Fantastic Four: First Steps Was A Solid Movie Featuring Marvel's First Family, Which Is  
Exactly What The MCU Needed It To Be (Spoiler-Free Review)

As you can tell in the video above that everyone definitely watched, liked, and  
subscribed to, Robbie and I liked Fantastic Four: First Steps. It wasn't the best MCU  
movie by any means, but it was good and definitely the best Fantastic Four movie,  
which admittedly isn't that hard to clear. But it still did exactly what it had to do, which  
was bring Marvel's first family into its cinematic universe with a good cast of likable  
characters that you want to see more of in the future.

I think there's a case to be made that this could have been a bigger movie if the MCU  
was in better shape with a more wide open timeline. But at some point, Kevin Feige &  
Co. have to get shit together for Avengers: Doomsday after a forgettable phase without  
a handful of their biggest characters. I think that led to this movie simply being a way to  
get The Fantastic 4 on the chessboard, give their background story to the audience, and  
put on a fun 2 hour show while introducing The Silver Surfer as well as Galactus (who  
were both pretty damn cool).
