*GROWING THROUGH GRACE; LEARNING THROUGH LOVE*

## One-to-One Programme

Year 4 to 11 in 2018

Year 4 to 12 in 2019

# One-to-One Programme

## Overview

In our quest to provide a rich learning environment, where academic achievement is a priority, we are pleased to announce our updated One-to-One programme for 2018.

In 2017 we undertook a pilot programme with Year 10 and the success of this has informed our decision to extend this to Middle School and Junior School in 2018. Students entering Year 4, Year 7 and Year 10 in 2018 will be supplied with a new school-owned, pen equipped, tablet computer (Microsoft Surface) to be used at school and at home primarily to support the curriculum. They will retain this device throughout the next three years whilst enrolled at the School.

As the programme rolls out in 2018 students entering Year 8 and Year 9 in 2018 will be issued with an existing School-owned Surface Pro 4 computer. Year 8 students will retain this device throughout the next two years and students in Year 9 will retain this device for 2018 only.

In Junior School we have had several years successfully working with BYOD Apple iPad technologies enabling the introduction of mobile and touch computing. In 2018 we will be introducing the Microsoft Surface technology to Year 4 under the One-To-One Programme allowing us to combine the benefits of a tablet computer, with the functionality of a traditional laptop. Teachers and students will still have access to iPad technologies for specific learning opportunities. Students in Year 5 and 6 will continue to use their own iPad plus have access to a larger fleet of surface devices.

The All Saints One-to-One Programme provides parents with a solution to their child's computing needs as the computers are:

- equipped with all the software required, including updates and upgrades.
- designed to seamlessly connect to the School's IT network both at school and at home\*, and can access all the resources.
- fully supported onsite by the IT Team.
- under warranty against any hardware faults for the life of the Programme.
- covered by accidental damage insurance as specified in the One-to-One contract.

In addition, the All Saints One-to-One Programme is in line with the school strategy to ensure that students have the best possible device for learning, teachers have a predictable platform to work with in class, giving them the confidence to utilise the many off and online learning objects during their lessons, and the school shares the financial responsibility of technology with parents.

The One-to-One Programme will be constantly reviewed to ensure that the tools selected are the most appropriate to support a modern teaching and learning environment, allowing students to be the best they can be and supporting teachers in this endeavour.

\*Junior School devices will remain at school

## Device Information

After significant research for a suitable device, the School selected Microsoft's Surface Book for Middle and Senior School; and Microsoft Surface Pro for Junior School, which is a revolution in laptop design. The detachable 13.5" (Book) and 12.5" (Surface Pro) PixelSense Display is optimised for and includes a digital pen and touch, and has higher resolution than any other mainstream computer available today. With the full power of a high performance laptop and the versatility of a tablet, the devices will give our students and teachers everything they need to work with professional-grade software, anywhere they want.

The package which includes the device, protective case, warranty, software, accidental damage cover and the pen is approximately \$3600 for the Surface Book and \$3000 for the Surface Pro in terms of retail value. However, the School is subsidising this investment in a significant way. Total cost to parents will be as follows:

### Costs – New Devices (Year 4, Year 7, Year 10)

For parents with a child commencing in Year 7 or Year 10 in 2018, the proposed total cost will be \$1200 (six \$200 per semester payments over three years).

For parents with a child commencing in Year 4 in 2018, the proposed total cost will be \$750 (six \$125 per semester payments over three years).

### Costs – Existing Devices (Year 8, Year 9)

For parents with a child commencing in Year 8 in 2018, the proposed total cost will be \$300 (four \$75 payments over 2 years); this will help to cover the additional costs involved in preparing the devices for home use (hitherto they have been confined to on-site use).

For parents with a child commencing in Year 9 in 2018, the proposed total cost will be \$150 (two \$75 payments over 1 year).

## Device Deployment

The new devices designated for Year 4, 7 and 10 will be delivered directly to the School. At this time, our IT staff will image all machines to ensure software is consistent. The devices will be connected to the School's wireless network, and serial numbers for the device, stylus and power supply will also be recorded for security purposes.

Students will then be issued with their Surface device when classes commence in the new academic year. A similar process will occur for Year 8 and 9 students being allocated an existing Surface Pro 4.

## One-to-One Programme Contract

Before a student is issued with a school device, the One-to-One Programme Contract must be signed by both the student and the parent/guardian, and returned to the School; and the student must attend a One-to-One Programme briefing session; these will be held in the first weeks of the academic year.

Students and parents/guardians must carefully read the contract prior to signing it. Any questions should be addressed to the School for clarification before the contract is signed.

In signing the contract, parents/guardians acknowledge they have read, understood, and agree to all of the terms and conditions outlined in the contract. The One-to-One Programme Contract is **available at the following link** under 'All Saints One-to-One Programme'.

## Device Specifications

Microsoft Surface Book (Year 7, 10)	Microsoft Surface Pro 4 (Year 8, 9)	Microsoft Surface Pro 5
Intel Core i5, 128GB SSD, 8GB RAM, 13.5-inch touch screen, Surface Pen. Full technical specifications can be found <a href="#">here</a> . ## Software

All software listed below **will be provided without any additional charge** by the School under our existing licensing agreements. All software must be installed by the School as part of an image on all devices, and will only be installed on this make and exact model. Software is not transferable and cannot be made available for families to install on any other device (with the exception of the Microsoft Office Professional Suite which can be downloaded and installed on a total of five devices) to be compliant with our licensing agreements.

All student devices in the All Saints One-to-One Programme will contain the following base productivity software applications. These four applications represent a total retail cost of approximately \$1500 over the three-years of the One-to-One Programme.

Basic Productivity Software Applications	Free Software part of the image on the device
Windows 10 Education Edition Microsoft Office Professional (2016/365) Adobe Creative Cloud Adobe Acrobat DC Pro	OneNote Class Notebook, iTunes, Active Inspire, Google, Audacity, Chrome, Image Resizer, Office Mix, Pasco Capstone, Pasco Spark-Vue, Photo Story, VLC Media Player

In addition, any subject-specific software applications will be installed at no additional cost. Depending on licensing conditions, some of the applications may only be installed while the student is actively enrolled in the subject and will be removed at the completion of the subject.

## Further information

A comprehensive list of 'frequently asked questions' can be found at: [click here](#). If you have any further general questions or concerns about the One-to-One Programme, please contact:

Mrs Amanda Worley, Head of ICT (Pedagogy) [aworley@asas.qld.edu.au](mailto:aworley@asas.qld.edu.au) or 5587 0300
