Maximum Possible Combinations	44,814,459,132,166,600,000,000,000,000	7,871,443,624,147,540,000,000,000	??	1,866,866,560

Note: NAB gives those special characters as examples of what can be used, but I'm unable to verify what other ones work and what don't. You may be able to use other special characters, but these are what (should) work. Either way, they're the only bank that I saw who even mention special characters.
