

Frigbot® is the only 3rd party solution that is connected directly to your refrigeration controller. Simply plug **Frigbot®** into your hotkey port and its a 2 minute setup on your smartphone.

REPORTS

Frigbot® has automated system reports that are emailed directly to you and your customer daily.

ALERTS

Frigbot® will let you know when your equipment has a fault. You can have as many email or SMS contacts as you like.

Yes SMS is included!

CONFIG

Frigbot® is connected directly to your refrigeration controller. You can view or change all controller settings from your smartphone.

It's like you're standing in front of the equipment.

Start
DEFROST
remotely
from your
smartphone

**Only Frigbot®
Does That!**

The facts

- > One **Frigbot®** is required for each electronic controller (no controller networking)
- > **Frigbot®** is powered off the controller so no extra power supply is required (no power required)
- > **Frigbot®** is a cellular device and has an embedded sim card installed (no sim required)
- > There is no **Frigbot®** app - just a web site, we are 100% in the cloud (no app to download)
- > **Frigbot®** works on desktop, tablet and smartphone

NEW Wifi Frigbot now available

It's Time to connect!
