

Stoddart Town & Park's reputation for high quality workmanship and bespoke outdoor furniture solutions is well known within the industry, and perfectly on display with our contribution to the Bendigo Hospital Project.

Working on behalf of Ace Contractors, Stoddart Town & Park took designs produced by Oculus landscape architects and brought them to life, supplying a wide range of custom furniture and architectural metalwork throughout the grounds of the new hospital. These products include concrete plinth mounted seating and table settings, metal and timber architectural screens, as well as various standard products.

The success of large scale projects - particularly in remote locations - is only possible with expert project management on top of smart design and quality manufacturing; all of which Stoddart pride ourselves on to deliver great outcomes for our clients.
