COMMUNICATIONS REPORT - JAN 67

Point to Point Circuits

1. Circuit Data Summaries - Annexes A to E

2. Rear Link

a. A second transmitter was available wef 4 Jan 67 after complete overhaul, but it was not used regularly due to air conditioner failures in the transmitter building.

b. AN/TCC - 14 over AN/PRC - 25 was successfully used to key transmitters for 3 hours of traffic 2 Jan when keying lines were cut. Construction of a 25 pair cable run from HQ AFV to the transmitter site by a combined Aust/US line crew is nearing completion and should improve the reliability of keying circuits while 4FJ VHF bearers are being installed.

c. Tests of the alternative rear link from VUNG TAU are not producing satisfactory results but will be continued. A R391 and CV157 have been installed at Vung Tau to improve reception.

3. Radio Relay

a. The radio relay system continues to perform well.

b. Following completion of 1ATF COMCEN, one set of TRC-24 and associated eqpt was dismounted from the MRC - 69 at NUI DAT and installed in the COMCEN. The MRC-69 shelter can be returned to normal in less than one hour. Elimination of the tail to the TRC-24 has further improved reliability and circuit control. The combining of SCO and TRC-24 operator functions frees manpower for TRC-24 terminals deployed on ops fwd of NUI DAT. A short course was run on TRC-24 eqpt for 103 Sig Sqn technicians.

4. HF Circuits Except for the continuous requirement for CW comms to the LSM, the medium radio dets have been restricted to secure RTT back-up (KW-7/PRC-47) to the radio relay. There has been no change to the circuits operated ie HQ AFV-HQ 1ATF and HQ 1ATF-HQ 1ALSG. About 16 hours per day RTT and 8 hours per day CW can be expected on these circuits. Circuit testing is being placed on a weekly schedule; between tests, radio operators supplement their local sigcen shifts.

5. RAAF Comms

a. Comms remain satisfactory

b. The telegraph terminal at 1ATF has been relocated in the RAAF Ops room

c. A formal request for a US channel for the PHAN RANG - SAIGON circuit has been submitted (see Annex F). Verbal advice from MACV J6 is that restoration priority 2E will be approved for this circuit.

d./

SECRET

AUSTRALIAN WAR MEMORIAL RCDIG1030125

d. Frequencies are being sought for a CW/Voice circuit PHAN RANG-BUTTERWORTH, to be opened by RAAF.

Area Comms

6. Traffic volume graphs are at Annexes G and H

7. 1ATF COMCEN was completed and became operational 21 Jan except for the cipher office which will be completed Feb 67

8. See OC 103 Sig Sqn's DO at Annex I

9. The off-line cipher office in HQ AFV sigcen was completed and came into use 25 Jan (off line encryption was previously done in the relay centre)

Tactical Comms

10. See Annex I

11. SAS Comms Difficulty in obtaining good frequencies (relative to AN/PRC-64 power) remains a problem, but this is now the subject of COMUSMACV's personal interest. An R391 was loaned to 3 SAS and resulted in a significant improvement in reception compared with use of the R5223 or PRC-64 at the base station. Masts to build the base station antenna system are expected ex JEPARIT Feb 67.

Eqpt Maintenance

12. Fault rates remain high on AN/PRC-47, ONAN generators (most eqpts have had to be worked beyond the 1500 hrs when base overhaul was due), KW-7 and tele K. Telegraph eqpt failures have reduced, probably as the result of cooler weather.

13. The maintenance support provided by US sources for AN/PRC-47 is excellent and worthy of note. Similar standards of support will probably be available for AN/GRC-106.
