At HERLEVILLE on 18th August, 1918, during minor operations this man was No.1 on a Lewis Gun. During the advance he showed great coolness by walking in front of the attacking wave firing his gun from the hip. Arriving at the objective he was the first to enter the enemy trench and in the face of heavy opposition used his gun with good effect.

At HERLEVILLE, East of AMIENS, during the attack on 18th August, 1918, this N.C.O. had charge of a Lewis Gun.

Soon after leaving the Jumping-Off Tape his Company came under heavy fire. This N.C.O. at once moved in front of the platoon and with his Lewis Gun opened fire on the enemy Machine Gun positions. He continued to advance firing from the hip. At about 25 yards from the objective he rushed forward to a small mound and brought his gun into action. In spite of the fact that bombs were thrown all round him he remained in position firing his gun until the Company had completed its movement. The determined and gallant action of this N.C.O. and his skilful handling of his Lewis Gun undoubtedly saved many casualties to us and accounted for many of the enemy. (Signed) Charles ROSENTHAL.
