Tips & Activities

Jodie Clarke
The Empowered Educator

Hi Empowered Ed!

I truly hope you find this resource helpful.

A little about me...

Hi, I'm Jodie! I am a Mum in Australia to 3 girls - twins Ruby & Tara and my adult daughter Ashleigh. And I love the possibilities of early learning!

I'm passionate about helping educators **simplify** their documentation and planning and also enjoy more time engaging with the children in their care through **simple** play based activities & environments.

I enjoy creating blog posts, free tools and easy to use resources and training for educators, leaders and coordinators by drawing upon my 30 years experience in this profession.

I know what support educators really need because I have walked in your shoes. This profession is challenging enough so I aim to simplify not overcomplicate! My resources walk through the basics so you can take action.

The Facts.....

- I hold an Associate Diploma in Education (Child care)
- I hold an Advanced Certificate in Child Care
- I hold a Bachelor of Human Services Degree
- I have worked as an Assistant, Room Leader, Director, FDC Coordinator, IHC Coordinator, OSHC Coordinator, Occasional Care Coordinator, Project Manager, Service Manager, Family Day Care Educator, Presenter and Speaker in the Early Childhood and Community and Family Services fields.
- I have been writing and editing my blog now for over 6 years.
- I am the author of many E- Book resources for educators, A Postnatal Depression Workbook (& DVD) and a picture book for children.
- I have developed and presented webinars and online courses to support early childhood educators in their role.

Thanks for placing your trust in me....

Jodie Clarke

Recycling with children - easy ideas to get them involved!

We all know that recycling is important for our community and world as a whole and most adults now contribute in some way to the recycling process but to truly make a difference it is up to us as adults to ensure children understand *why we need to recycle and look after our Earth.*

Regular readers will know I often promote the benefits of play based learning and recycling and sustainable practice is no different. If you want children to participate in their learning you need to find ways to get them actively involved. Support them to be active learners rather than passive bystanders.

But how do we do this? I've got 6 strategies for you to share with your children and the best part is you can easily get them started today!

1. Composting

Give children the role of family compost monitor. If you have a family compost bin in the garden or a worm farm or even some chickens, children can help to collect kitchen scraps in a special bucket or tabletop bin with a lid and carry them out to the garden bin or feed the worms and chickens. Talk about what can go in the compost bin and what shouldn't. They can also collect leaves, weeds and other green material from outside to also put in the compost bin. Give your compost monitor a child sized rake and shovel to help with their important role.

Recycling with children - easy ideas to get them involved!

Why not try this easy compost bottle activity to show children how composting works on a small scale.

- Collect an empty water or soft drink bottle, wash and remove the label.
- Cut the top of the bottle off about 1/4 of the way down as seen in the pic below. Keep the top of the bottle as you will need it later.
- Walk around the garden with the children and help them to add layers of damp soil, green waste and a little shredded paper. Mist with water as you add each layer.
- Now tape the top of the bottle back onto the base (i just used some coloured duct tape)
- Add a little gauze or fly screen to let the air in and then it becomes a living visual display of composting in action. As the green waste and paper breaks down you will be left with a bottle of compost the children can add to the vegetable patch.

2. Share old toys

Encourage and support children to go through their toys and clothes every 6 months and choose some things they no longer use to give to the local op shops. Use this as an opportunity to talk about recycling clothes and toys so that others can reuse and love them too. With older children you can talk about how some children aren't as lucky as them and often need to rely on the support of others to provide essentials they take for granted like warm clothing and toys.

In my family day care service I also have a mini wheelie bin set up for the children to place their clothing and old toys into so that we can then talk about where I will take their donations when the bin fills up. Some times we swap among other families also attending my service.

3. Carry green bags

Most children here in Australia will recognise the green reuseable shopping bags or perhaps have a colourful favourite of their own. Next time you go shopping chat about how clever it is to be able to take the same bag and use it over and over rather than throwing a plastic bag in the bin and adding to our rubbish pile. Help them to feel important by putting them in charge of holding the bags for you until you reach the checkout. You can also encourage older children to keep the bags clean and then fold and store them for next time.

4. Reuse paper and cardboard

This is an easy one but you will be surprised how excited children can get about something simple if they feel they are being useful. Set up a box or bin and provide some craft materials for children to decorate their paper recycling box. Give them the task of collecting newspapers, magazines and junk mail when other family members are finished with them and putting them in the box. When their box is full help them to tip it into the large household recycling wheelie bin for collection or take down to your local recycling centre.

Recycling with children - easy ideas to get them involved!

Children attending a child care service will love to be involved in bringing paper from home to put into the class collection bin. Use the internet to show them photos of how paper is recycled to make new products and discuss how they are helping to save trees and keep our air clean.

5. Recycle materials for craft

This is my personal favourite and my own twins absolutely love this job. Show children the value of collecting unused materials from around the home that they can choose at a later date to express themselves creatively. Talk about the concepts of reusing, upcycling and reclaiming to make something 'new'.

I often just wheel this bin out when it is becoming a little full and just step back and watch as the children pick through and find their favourite pieces to create with. It doesn't matter what the end product looks like, it's all about the process and it offers you many intentional teaching and conversational moments.

Recycling with children - easy ideas to get them involved!

Show them how to make simple resources they can also use in their play like these *paint squirt bottles* and *outdoor musical spool*.

Recycling with children - easy ideas to get them involved!

6. Sort waste into the correct bins

Most councils now have a recycling and waste program in place. Where I live we have a rubbish bin, recycle bin and organics bin. It's important that we put the right waste in the right bin so take a little time to educate yourself about the program that occurs in your local area and then consider taking this concept to a smaller version to include children.

Support children to recognise what the different bins are for and what they can put in each. At meal times I have small bins that I place on the table so that children can actively participate in putting their waste into the right bin. They enjoy the sense of responsibility and they regularly help me to transfer from the small bins to our household bins or we go for a walk to feed the chickens from our scrap bucket.

For younger children be sure to give them visual clues, it's not enough to just write what each bin is for. I have writing on one side of the bin and a picture on the other. Encourage older children to guide the younger children.

When doing crafts with paper I always have the small paper bin close by on the workspace so they can add their scraps straight away.

Recycling with children - easy ideas to get them involved!

There you have it – 6 simple ways to support children to be actively involved and enthusiastic about recycling while they are also learning. If we all take a little time as parents and educators to help children grasp these important basics I think we will leave our precious world and all its resources in very capable hands.

Hi Empowered Ed!

Thanks for downloading!

Please note the following information before using...

I hope you find this resource useful – I love creating resources to support educators in the important work that they do! All downloads are Copyright protected to The EmpoweredEducator2017. Not to be distributed , transferred, or shared in any form.

Personal Use Only: This document is for your own personal use. You agree that you will not copy, reproduce, alter, modify, create derivative works, or publicly display any content from my downloads (except for your own personal, non-commercial use).

No Redistribution: You may not reproduce, repackage, or redistribute the contents of these downloads, in whole or part, for any reason. This included ‘giving’ someone your copy that you are no longer using.

Clipart / Images: All images used in this printable document are my owned by me with the appropriate licences. All images are copyright protected to The Empowered Educator. They cannot be reproduced or used in whole or part, for any reason.

You May Not:

Alter or sell my files. All file are for personal use only. You may not use my items for sale or profit, i.e. print them off, laminate them and sell them to others.

Enjoy your new resource!
