appx W 5 Adv HQ 1 Aust Corps Ashore
Appx W 6 HQ 7 Aust Div Ashore
Appx W 7 Final Wireless Communications

7. Fixed crystal frequencies in use throughout 1 Aust Corps are given in appx W 6.

8. Fixed channel frequencies are given in appx W 9.

9. Daily change frequency tables for all channels other than those for which frequency is fixed are given in appx W 10.

10. Column will be changed at 0600 H hrs daily. Column sequence is shown in appx 12.
11. Watch will be maintained by "A" Aust Corps Signs and Si's 9 Aust Div on 3690 kcs for the duration of operation "BEAVER". This channel may be used for emergency communication and will be under the control of Si's 9 Aust Div.
12. Wireless circuit changes for C rps links will only be made as ordered by CSC.
13. From H - Z/Hrs until 0600 H hrs on D + 3 Combined U/T and R/T procedure in accordance with CCOP 1 and CCOP 3 will be used on all links. At 0600 H hrs on D + 3 all links other than those to Navy, Air Force and US Army will revert to link procedure.
14. Army Call sign book G26/3 will be used for all code signs, other than code signs shown for fixed channels. Allocation of row numbers will be as follows :-
- | | |
|---------------------------------------|--------------------|
| "A" Aust Corps Si's for all Corps Tps | 1 - 10 |
| 2 Aust Div | 111 - 260 |
| 3 Aust Div | Si - 110 201 - 260 |
| 4 Aust Armd Bde | 261 - 320 |
| 1 Aust Base Sub Area | 321 - 340 |
- Code sign columns will be changed at 0600 H hrs daily. Column sequence is shown in appx 12.
15. The system of code words for changing Frequency and for imposing and breaking wireless silence at present in use will be adopted. Code word row numbers will be the same as frequency row numbers. e.g. Code word ~~on~~ C1 will be allotted to frequency row F1. Column sequence is shown in appx 12. Code word for Imposing wireless silence will be row C 121, reserve 122. Code word for breaking wireless silence will be row 123, reserve 124. Code words for use with fixed frequencies will be issued separately.
16. Code names at present issued to Signal units will continue in force but will remain fixed from H - Z/Hrs until 0600 H hrs on D + 3, when daily change will be resumed. Column sequence is shown in appx 12.
17. Present allocations of frequencies, code signs, etc, in use by 6 Aust Div will remain in force until 6 Aust Div moves from its present location when separate instructions will be issued.
18. Authentication Tables CCOP 0122-2 series method 1 for the current month will be used.
19. Datum frequency will be 5610 kcs and the associated code word DONAT.
20. Wireless Silence will be maintained afloat until H - Z/Hrs. Listening watch will be maintained from 1000 H hrs D - 1. All sets afloat at H - Z/Hrs will open communication at H - Z/Hrs. There will be no wireless silence with sets located on land.
21. Wireless traffic within and between the sea areas will be maintained at 5000 groups per channel per day from D - 30 to D + 2.
22. All groups will be netted under arrangements to be made by controlling HQ and for security reasons groups

controlled by a HQ will be netted at different times. Control stations will be placed on frequency by frequency meter prior to netting of groups. Care will be taken to ensure that sets have been warmed up before being netted and that dial settings are carefully noted.

23. All sets on the links Adv L1, - LS1 (1 Aust Corps) will be carefully netted prior to departure of Div from St. Area 1.

24. RCO's I/c wireless sets must be in possession of a detachment duty card which will show the exact details of the group or groups on which the set must work. In the assault all operators will be issued with copies of the detachment duty card. Specimen detachment duty card is given as appx. 11.

Line

25. Communications in starting Areas 1 and 2 are given in appendices L1 and L2. These communications will be dismantled on embarkation of troops, by 22 Aust L of C Signals, who will be responsible for packing and transportation of all equipment to the far shore.

26. Arrangements are being made for embarkation communications in Starting Area 1 to be provided by 22 Aust L of C Sigs assisted by "A" Aust Corps Sigs.

Sigs 7 Aust Div will carry through DS for A1 stores required for embarkation communications in Starting Area 2 to be transferred from 1 Aust Beach Group to Sigs 7 Aust Div. Responsibility for installation will rest with Sigs 7 Aust Div.

22 Aust L of C Sigs will be responsible for recovery of embarkation communications in Sigs in Areas 1 and 2 and the transportation of equipment to the far shore.

27. Attached as appx L3 is a track diagram routes to be followed by main trunk lines on far shore, for issue to "A" Aust Corps Sigs and Formation HQ only.

28. Initially two speech and two full duplex channels will be established to each Division. One full duplex channel to 9 Aust Div will be converted to teletype by D + 7.

29. "A" Aust Corps Sigs will build 2 pairs of Pd multi-airline from Adv Corps HQ to HQ temporary base Sub Area by D + 2, subsequently increasing the route to 3 pairs by D + 6.

30. Seethphones will be installed at 9 Aust Div and Adv Corps HQ by D + 2 and at 7 Aust Div and at HQ 1 Aust Div Sub Area by a date to be notified later.

31. Corps Line Sections attached to Div Task Forces will be responsible for the construction of the Corps main arteries to 7 and 9 Aust Divs following the routes set out in appx L3. These line sections will at all times carry the line construction well forward of Div HQ and "A" Aust Corps Sigs will be responsible for technical supervision of construction and the employment of additional line sections where necessary.

32. Line diagram showing initial communications to be installed by 1000 hrs on D + 1 is attached as appx L4.

33. On no account will Pd cable routes be attached to Pd multi-airline or permanent line poles or crossarms. Where possible all Pd cables will be suspended at least 1' feet clear of the ground and road crossings. For all types of lines will give a minimum clearance of 10 feet.

34. All lines will be clearly labelled, and all multi-airline routes will be properly transposed.

35. No cable will be reeled in, out, or in any way interfered with until it has been ascertained that it does not form part of a circuit or terminate in any unit or HQ.

D R L S

36. By 1000 hrs on D + 1 "A" Aust Corps Signs will establish a DRLS to 9 Aust Div, Corps and Base units. Prior to this time despatches will be carried by special DR.

C O D E S

37. Medical - Bed State Code.

R C Codes

38. (a) Slidex with Div Keys
(b) Appointment Code - current appointments code, (vide Sig Try All Arms Pam 5) will be used in referring to individuals, branches and appointments.

39. Combined Assault Code (CCBP 0130D) - for use in initial assault phase only. Will be replaced by normal field grade cipher 0600 H hrs on D + 3.

C I P H E R

40. ARMY

- (a) Corps Level
Typex with EX512 and current G46, G48 and G50.
G19/4 with current G59C
GTT as already issued.
- (b) Div Level
G19/4 with current G59C
- (c) Bde Level
G33 with current G59C
- (d) Unit Level
Intra Div - Trenocode with Div keys
Inter Div - Trenocode with Corps keys.

41. COINER 2 AUST-15

- (a) Corps Level
CCN with current CCBP 0101 and CCBP 0103
C.P. 645 with current CCBP 0125 and CCBP 0126 as emergency reserve.
- (b) Div and Bde Level
Combined Field Code (CCFP 0129) with current CCBP 0121D.

42. INTER SERVICE

- (a) Corps Level
CCN with current CCBP 0101 (RAF only).

43. Typex may be taken ashore at any time. Drums inserts and settings will NOT be landed before D + 2.

44. Corps will advise Adv HQ when machine is ready for operation. Until that time all traffic will be on G 19.

45. LSII will carry all ciphers held by the HQ aboard.

Cipher documents on issue to HQ ship cipher section will not be removed by formations using the ship.

46. Cipher documents on issue to Beach Signal Sections will not be taken ashore ahead of Dde HQ.

47. Trenode cipher will be brought into use by units 0600H hrs D + 3, until that time Combined Assault Code will be used where necessary;

48. Trenode keys for use D + 2 to D + 14 will be issued in sealed envelopes prior to embarkation. Keys will NOT be opened before D day. Normal issues of keys will be made for use on and after D + 15.

49. R E S E R V E S

(a) First reserve high grade cipher documents will be held at Corps HQ.

(b) First reserve medium grade documents and two sets of reserve Trenode keys will be carried at Div HQ.

50. Cipher equipment will be split into sets and carried separately to minimise risk of loss. Any loss or compromise of ciphers will be reported immediately to higher formation.

ADMINISTRATIVE

Stores

51. The normal procedure for the supply of Signal Stores will be adhered to.

52. "A" Aust Corps Sigs will arrange for the temporary location of the CSO's Stores Dump within the Corps Sigs camp area. On arrival 22 Aust L of C Signals will provide for the establishment of the main CSO's Stores Dump adjacent to their Camp Area.

53. Appendix S 1 gives a list of permanent line stores which will be landed D + 15 and onwards.

54. Appendix S 2 gives a list of under ground cable and associated stores to be landed approximately D + 60.

55. Appendix S 3 gives a list of stores to be brought forward after D + 60 as shipping permits.

56. 22 Aust L of C Signals will be responsible for movement of stores contained in appendices S 2 and S 3.

57. CYS and 2 storemen from CSO's Staff will be attached initially to "A" Aust Corps Sigs and subsequently to 22 Aust L of C Signals to supervise the CSO's Stores Dump.

58. Captured enemy Signal equipment will be handled by Field Security Sections (EE) in accordance with HQ priorities for individual items. The location and a brief description of any captured enemy installations or dumps of Signal stores will be reported to CSO 1 Aust Corps.

59. Div Sigs will be primarily responsible for

recovery of Field cable. When this is impracticable recovery will be undertaken by "A" Aust Corps Sigs and O'sC Div Sigs will notify CSO 1 Aust Corps locations of all abandoned routes which they are unable to salvage.

60. All special Signal equipment issued for use during the assault stages will be withdrawn immediately operations permit and held at Rear Div HQ until collected by CSO 1 Aust Corps.

ACMO LEDGE.
