CONTAINERS FOR THE TRANSPORTATION OF UNIT STORES

1. A report has been received from 8 RAR requesting the introduction of a lightweight type of container for the transportation of unit stores. The containers at present available for the packing of unit stores are considered to have many disadvantages: too low/gross weight ratio, difficulty of storage when not in use, susceptibility to damp and vermin.
2. During the recent visit of the 3rd Battalion, the Parachute Regiment, in Australia, it was noticed that the unit use a collapsable plywood case for the carriage of all unit stores. Being an airborne unit requirements are such, that the container must be both light and has a high net/gross weight ratio and great torsional strength.
3. 8 RAR have investigated the construction of this type of container and an example is held by the unit. The internal dimensions being 36" x 24" x 18" (9 cubic ft). See photographs attached.
4. Comparison with existing Australian pattern containers are shown as follows:-

Serial	Factor	UK	Aust
(a)	(b)	(c)	(d)
1.	External Size	36 $\frac{1}{2}$ "x24 $\frac{1}{2}$ "x20"	38"x26"x20"
2.	Internal Size	36" x24" x18"	36"x24"x18"
3.	Net Weight	25 lbs	90 lbs
4.	Gross Weight	150 lbs	300 lbs

5. In view of the above, it is recommended that consideration be given to the construction of a number of these crates, submitting them to user trial and possible introduction into the service. It is realised that this type of container is suitable for general stores only and should not be used for carriage of heavy stores, eg technical equipments. If approval is given, it is suggested that 8 RAR be given the task of carrying out such trials.

ABSORPTION OF NATIONAL SERVICEMEN -
USE OF SUPERNUMERARY AUTHORITY

1. The initial allotment of NSM to Corps was based on the best estimates available at the time. Even now, many of the statistics on wastage rates, transfers to ARA and ARA enlistment as a result of the NS Scheme are inadequate and are likely to remain that way until the scheme has run for at least one full cycle.
2. The effects of some imbalance in the initial allocation are far reaching. Any sudden change in allotment to a Corps now would be reflected in other Corps and their capacity for absorption affected adversely.
3. To date, the flexibility needed to offset difficulties in prediction of allocation of NSM has been provided by the excess of establishment cover over manpower available. However, as the available manpower approaches establishment, it has become obvious that some Corps will exceed their ceilings in overall numbers and certain trades.
4. In order to cover the surpluses, it is therefore necessary for some personnel to be held surplus to establishment. AHQ will issue the necessary supernumerary authorities periodically to CARO which will be responsible for the implementation of the system. As all staff action will be carried out by AHQ/CARO, it is not envisaged that Commands will be directly involved.
5. It is expected that the system will remain in force until at least Dec 67, by which time gradual changes in allotment of NSM to Corps and trades will have stabilized the situation again.

 - (a) Clerk GD - WO2
 - (b) Clerk GD - Sgt
 - (2) Posted and Effective. 13215 WO2 V. C. BURTON.

 - (3) Posted : ETA 6 TF Approximately August 1967. 15195 Pte L. G. MEYERS from HQ 1 ALSG (CARO Posting Order ST 323/67 dated 6 Apr 67 refers).
3. The overall picture presented is one of a major deficiency of two sergeants (one for each G and AQ Branch). It is believed that action is in hand for a Sgt McKEAN to be posted approximately in 8-10 weeks time.
4. During the time bracket of 26 Jul to 8 Aug 67 this HQ is required to conduct Exercise NOISY PIPPA (an AHQ major Field Force Exercise) as well as continuing to meet the formations day to day normal routine. In order to meet all requirements it is necessary that this headquarters have posted now effective clerical support which will have to be trained in the formations operations and SOPs prior to Exercise NOISY PIPPA, participate in that Exercise and be effective for the pre-BARRA WIN GA 2 operations and planning as well as attending that major Exercise. Although the time and space problem is tight, if any sort of a team is to be welded together to fulfil the demanding roles this HQ is required to play during the next 3-4 months it is necessary that the personnel vacancies be filled by NOT LATER THAN the third week in May or at the end of May at the latest.
5. Comd 6 TF views this present situation with alarm and requests that early action be taken by Comd Corps Representative to fill these positions.
