

Minimum Hardware & Software Requirements

Outlined below are the minimum hardware and software specifications for accessing Class applications, including client view from any device.

Whilst the Class application runs in a browser you must use a machine that equals or exceeds the minimum hardware specification to achieve performance levels.

Hardware	Minimum ^[1]	Recommended
Processor	Intel 6 th Generation processor (or equivalent) Intel i3/i5/i7/i9	Intel 8 th Generation Processor (or equivalent) Intel i3/i5/i7/i9
RAM	4 GB	8 GB or better
Display	1024 x 768, 24-bit colour, or 1280 x 720, 24-bit colour	1920 x 1080, 32-bit colour (or better) DirectX 9 or later

Browser	Minimum	Recommended ^[2]
Microsoft Edge		Latest Stable Version
Google Chrome		Latest Stable Version
Mozilla Firefox		Latest Stable Version
Safari^[4]		Latest Stable Version

As the Class application is a cloud application it requires good internet connectivity to achieve performance levels.

Networking	Minimum	Recommended
Internet Connection	Reliable Broadband Internet	Wired/Fibre Broadband; ADSL2+ or better.

Class supplies a number of utilities (e.g. Excel Fund Loader, Excel Transaction Loader and the BGL2TMS transitions tool) that have the following Excel requirements based on the operating system of the device being used. To use the Class utilities, you must enable Macros within Excel

Operating System	Minimum	Recommended
Windows 8	Excel 2010	Excel 2013 or later
Windows 10	Excel 2010	Excel 2013 or later
Mac OS X	Not Available	Not Available

If you are using the **BGL2TMS** tool to transition your funds from BGL to Class you will need the latest .NET framework installed and you may need to enter Proxy Server details to allow access to <https://tms.class.com.au>.

- [1] The Class application may run on a lower specification machine, but such a configuration is neither supported nor recommended.
- [2] Recommended Browsers means that these browser versions are routinely tested as part of our regular testing process.
- [3] Internet Explorer Compatibility Mode is not supported.
- [4] Safari is only supported on Mac OS X and iOS platforms, not on Windows OS.
