

GOLDCORE LIGHT

SUPER LIGHT PLYWOOD

THE NEXT GENERATION IN LIGHTWEIGHT PLYWOOD

Goldcore Light is revolutionary plywood that's taking lightweight plywoods to a new level. Lightweight and of multiply construction, it offers flatness and stability. Goldcore Light is a superior-quality plywood ideal for wall linings, head linings, domestic and commercial furniture, marine and RV cabinetry.

When you use Goldcore Light you can feel the difference. Not only is Goldcore Light super lightweight at 400kg/m^3 , it is made of quality materials to highest standards. It offers properties of stability and flatness through even core thickness and thick faces. Yet Goldcore Light is a multiply and still retains its lightweight advantage.

See for yourself. It's no wonder Goldcore Light is fast becoming the new standard in interior fitout plywood.

WHY GOLDCORE LIGHT SHOULD BE YOUR FIRST CHOICE IN PLYWOOD

- Superior-quality A-grade plywood manufactured to BS1088 (LW) standards.
- Up to 38% lighter than standard construction plywoods.
- Thick 1mm face and back free of defect.
- Mulipty core for stability.
- Although light at 400kg/m³, has a strength rating of F7.
- Sanded faces ready for clear finishing, painting or overlaying.

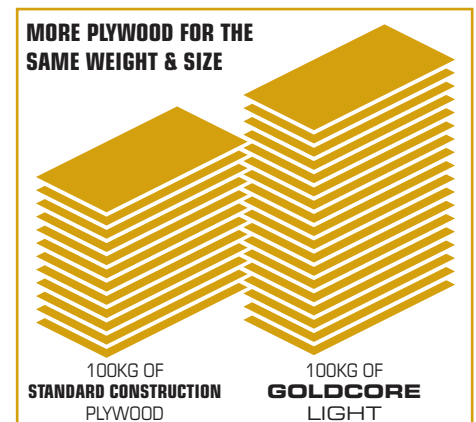

Specifications

Description: Superior-quality lightweight plywood. Natural, peeled veneer, producing a lightweight stable flat panel.

Grade: 'A' grade, BS1088 (LW) marine certified.

Size: 2440mm x 1220mm.

THICKNESS AND WEIGHT				
GOLDCORE LIGHT			ORDINARY PLYWOOD	
THICKNESS	NO. OF PLYS	WEIGHT	NO. OF PLYS	WEIGHT
6mm	5	7.0 kg	3	9.0 kg
9mm	7	11.0 kg	5	13.9 kg
12mm	9	14.9 kg	5	19.4 kg
15mm	11	17.8 kg	7	25.0 kg
18mm	11	19.5 kg	9	31.2 kg
22mm	11	24.4kg	9	36.3 kg

Colour: Mid-brown/pink faces with golden core.

Texture: Even medium texture with slightly grainy, semi-lustrous surface.

Density: Average 400kg/m³.

Strength: F7.

Gluing: Marine plenolic formaldehyde resin, WBP of 72 hour boil test.

Durability: Non-durable. However, it must be noted that exterior grade marine products are not required to be naturally durable and thorough sealing with preservative compounds, paints or resins is the normal trade practice and is necessary in all exterior or marine situations. Lightweight plywoods by density equate to lower strengths requiring use in non-structural applications.

Goldcore Light is the next generation in lightweight plywood. To request a sample or find out more, please get in touch with your Goldcore Light agent. Their details are on the right.
