

Committed to Food Safety

"The cold room / freezer monitors have saved me thousands of dollars. The cold room has been left ajar on several occasions, ... and the monitors have alerted me as to the issues and I have been able to alleviate loss of stock. ... The EHO loves them. ... My staff do not have to check any cold rooms which saves me approx. \$30 per day in wages. That's \$210 per week. I highly recommend them. "

ABOUT INTELLIGUARD

Intelliguard is a web based, paperless Food Safety System, that is able to deliver total visibility of food safety compliance. The Intelliguard system puts you in control of your food safety by collecting information with digital processes. Having this control in turn drives impressive cost savings and labour efficiencies for you.

HOW IT WORKS

- Automation of the entire food safety program process through HACCP checklists
- Inbuilt Food Safety Audits
- Eliminates manual temperature recording and reporting
- Eliminates record alteration
- Eliminates the risk of stock loss with alerts via email/SMS

*Intelliguard is proudly
Australian Owned &
Designed*
