

MAJOR PROJECT

ROBERT ST DEVELOPMENT TOWN&PARK

Town & Park were approached by Ace Contractors in Melbourne to design and manufacture three custom seats for the former Yorkshire Brewery development in Collingwood. The architecturally-inspired products are situated in a laneway in front of the new apartment complex, and were required to be developed with the material palette of the building behind in mind.

Featuring hardwood timber slats, an aluminium sub-frame, and precast concrete bases, the seats perfectly blend into and compliment their environment. This project also highlights Town & Park's focus on quality, detail, and exceeding client expectations in delivering innovative outdoor furniture solutions.
