

BALUSTRADES AND HANDRAILS

Stainless Steel Wire Balustrades

General Description:

Stoddart stainless steel wire balustrades and handrails are designed and manufactured to the highest Australian standards, which means that quality and safety are standard features.

Our stainless steel wire balustrades and handrails have been providing solutions for local councils, architects and large scale construction contractors, to name a few.

From the initial site inspection to the final installation, we make certain our balustrades and handrails are manufactured to exact specifications and adhere to approved building and fire safety regulations.

Manufactured to the highest standards, our balustrades and handrails provide buildings with a safe and reliable exit.

Stoddart balustrades and handrails are available in a variety styles and finishes, for your requirements contact Stoddart Architectural Metalwork on +61 73440 7600
