NUI DAT YS 43476763			<p><u>OC's Comments</u> 1. In my view this past month has been an extremely successful one for the Squadron. The enemy have been capitalising on the fact that the allies DO NOT generally operate in border areas. To overcome this the 1 ATF AO was extended approximately four kilometers and Squadron patrols operating in the extended AO located and confirmed the presence of the enemy. The information provided by the patrols has considerably contributed towards the mounting of 1 ATF Operation 'OVERLORD' due to commence shortly. Also during the battalion change over in May the Squadron has maintained a 1 ATF offensive presence by ambushing and harassing the enemy.</p> <p>2. At this point there ^{are} few patrols that have yet to be 'blooded'. If we are permitted to continue to operate in the extended AO, I see every possibility of further contacts. However it should be kept in perspective that our prime task is reconnaissance and killing the enemy is normally secondary or on occasions supplementary to this. A solution is to give a patrol with a reconnaissance task the opportunity of hitting the enemy at the conclusion of the patrol unless it is imperative that the patrol does not be compromised. If it is decided to deliberately harass the enemy then the patrol becomes a Fighting patrol and is briefed and equipped especially for this task.</p>

Rapelling and Suspended Extraction have not been cleared for use in theatre and are still being discussed by the Commander 1 ATF with the RAAF. The RAAF view is that the winch and Jungle Penetrator are good enough.</p> <p>5. The three weeks training of 30 selected volunteers from the Royal THAILAND Volunteer Brigade in basic patrolling and ambushing (utilising their equipment) was successfully completed on 13 May.</p> <p>6. The new Troop Commander arrived on 12 May (one month after the reinforcement demand was submitted). This troop/patrol commander and a further patrol commander are being withdrawn from the Squadron to go on overseas training in September, which further aggravates patrol manning problems as outlined below.</p> <p>7. In August 20 patrol members are required to RTA. This directly affects 14 of the 15 patrols, and has been brought about by the introduction of NSM in SASR. To slightly reduce the major upheavals in patrols, it has been requested that:</p>

SECRET

At YS 395920 at approx 271520H ptl was engaged from South at range of 20' with a sustained burst of AW Fire. Further AW Fire was directed at ptl from the South. Ptl went to ground in extended formation and returned fire. Fire Fight developed which lasted approx 20 minutes. During the firefight fire was directed at ptl from at least one bunker, an unknown number of AK47s were heard, also one crew served weapon (Believed to be an RLD) During the firefight two grenades were thrown by the enemy and shrapnel wounds were sustained by one ptl member. Owing to the fact that the ptl was unable to ascertain the true strength of the enemy, the large volume of AW Fire being directed at the patrol, and also the requirement to evacuate the casualty the ptl conducted a tactical withdrawal, using fire and movement, to the nearest WINCH point. At YS 395922 at 271629H ptls were extracted by WINCH. During extraction shots were heard close to WINCH points.

M. Additional Remarks by Interrogator

1. The initial LFT strike may have inflicted casualties on the enemy. It provided noise and deception for the reinforcements but at the expense of surprise, which would have been lost had the ptl tried to get closer to the digging anyhow.

NOTICE

MOSQUITO BORNE DISEASES DURING THE WET SEASON

The problem

1. A significant rise in mosquito borne diseases, other than malaria, has occurred in previous wet seasons. Many of these diseases are not serious but nevertheless are incapacitating.
2. Occasionally these diseases are complicated by the development of encephalitis, or inflammation of the brain. The symptoms are characterised by severe headaches, neck stiffness, drowsiness and nausea.
3. On rare occasions, encephalitis will develop as a primary mosquito borne disease known as Japanese B encephalitis.
4. Of the eight cases diagnosed as encephalitis from 1 ATF in the 1970 wet season, two were serious and one was the Japanese B variety. All patients made an acceptable recovery.

Prevention

5. There are no suppressive tablets available for mosquito borne diseases, except malaria, and so measures to avoid being bitten by mosquitoes are extremely important. These are:
 - a. Dress. Shirts with sleeves down, long trousers with feet and ankles covered are to be worn at all hours of the day except that shorts may be worn and shirts removed only when playing approved sport in daylight. You may move directly to and from the showers without complete clothing and be uncovered when beneath a mosquito net. You may roll up sleeves between 0630 and 1830 hours daily.
 - b. Mosquito Nets. Ensure that you spray your net when you erect it, that you tuck it under the mattress and that holes are repaired immediately; or the net changed.
 - c. Insect Repellent. You are obliged to carry a bottle between 1830 and 0630 hours. Apply to exposed skin every three hours.
 - d. Aerosol Spray. Use aerosol knock down spray daily in your tent. Direct it under tables and chairs, your bed, into and behind wardrobes and into dark corners.
 - e. Breeding Areas. Make sure that you have not started your own "mosquito farm" by leaving containers about to collect water, or by allowing water to collect in your tent flaps or in pools on the ground.

Conclusion

6. A concerted campaign to eradicate mosquitoes in Nui Dat, by aerial and ground spray, will be carried out throughout the wet season. But your personal care is the key factor in keeping you out of hospital.

NOTICES

LETTER OF APPRECIATION FROM THE HON MR JUSTICE J.R. KERR, CMG

The undermentioned letter of appreciation to all ranks of AFV. has been received from the Hon Mr Justice J.R. Kerr, CMG:

"Dear General Dunstan,

I am writing to extend our warm thanks for the splendid arrangements you made to enable us to see as much as we did of service life in South Vietnam.

We found the tour and particularly the number of informal discussions we were able to have with a wide range of members of immense value. It has given us a deep understanding of the characteristics of service in an operational theatre and I believe that we are now in a position to come to grips in a much more realistic fashion with our terms of reference.

We should be pleased if you would pass on our thanks to the officers and men under your command for the part they played in making our visit well worthwhile."

Yours sincerely,
(JOHN R. KERR)
Chairman

VISIT OF KERR COMMITTEE

The recent visit by the Kerr Committee was successful, both from the Committee and the Service point of view.

Formations and units are commended for the professional manner in which they briefed the Committee and for the efficient transport, accommodation and reception arrangements made in each area visited.
