Be heard. Have your say.
Join the BioCeuticals Expert Panel!

As member of our BioCeuticals Expert Panel, you will become our fountain of practitioner and professional knowledge! You will help guide and inform us as we implement some important initiatives over the next 12 months.

**These key initiatives will be built by you, for you and your peers.**

As a member of this Panel, you may be contacted to contribute to workshops and information events; some in person, and some via phone/web. Your feedback will help advise and provide valuable input on many aspects of the upcoming BioCeuticals range of products and services. Members will be called upon based on their modalities, locations or years of experience - dependant on the need of the project at the time.

**What if I can't make it?**
You are not under any obligation to attend or take part in events - just let us know that you can’t make it and, hopefully, you’ll be able to join the next opportunity.

As a Panel member, we encourage you to be as active and responsive as possible. And, if you decline to participate in three consecutive requests, we will ask that you excuse yourself from the Panel. If for any reason you want to be removed from the Expert Panel, please advise us at: marketing@fit.net.au.

**How much time will it take?**
Every workshop will be different. You will be given all the information you need upfront when invited to attend/take part. If you can attend, great! If not, opt to participate in another workshop down the track.

**What's in it for me?**
As part of the Expert Panel, you will be given the opportunity to network face-to-face at workshops with like-minded professionals in your field. The workshops are lots of fun and some may have other incentives attached.

**What's next?**
As part of this Panel, you have become an integral part of BioCeuticals' product offerings to practitioners and you will be helping to develop your business as a practitioner. You will be contacted in the near future and invited to attend your first workshop.

Thank you again for becoming a part of the BioCeuticals Expert Panel; we look forward to working with you very soon!

Yours in health,

The BioCeuticals team
