12. **Audio level down**.

CONNECTIONS

MICROSD CARD

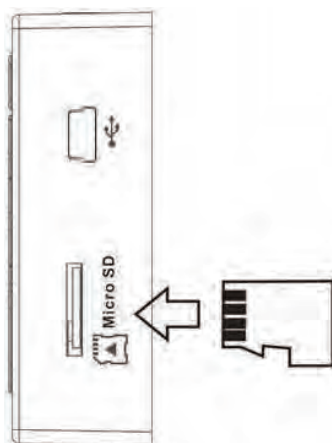

Plug Micro SD card into the slot as shown on image. The screen will show the card is plugged.

For file safety, Micro SD card should be empty and formatted before using, supports FAT32, exFAT (does not support NTFS), MAX 32GB.

When Micro SD is plugged in, the media will automatically be recorded to the card. (not in built in memory)

If want play the media stored on Micro SD, make sure the default path is set to “Card Memory”

To remove Micro SD card, just press it again, let it pop-up.

POWER, CHARGE AND DATA

To charge the battery, use USB cable to connect with 5V DC or PC, charging status will prompt on screen.

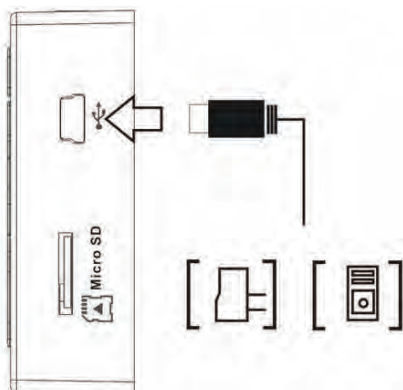

Connect to PC, there's 3 options:

Power & Data

Charge

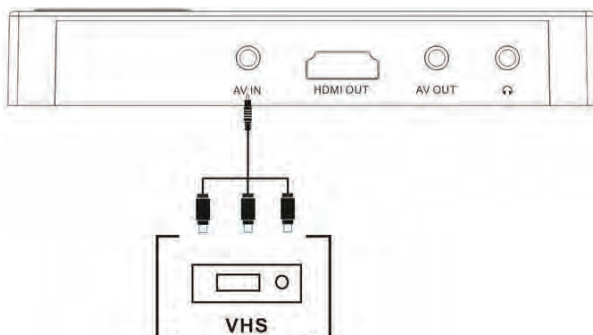

Charge & Play

Choose one and click ok.

When you choose Power & Data, you can copy the file to the memory (both internal memory and card memory), also you can update the firmware of the device.

AV INPUT

Use the 3.5MM to RCA cable (comes with the device in the box) connect to the video source, such as VHS, DV, etc.

The 3.5MM connector plugs to the AV IN of the device.

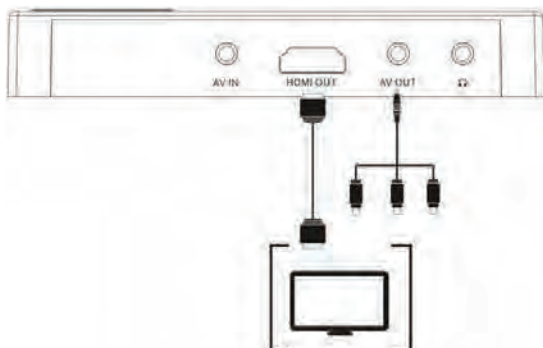

The RCA connectors to VHS, yellow = video, white = audio left channel, red = audio right channel.

Connect "TV IN" to play or record the video.

You can also listen and record the audio from the "Recorder".

Use 3.5MM to 3.5MM audio cable and connect to AV IN of the device, then connect the audio output to your earphones or other audio source. You also can record the audio.

AV OUTPUT

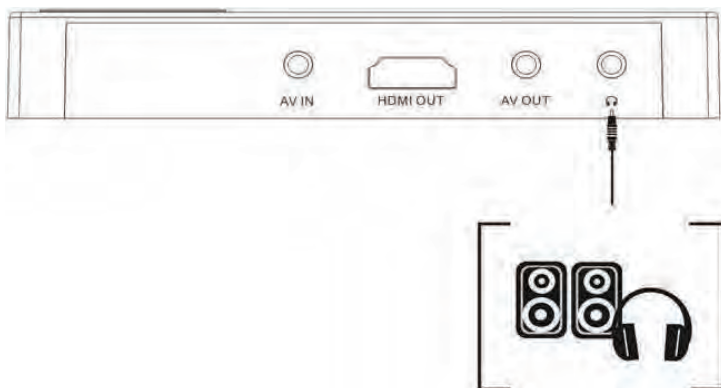

PVRC49 with two video output – HDMI OUT and AV OUT.

Use HDMI cable or 3.5MM to RCA cable (comes with the device in box) to connect with HDMI OUT or AV OUT. Connect to the TV or monitor. When connected (no matter HDMI or AV cable), the screen of PVRC49 will turn off and the video will play on the monitor.

Do not connect HDMI and AV cable at the same time. Only HDMI output will play. Please do not plug or unplug AV (HDMI) cable when playing (playback video or audio, recording video or audio), otherwise it will cause problems --- it will go back to home menu from the playing mode (playback video or audio, recording video or audio).

Note: You can't record music when you connect HDMI cable with device and TV.

EAPHONE OUTPUT

Connect earphone or speaker to earphone port to listen to the sound of PVRC49.

When you playback and plug your earphone, the audio will cut off from speaker of PVRC49 and switch to earphone.

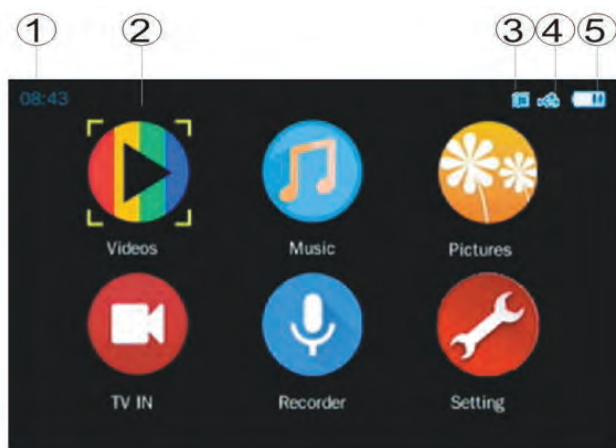

When you playback with AV OUT and plug your earphone, the audio will play at the TV and earphone at same time.

When you playback with HDMI OUT and plug earphone, the audio will keep playing on TV but not on earphone.

OPERATE:

BASIC MENUS ON SCREEN

Long press (2 seconds) to power on PVRC49 (You may need to charge it if the battery is low):

1. **TIME** – Shows current time.

= Repeat once

= Repeat all

PICTURE PLAYBACK

PVRC49 does not capture still image, but you can copy pictures to memory to view photos. Enter pictures—PIC to choose and view.

DELETE FILE

If you want to delete the video, music or picture file, please find the file under Videos, Music or Pictures menu and press OK to play, then long press “audio play mode” button  , – Confirm to Delete – Yes - No, select Yes and press OK to delete the file.

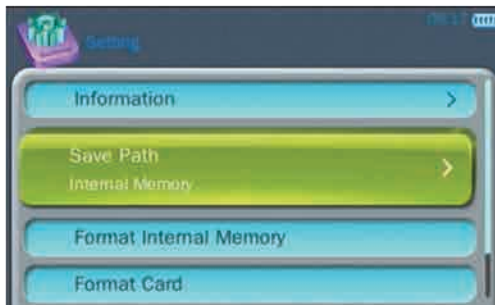

Display - Set Backlight time, for saving energy

Power Saving - Set idle time and sleep time, for saving energy.

Date & Time - Set date and time.

Language - Set language on menu, PVRC49 has 7 languages – English, French, German, Japanese, Spanish, Simplified Chinese and Traditional Chinese.

Enter Advanced:

Information - shows the Firmware Version and Memory space

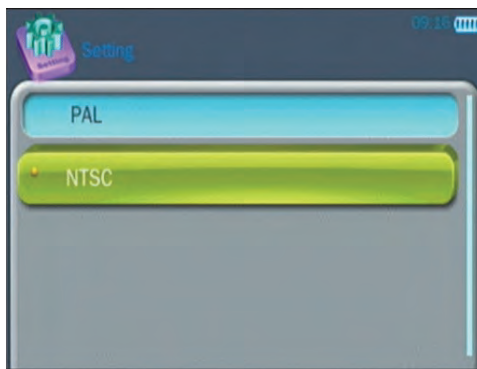

Save Path - set the default path (Internal or card memory)

Note: This setting is only for playback. For recording, it will be recorded to internal memory if there's no card attached. PVRC49 will only save recorded files to the SD card if it's plugged in, if there's no SD card it will be saved to the internal memory. "Format Internal Memory" "Format Card" "Reset Default Settings" will do as it means.

Enter TV:

TV IN - Set the input video system same as with your video source.

TV-OUT - Set the output video system same as with your TV monitor.
