- a. Unit Canteen. A ledger system using one folio per item of merchandise is required. Stock on hand is to be shown at the commencement of each day's trading: stock received and stock sold are to be entered daily so that at any time the stock on hand can be spot checked with the ledger figure.
 - b. Sub-Unit Canteens. A daily stocksheets system is to be used. Stocksheets is to show balance on hand stock received and for the subsequent day, stock remaining, thus giving a figure of sales for the previous day. A cost per item column is also required. AAF F72s may be used.
