

DC ROBOTICS CLUB

16 February 2016

Dear Parents/Carers

Your son/daughter has expressed interest in joining the Dominic College Robotics Club that meets every Friday from 3.30-5pm in Computer Room 3 (at the back of the library). The DC Robotics Club is open to students in Years 5 through to Year 10.

There are a number of fantastic Robotics competitions that students could enter such as Robocup and First Lego League or they might just like to learn robotics and have fun with some of our own in house challenges. Last year our Year 5/6 First Lego League team were very successful and travelled to Sydney to compete in the National FLL competition. Robotics can open up some great opportunities for students and teaches them excellent lifelong skills such as problem solving, project management and teamwork.

On Friday afternoons students will need to bring an extra snack for afternoon tea and come to the K-6 Library door. They can be picked up from the K-6 Library door (along the verandah from the main steps to the 7-10 building) at 5.00pm. Students will need to bring signed permission slip to stay after school on Friday.

I look forward to seeing the students on Friday. Please contact me if you have any further questions about the Robotics Club. I will need the attached permission slip returned to me via the classroom teacher no later than **Friday 19 February**.

Yours sincerely

Mrs Selina Kinne
Director of Teaching and Learning, Head of Technology & App Studies
