

HOW TO UPLOAD YOUR VIDEO TO YOUR EMAIL FOOTER

For Apple Mail Accounts

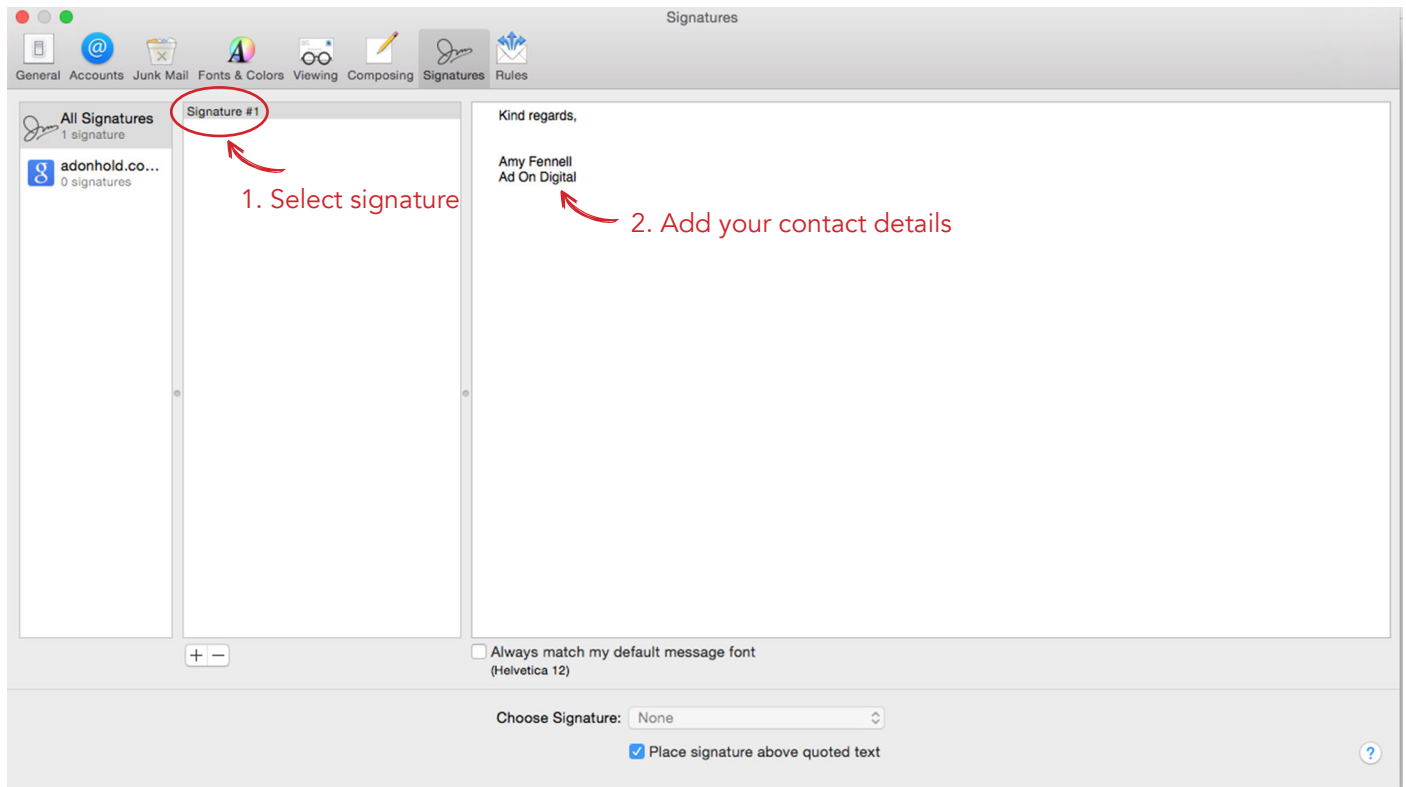

1. We've emailed you a 'still image of your video', along with a web link to your video. Please save your 'video still image' onto your desktop.
2. Next, go into Apple Mail, click 'Mail', then select Preferences.

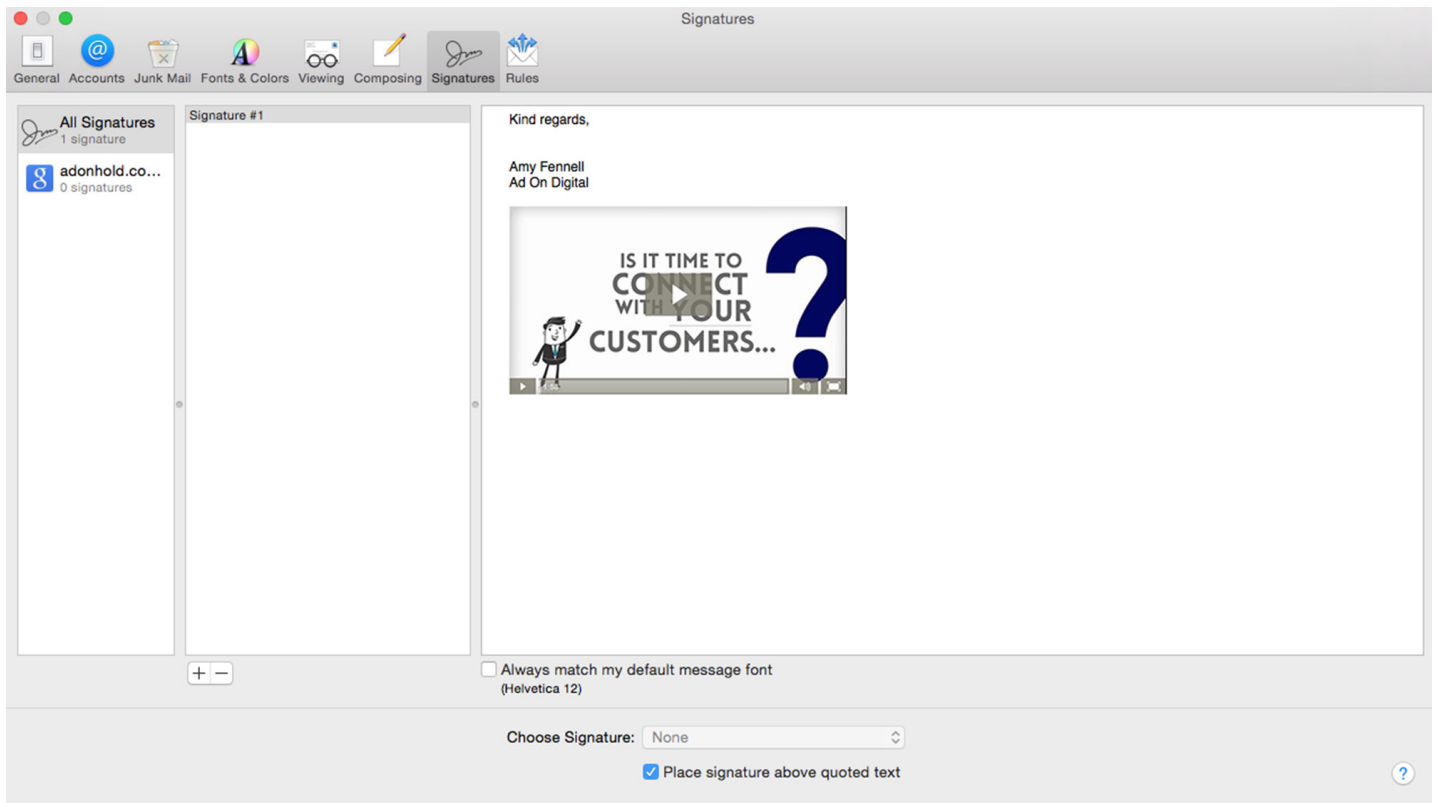

3. Click 'Signatures', then click '+' to create a new signature.

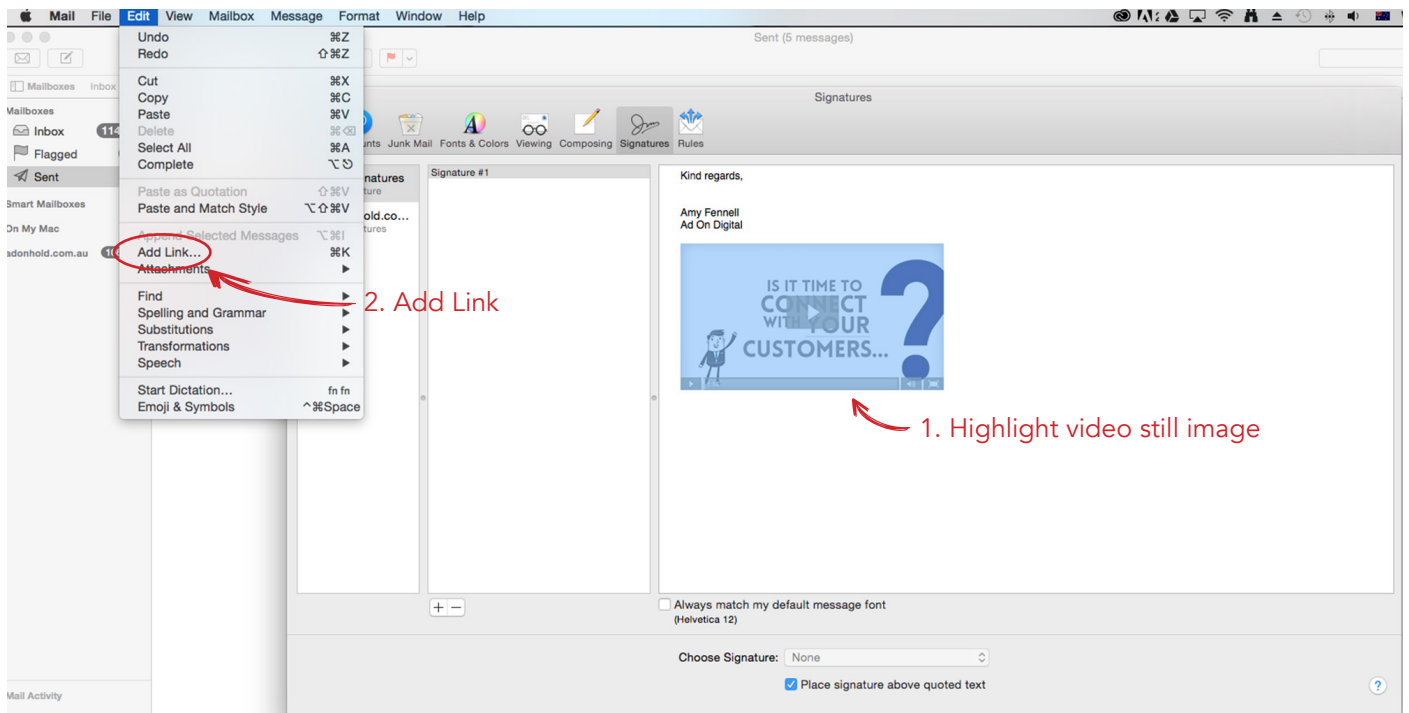

4. Select the signature you just created and add your contact details in text box to the right of it.

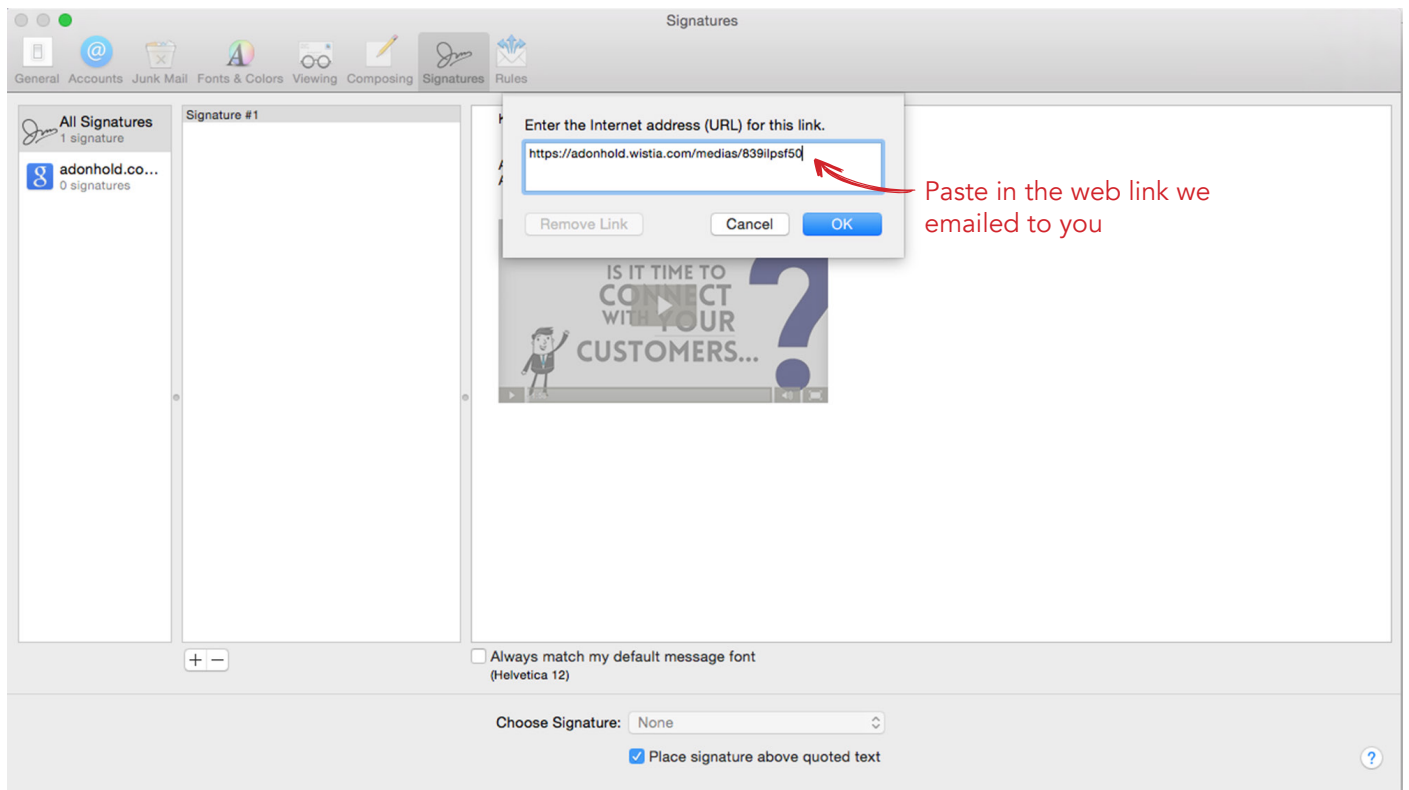

5. Next, copy and paste (or click and drag) the video still image - so it sits underneath your contact details.

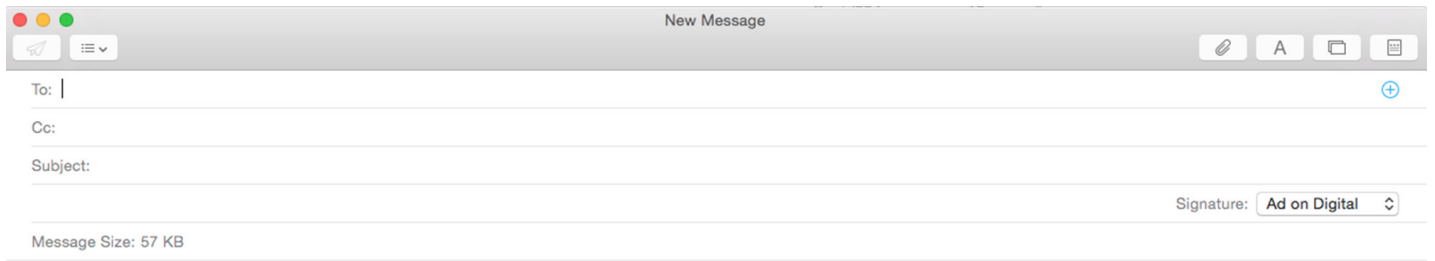

6. Highlight the video still image. Go to 'Edit', then select 'Add Link'.

7. Copy the web link we emailed to you and paste it into here. Click OK.

8. Then send a test email to yourself (ensuring you select the signature you've just created. In this example our signature is named 'Ad On Digital').

Kind regards,

Amy Fennell
Ad On Digital

9. Congratulations! You've just embedded your awesome video into your Apple Mail signature. Mission complete.
