

Instructions for Connecting to the Marist College WiFi Network using an iPad

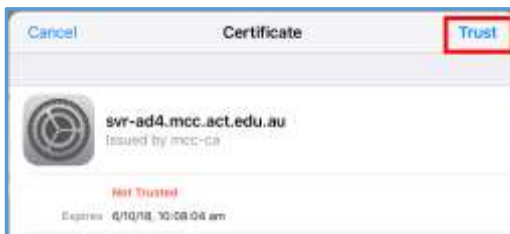

From the list of available networks, select **MCC**

On the following screen, enter your regular College **username** and **password**

You will be asked to **Accept** a certificate.

You should be taken to a webpage (or it will appear when you first try to access the Internet). Click on the **Install Certificate** button (highlighted below)

You will be prompted to install a profile. Click on the **Install** option to proceed.

You will be prompted to enter your **Passcode** here

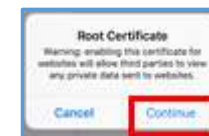

Note, by accepting this certificate your Internet browsing and other traffic may be monitored even though this is a personal device.

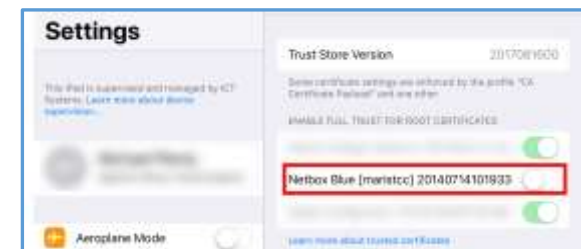

You should see a Profile Installed message. Click **Done**.

Acknowledge the Root Certificate installation by clicking **Continue**

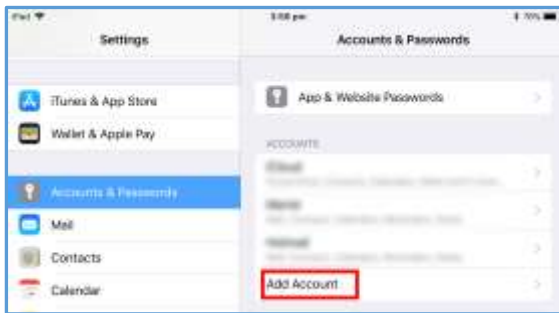

Go to **Settings > General > About > Certificate Trust Settings** and **enable** the newly installed certificate

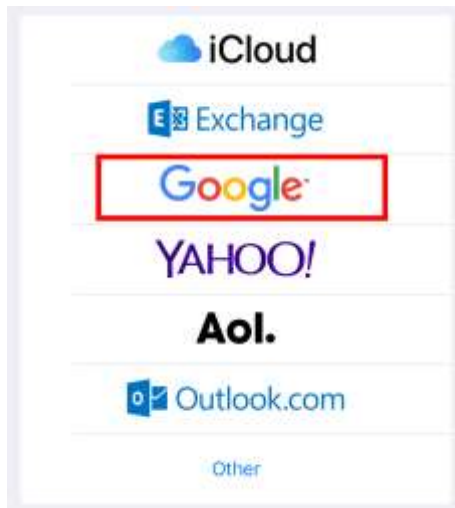

Instructions to Connect your College Email to your iPad

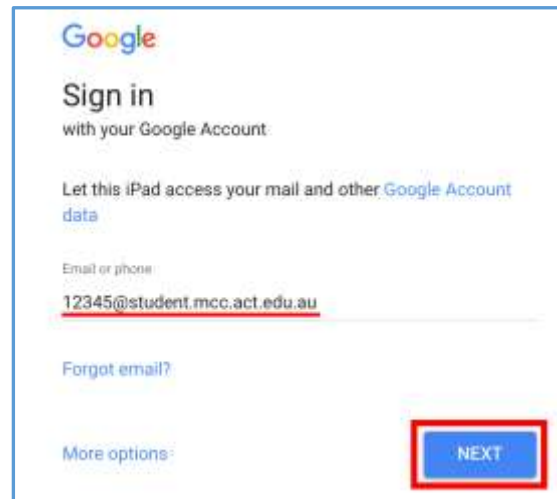

Go to **Settings > Accounts & Passwords** and
select **Add Account**

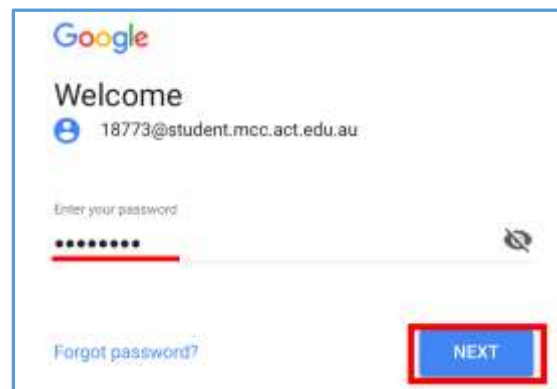

Select **Google** from the list of available
account types

Enter your student **email address**, which is in
the format 12345@student.mcc.act.edu.au,
and click **Next**

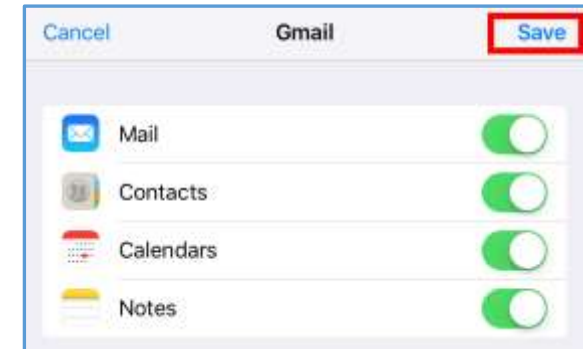

Enter your College **password**

Select the options from **Mail, Contacts**
Calendars and **Notes** you wish to synchronise.

Select **Save**

Your email and calendar entries should now
be available through the native iPad apps.
