"WOUNDED"

"The above is suffering from shrapnel wound of the abdomen and back. The wounds are deep and involve the colon in the left-loin, where there is a faecal fistula. The wound in the back involves the Sacrum and several pieces of bone some quite large have been removed from the upper part of the sacrum where there is also a faecal fistula. His general condition - considering the severity of his wounds is quite satisfactory and latterly the bowels have acted in a natural manner. Up till lately all evacuations have taken place through the colotonny wound in the loin. He is improving though still seriously ill.

Re. Pte Easterling F.G. 3523 F.A. A.I.F.

This Patient's general condition has slowly and steadily improved. Several pieces of necrosed bone have been removed from the upper part of the Sacrum where there is a gun shot wound and fecal fistula. He is still very ill but on the whole better than at the time of the last report.

23rd Jan 1915.

Dear Sir,

We have been requested by our Australian Bureau to obtain a bulletin and ascertain the nature of the ~~sickness~~ or ~~wounds~~ progress of 35-23 Pte Easterling (F.G) a.f.a A.I.F.,

who was admitted to your hospital 28-9-16

We should be most grateful for any particulars you can supply.

We regret having to trouble you in the matter, but are desirous of allaying the anxiety of the relatives so far distant in Australia.

Yours faithfully, UNA

Jar The Secretary.
