

Works Notice

March 2021

Update - Roma Street station site: existing stormwater main relocation

Due to recent wet weather and site conditions, relocation of the existing underground stormwater main in Roma Street will continue to late April 2021. Additional weekend work is required. Please see overleaf for more information about the scheduled weekend work.

Access to properties, the existing rail and bus stations and vehicle movements on Roma Street will be maintained at all times.

Map: Temporary traffic and pedestrian changes required during night and extended weekend periods in Roma Street.

Work details

To minimise disruption for pedestrians, vehicles and the surrounding community, the underground stormwater main will be installed using a microtunnelling methodology. Activities as part of this work will involve:

- Delivering plant and equipment to the construction sites
- Implementing temporary traffic control
- Investigating existing underground services
- Excavating and concreting shafts within the Roma Street station construction site and westbound lanes on Roma Street
- Using a boring machine to excavate the new underground stormwater main alignment
- Using hydraulic equipment to push the new underground stormwater main through the new alignment
- Removing excavated material from the worksite with trucks
- Constructing new manholes and reinstating a section of road surface on Roma Street once all work is finished.

Please refer overleaf for information about the required temporary traffic and pedestrian changes, night and extended weekend work periods and what to expect during the work.

Work hours

Work within the construction site will continue to be undertaken during standard construction hours, Monday to Saturday 6:30am to 6:30pm.

Work will also be undertaken at night between 6:30pm and 6:30am due to traffic permit requirements and for the safety of our workers.

Weekend work

To minimise ongoing night work and complete the work as efficiently as possible, extended weekend work periods are required. Please see the table below for more information about weekend work.

Additional notification will be provided to adjacent residents prior to night work and extended weekend work periods.

Location	Date and hours of extended weekend work periods*	Type of work
Roma Street between Makerston and George Streets.	<ul style="list-style-type: none">8pm Friday 26 to 4am Monday 29 March 2021 <p>Additional dates and times required:</p> <ul style="list-style-type: none">8pm Friday 9 April to 4am Monday 12 April8pm Friday 16 April to 4am Monday 19 April8pm Friday 23 April to 4am Monday 26 April	<ul style="list-style-type: none">Excavating and concreting a shaft on Roma StreetInstalling a new precast stormwater pitBackfill and reconstruction of Roma Street surface. <p>The work area on Roma Street will be temporarily reinstated at the end of each night shift and extended weekend work period to allow all lanes to be reopened to traffic outside of work hours.</p> <p>Permanent road surface reinstatement work will be undertaken once all stormwater main relocation work is completed.</p>

*Work hours and timing for implementation of traffic changes will be adjusted to suit Suncorp Stadium and other local events.

Temporary traffic and pedestrian changes at night and on weekends

To maintain access at all times, the following temporary traffic and pedestrian changes will be in place in Roma Street and the surrounding area during night work and extended weekend work periods:

- Changed traffic conditions and reduced lanes on Roma Street, George Street, Herschel Street and Makerston Street. Access will be maintained in all directions under traffic control. Access to properties will be maintained.
- Closure of the eastern Roma Street pedestrian crossing at Makerston Street during night work and extended weekend work periods. The western pedestrian crossing will remain accessible throughout the work.
- Access to the existing Roma Street rail and bus stations will be maintained at all times.

Traffic control and signage will be implemented to assist motorists and pedestrians around the worksite at this time.

What to expect

- Construction activity with potential for increased noise, dust, vibration, truck movements and workers. These impacts will be reduced as much as possible.
- Construction impact mitigation activities such as street sweepers and water trucks for dust suppression around the work areas.
- Temporary traffic and pedestrian changes on Roma Street and the surrounding area. Please plan your journey and allow additional time if travelling through the area.
- Work is subject to relevant approvals and suitable weather conditions.
