Major Daniel
Aston LUXTON

When in the trenches in the LEEMHAIN sector Major Luxton by organizing patrols completely gained an ascendancy over "No Man's Land" and by effective use of his snipers kept the enemy in check and maintained this offensive spirit throughout. During operations at POULIS he was conspicuous for his good work as a Company Leader. During period 18/21 August his work in our right sub-sector was invaluable and although suffering from the effects of enemy gas shells he continued on duty till his company was relieved when it completely collapsed. His work throughout the campaign has been conspicuously good.
