Hydroslide

Take on the trapdoor slide, the tube slide, and three epic body slides - if you dare!

Trapdoor slide - It's you versus gravity! Step into the launch capsule and wait for the countdown - a trapdoor drops you into a lightning-fast loop for the ultimate thrill.

Tube slide - Hold on tight! This twisting tube slide is packed with thrills through swirling curves and wide-open turns, whether you're riding the tube solo or side-by-side with a friend.

Body slides - Three fully-enclosed slides, three speeds! Warm up, level up or go full throttle straight to the splash zone. Race through drops, curves, and tunnels through total darkness and lighting effects.

Essential information

We want everyone to enjoy the hydroslides and be safe.

- All hydroslides contain flashing lights.
- Sliders must be aged 5 years or older.
- Children aged 5–7 years must be actively supervised by a responsible caregiver aged 16 years or older.
- Swimwear with enclosed zippers, buckles or other metals are not allowed.]
- No stopping in the hydroslides.
- Please exit the splash area as quickly and safely as possible.
- Health authorities warn that it's unsafe to use a hydroslide if you are pregnant, have a back or neck problem, or have a heart condition.
- Management and staff can refuse entry.

Trapdoor slide

- High intensity, sudden sounds, and rapid motion – best for confident riders.
- Sliders must be at least 140cm tall and weigh 35–120kgs. For safety, sliders may be weighed.
- Lean back and slide with your arms crossed on your chest to prevent contact with the tube, and legs crossed at your ankles.
- Please follow staff instructions at all times.
- Sitting up or changing position at any time in the slide is not allowed.

Tube slide

- Lower sensory load – a good option for riders wanting a slightly gentler experience.
- Sliders must be at least 120cm tall.
- Minimum weight for one person is 50kg.
- Maximum weight for one person is 120kg.
- Minimum weight for two people is 90kg.
- Maximum weight for two people is 180kg.
- A tube must be used.
- Only one person on a single tube and maximum of two people on a double tube.
- Only one tube on the slide at a time.

Body slides

- Can be loud and disorienting – great for adrenaline seekers.
- Sliders must be at least 120cm tall and weigh 120kgs or less.
- Only one person on the slide at a time.
