157 QUEEN'S MEDAL COMPETITION - 1958

GENERAL

1. The competition for the Queen's Medal 1958 will be held at the SWANBOURNE Rifle Range PERTH.

DATE/DURATION

2. The competition will be held on 30 Oct 58.
3. Competitors are required to arrive at PERTH by 27 Oct 58 to take part in practice shoots to be held on 28 and 29 Oct.
4. After the competition members will disperse to their commands on 31 Oct 58.

NOMINATIONS

5. Aust Army Force FARELF has been allotted one vacancy.
6. Nominations are required to reach En HQ by 31 Aug 58. The following particulars are required in respect of each nominee:-
 - (a) Number
 - (b) Rank - substantive and temporary
 - (c) Name and initials
 - (d) Unit and Corps
 - (e) Details of previous experience in similar competitions
 - (f) OCs remarks as to the members efficiency as a rifleman and suitability as a representative of Aust Army Force.

158. SECURITY OF AMMUNITION

1. Periodic snap checks carried out on ranges during the first six months of this year resulted in the recovery of over 2,500 empty cartridge cases and 42 live cartridges. These checks were by no means comprehensive and it is certain that a thorough search of ranges would have led to the recovery of a much larger quantity. It is also known that local civilians visit these ranges and remove all ammunition and empty cases which they find.
2. Carelessness in range clearance points to a lack of control by officers in command of range parties.
3. All sub units are therefore reminded of their responsibility for clearing ranges immediately after use. Further range checks will be carried out by 355 FIELD SECURITY SECTION.

- (b) Unless in an arms kote or equivalent, weapons or ammunition will NOT be left unattended at any time.
- (c) Personnel sleeping with their arms will ensure that weapons are securely attached to their person by the sling, lanyard, etc.
- (d) All personnel travelling by road or rail from PENANG will be issued with 10 rounds of ammunition.

...../3.

2. DEGREE OF READINESS

Annex 'A' to this RO gives details for all weapons in common use of their safe handling under three separate conditions or degrees of readiness. These are NORMAL, ALERT and DANGER, and the degree of readiness necessary will be decided by the senior rank present. Study the detail for the particular weapon or weapons which you handle.

3. LOADING OF WEAPONS

(a) Travelling by Road

(i) In White Areas and on Unrestricted Roads

Weapons and ammunition will NOT normally be carried except when in transit out of such an area or to a road with lower degree of safety classification. If so carried the degree of readiness will be NORMAL and armed drivers will NOT travel alone. This is to prevent the weapon being stolen if the driver is injured in an accident.

(ii) On White Roads - Degree of Readiness: NORMAL

Arms and ammunition will be carried when travelling in military vehicles, whether or not on duty, and in civilian vehicles on duty. There will always be an armed man in addition to the driver.

(iii) On Black Roads - Degree of Readiness : ALERT

Arms and ammunition will be carried under the same conditions as for white roads. Weapons will be at ALERT except for vehicle sentries who may be, at the discretion of the convoy or vehicle commander, at DANGER.

(iv) Town Board Limits

When in transit through such limits the degree of readiness dictated by the road on which the town is situated will NOT be changed. On arrival at a town at the conclusion of a journey, or on arrival at a unit, the vehicle will be halted and weapons unloaded and inspected by the senior rank.

(b) Travelling by Rail

Pistols will NOT be loaded. Rounds will be kept in a separate safe container. Rifle ammunition will remain in clips and will be kept in pouches or bandoliers except in the case of sentries who will have charged magazines for the period of their duty only. Weapons will be loaded only in an emergency or on the orders of OC Troops.

3. FIRING OF WEAPONS

(a) Travelling by Rail

Weapons will only be fired on the orders of an officer, WO or NCO.

(b) Travelling by Road

Each vehicle will have a vehicle commander appointed. Each vehicle commander will appoint two sentries who will be alert at all times. If the vehicle is ambushed the driver will attempt to drive through the ambush, and sentries will open fire. When clear of the ambush, or as soon as practicable, the remainder of the troops will debus under the covering fire of the sentries. When all other troops are clear of the vehicle the sentries will debus. The vehicle commander will then counter attack the CT ambush position from flank and rear.

3 PAR ROUTINE ORDERS PART I (cont)

144. POWERS OF DETACHMENT COMMANDER

With effect from 29 Jul 58, by virtue of AMR and O 389, the following company commander is appointed a detachment commander with powers of discipline delegated under the abovementioned AMR and O whilst in occupation of the following location :-

Maj J D ANDREW - OC A Coy at LASAH.

147. MOVEMENT TO AUSTRALIA

2. Time spent in sea travel is NOT debited against the members ARL credits.
3. Applications for RTA by sea, giving details of members desired leave address in AUSTRALIA to reach Bn HQ at least two months prior to due date of RTA.

148. BASIC PARACHUTE TRAINING - CHANGI

1. HQ MELBOURNE advises approval not given for any future attendance of AUST personnel at FEAF parachute courses.
2. The reason for this is that Aust Army is now required to pay cash per student attending Parachute Courses in MALAYA. This is not acceptable when Aust Army has its own school in AUSTRALIA.

149. SCRUB TYPHUS

1. A number of recent cases can be attributed to failure, by troops in the jungle, to apply DBP to clothing which had been delivered by air drop. Officers Commanding sub units will ensure that troops carry adequate supplies of DBP when in the jungle, and that all clothing is treated before being worn.
2. All jungle areas must at all times be regarded as likely sources of infection. The danger is particularly great in areas where the rodent population is high such as the fringe areas between cultivation and secondary jungle, and all tallang.
3. Areas which are known to be particularly dangerous are the areas of the Rivers KERBAU and BEROR and the tributaries of those rivers.
