

Works Notice

June 2021

Boggo Road construction update

This month's construction update focuses on the new Boggo Road station. Station box excavation and tunnelling works continue as work to build the permanent structure begins.

Construction activities

In June, Boggo Road station construction will include:

- Excavation and earthworks within the station box
- Installing anchors, soil nails, shotcreting and ground support in the station box
- 24/7 tower crane operation to construct the station and support tunnelling activities
- Transporting machinery, equipment and materials to and from the worksite
- Installing steel reinforcement and concrete for the station structure
- Excavating the tunnel cavern located at the north of the station box and 24/7 tunnelling activities.

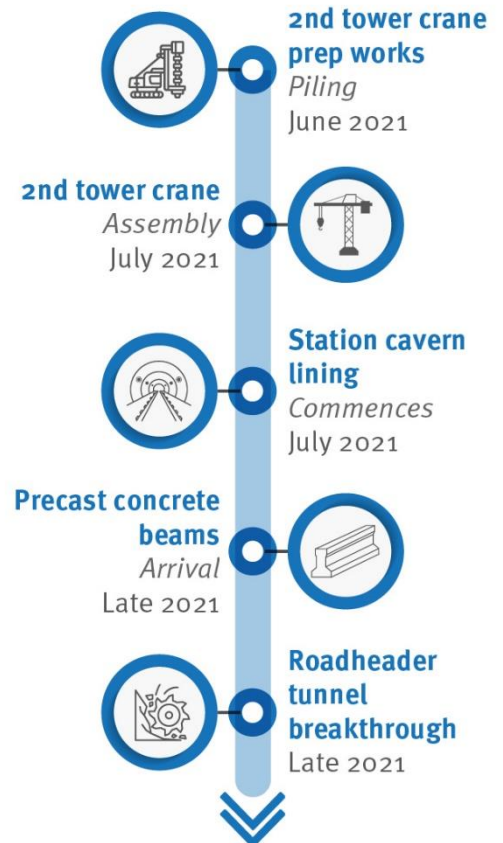

We will also:

- Commence tower crane preparation works
- Undertake piling at the southern end of the station box.

Tower crane assembly

Preparation works will start in June to install a second tower crane located at the southern end of the station box. This crane will facilitate key construction activities for the new Boggo Road station.

Preparation works for this crane installation will mainly occur during normal construction hours and will include pile pad construction, piling, installing reinforced steel and pouring concrete.

Tower crane assembly will start in mid-July. Please note this is subject to final approvals and weather conditions.

Weekend work in the rail corridor

Works will be undertaken within the rail corridor over a full weekend closure from Saturday 19 June to Monday 21 June.

These activities will occur outside of normal construction hours. More information on these activities will be provided prior to works commencing. If you travel by train, plan your journey at translink.com.au or call 13 12 30

What to expect

During works, you may notice:

- General construction activity including the use of heavy machinery
- An increase in noise and dust from construction activities
- Temporary lighting towers, directed away from residential properties
- Construction vehicles and trucks transporting equipment and materials to and from the worksite
- Temporary changed pedestrian access and traffic conditions including lane closures on Railway Terrace and near Kent Street
- Construction impact mitigation activities such as street sweepers, water carts and fencing installation.

Construction out of hours

Standard construction hours are between 6.30am to 6.30pm, Monday to Saturday.

Out-of-hours work may also be required due to construction methodology or to reduce impact to drivers from lane closures, and for the safety of the community and our workers. Out-of-hours activities in June include:

- Delivery of construction machinery, equipment and materials to and from site
- Concrete pours and related deliveries
- Excavation and building the station box foundation
- Ongoing use of the tower crane
- 24/7 tunnelling activities
- 24/7 works within the rail corridor over weekend closures.

When required, additional notification for out-of-hours works will be provided. You can subscribe to receive updates from Cross River Rail by visiting our website.
