

**DO YOU HAVE TYPE 1 DIABETES AND EYE CHANGES  
(RETINOPATHY), AGED 18 YEARS OR MORE?**

If yes, then you may be suitable to take part in

**The FAME 1 Eye Study.**

Diabetes is the most common cause of adult-onset vision loss. This study is investigating the effect of a tablet that has the potential to reduce eye disease progression and other blood vessel complications in adults with type 1 diabetes and some existent eye changes at St Vincent's Hospital Melbourne

*(This study has been approved by The Northern Sydney Local Health District Human Ethics Committee,  
Reference: HREC/14/HAWKE/414)*
