

FEATURES

- Anodized Extrusion ● Actual cut lengths of 3m, 4.5m, 6m
- Built in offset for 45° on right hand side ● Extension arm (for cutting less than 300mm) supplied as standard ● Large knobs for ease of setting stops ● Precise machining eliminates the use of nylon bushes in the micro adjust stop

MANUAL LENGTH STOP SYSTEM

Manual length stops can be used in conjunction with Brobo saws, mounted to roller conveyor frames (factory fit) or supplied loose (field kit). This is a cost efficient way to achieve accurate cut to length components.

Field Kit

Standard equipment includes:

- Aluminium extruded rail
- Tape
- Micro adjustable flip over stop
- Mountings to suit roller conveyor
- Extension arm for cutting less than 300mm

Part No: 3.0 metre 9511420
4.5 metre 9511430
6.0 metre 9511440

Factory Kit

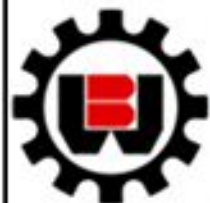

Standard equipment includes:

- Aluminium extruded rail mounted to roller conveyor
- Tape
- Micro adjustable flip over stop
- Extension arm for cutting less than 300mm

Part No: 3.0 metre 9511450
4.5 metre 9511460
6.0 metre 9511470

Optional Accessories

- Standard single stop
- Micro adjustable stop
- Adjustable stands
- Roller conveyor - 1.5, 3.0, 4.5, 6.0 m
- Rollers - steel
