HQ 26 Coy RAASC (GT)

85 TPT PL RAASC OPERATIONS 25 MAR 68 - 24 APR 68

Statistics

1. The following statistics have been compiled for the two types of 5 ton GS vehs operated by this platoon ie. Dump and Cargo (Incl the 5 Ton GS garbage and water vehs):

	Cargo	Dump	Total
a. Daily Average Veh Availability Percentage Availability	11	10	21 84%
b. Daily Average No of Vehs Tasked	10	10	20
c. Total No of Task	217	123	340
d. Daily Average Mileage	300	304	604
e. Total Monthly Mileage	9305	9422	18727
f. Accident Ratio to Total Mileage	0/9305	1/9422	1/18727
g. The highest number of task occurred on 1 Apr 68 with 12 Cargo and 12 Dump Vehs tasked and the lowest on the 10 Apr 68 with 9 Cargo and 9 Dump vehs tasked.			

2. On the 1 Apr 68 100% availability was not achieved due to following Veh not being available for tasks:

- a. 1 X 5 Ton Cargo - Workshop Repairs

3. The following factors were used to calculate the statistics shown:

- a. Month period from 25 Mar 68 to (and incl) 24 Apr 68 ie. 31 Days

- b. No of 5 ton GS Vehs in Pl:

Cargo	Dump	Total
13	12	25

- c. This does not include 1 X 5 Ton GS Dump Veh held in reserve at Pl HQ or 7 Dump vehs on Det to 5 Coy RAASC (Div Tpt).

General

4. The increased mileage covered during the period is attributed to the improved availability and increase in number of tasks with a slight increase in daily average mileage.

5. Although a high availability of Dump trucks was usually maintained the following were faults which occurred requiring workshop attention and vehicles off the road for varying periods.

- a. Crack in cabin mountings - required re welding, approx four vehs affected, work usually done locally.
- b. Cracks in tray guide runners, required re welding, 2 vehs affected.
- c. Cracks in tops of hoist rams, hoist oil seals faulty. This requires workshops attention at VUNG TAU. Two vehs affected.
- d. Cracks in hoist cross member. Four vehs affected. Work (re welding) done locally.

5. With continual changing of TCV'S from "side seating" to "centre seating" and reverse, the insert rods and clips devices that hold the tops of the seats together in the "centre seating" configuration have broken off at the screw tops. About 75% of Unit TCV have been affected. Efforts have been made to:

a. Manufacture locally the rods, little success because of lack of suitable steel.

b. Obtain (through Capt S & T HQ 1 ATF) replacement rods.

6. Without these rods the seats cannot be satisfactorily or safely fixed together in the "centre seating" position, usually required for troops lifts.

7. Section on detachment to 5 Coy RAASC (Div Tpt) (personnel only) was changed over on 31 Mar 68. Four Section replacing Two Section for an estimated period of two months.
