Carbon Neutral Adelaide

Making the City of Adelaide a carbon neutral city

Carbon Neutral Adelaide is our community's shared ambition to work together and make the City of Adelaide a carbon neutral city. To achieve our goal, as individuals and as a community we need to rapidly reduce our carbon emissions.

Adelaide and the South Australian community are international leaders in climate change action. Our achievements include rapidly expanding our renewable energy generation, minimising waste to landfill, and our City/State partnership which is committed to the achievement of bold, ambitious carbon reduction targets. This will strengthen the City of Adelaide's reputation as a smart, green, liveable and creative city.

Through collaboration, inspiration and transformation, our new Campus Sustainability Plan will transition the University towards low-carbon operations and contribute to the long-term sustainability of our state.

Bruce Lines,
Chief Operating Officer
University of Adelaide

We are acutely aware of the emerging impacts of climate change and our responsibility in taking action in the interests of our clients, staff, volunteers and the broader community. The process of becoming a carbon neutral organisation has led to significant operational savings, improved efficiencies and positive recognition for the leadership we have taken. We are proud of our investment in the future of Uniting Communities, the South Australian community we serve and our planet.

Simon Schrapel,
Chief Executive,
Uniting Communities

Join us

To achieve our goal of making the City of Adelaide carbon neutral, we need dedicated and passionate partners. Partners who can provide leadership and encourage others to also take action.

The Carbon Neutral Adelaide partner program empowers a diversity of stakeholders in our city community to take practical, positive bold action for the City of Adelaide.

Together, we can work towards our shared ambition to make the City of Adelaide a carbon neutral city.

Carbon Neutral Adelaide will provide a platform to attract investment to the city and the state and create opportunities for local business, innovation and new industry potential.

Become a Partner of Carbon Neutral Adelaide

The Carbon Neutral Adelaide Partner Program is open to any entity that is committed to taking significant actions to reduce carbon emissions, whether that's in an organisation, for clients or for the community.

If your organisation is located within, services, visits or interacts with the City of Adelaide community you are eligible to become a partner.

What is the commitment?

Your organisation commits to actively contribute to our community's shared aspiration for the City of Adelaide to become a carbon neutral city.

Why become a Partner?

The Carbon Neutral Adelaide Partner Program celebrates all areas of community leadership.

Partners are recognised for their contribution and commitment to the City of Adelaide community. Together we showcase your organisation's capacity to embrace the productive and carbon reduction advantages of technological change, sustainable business practices, high performance work environments and entrepreneurial endeavour. Carbon Neutral Adelaide Partners are inspiring others to follow.

Partners will be permitted to use the Carbon Neutral Adelaide branding.

How to become a Partner of Carbon Neutral Adelaide

To be recognised as a Partner of Carbon Neutral Adelaide, we will need your organisation's corporate information, logo, information on why you support Carbon Neutral Adelaide and what you are doing to reduce carbon emissions.

Please contact info@carbonneutraladelaide.com.au or visit www.carbonneutraladelaide.com.au

A nighttime photograph of a city street featuring a tram. The tram is blurred, moving from left to right. People are waiting on the platform. In the background, there are illuminated buildings, including a prominent one with classical architectural features. The sky is dark blue.

Through considered architectural design, we are supporting our clients to tackle climate change, achieving projects with reduced carbon emissions and mindful use of finite natural resources. At our own city office, we have incorporated solar panels, battery storage, achieved a 5.5 NABERS energy rating and are a member of City Switch Green Office. We encourage others to follow our lead.

Simon Thomson,
Director, Thomson Rossi

Addressing climate change will improve outcomes for health, social stability and the environment, here and around the globe. We advocate for urgent transition to wind and solar power for cleaner, quieter, and healthier cities; for community planning to increase resilience during extreme weather events; and greening our cities for physical and mental well-being, fresher air and less-severe heat island effects. For healthy people, we need a healthy planet.
