Accountants

Purchase to payment means one system to manage your complete purchasing cycle - from purchase order creation to the automated transfer of approved invoices coded to your chart of accounts into your accounts payable system.

We market our cloud based solutions under a license agreement for a fixed monthly fee. Our license holder demographic is very simple - any business that has suppliers, manages single or multiple related and non-related business entities locally, and or nationally, and are seeking to better manage, control and drive efficiencies in their purchasing and accounts payable processes.

Utilise Buy Link's functionality to better control your purchasing and accounts payable processes.

- > EDI & OCR processing of invoices
- > No more manual entry of invoices
- > Auto COA code allocation to invoices
- > No more invoices in the bottom drawer
- > No lost invoices
- > Eliminate processing errors
- > Reduction in invoice processing time & cost
- > Archive original invoices as a PDF
