

 **1handPlate[®]**

2020 Australia

The perfect plate for your special event.

Transform an outdoor wedding, birthday, anniversary, barbecue, a business gathering or any other social gatherings into the party of the year with 1handPlate.

The 1handPlate is the original one-handed plate that makes snacking while socializing a breeze. The elegantly curved design makes it easy to handle both glass and food with only one hand.

Simple - Elegant - Functional

This innovative design allows a glass to perfectly balance at the center of the plate thereby freeing up the other hand for social exchanges.

The exclusive **1handPlate** designed for **Champagne** flutes will treat your guests to a celebration they'll remember.

In addition to champagne and wine glasses the plate can also facilitate to hold beer glasses, coffee cups or small bowls for soup or dips.

There is a 1handPlate for every occasion.

The plate comes in multiple variations to meet every event's unique style.

Stackable / Easy To Store

The minimalistic design is easy to stack allowing the plates to be conveniently placed wherever necessary and be a part of any table arrangement.

1handPlate is made of melamine, the highest quality food-safe plastic on the market. It contains no harmful substances and is free of Bisphenol A (BPA) and phthalates.

Even if you've never heard of melamine, you've likely eaten off of a melamine plate because this unique material is lighter and more durable than china. Many eateries turn to melamine to avoid constantly replacing broken dinnerware. Another benefit is that it makes service less strenuous for staff who need to carry large trays loaded with plates of food.

Is Melamine Breakable?

Melamine is extremely difficult to break and it will not shatter if dropped, like typical china or porcelain would, and is overall far more durable than any other traditional dinnerware material. Due to its durable construction, melamine dinnerware has a much lower replacement rate than china, which can save your business a lot of money in the long term. Plus, melamine is relatively resistant to scratch marks from forks, knives, and other utensils.

Is Melamine Dishwasher Safe?

Unlike glazed dishes, melamine tableware is 100% dishwasher safe. In fact, many lines of melamine serving-ware can handle heat that exceeds recommended dishwasher water temperatures. And thanks to melamine's high heat-retaining properties, it dries faster than standard dishware.

Is Melamine Microwave Safe?

As mentioned above, melamine can withstand high temperatures, but it should not be heated while in contact with food. For this reason, 1handPlate use in the microwave is not recommended.

Care

To extend the life of your 1handPlate, try following these simple guidelines:

- If you need to soak your 1handPlates before putting them in the dishwasher, use a high-quality pre-soak dish washing detergent.
- Do not use serrated knives on 1handPlate.
- Do not use 1handplate in a conventional oven.
- Do not use 1handPlate in a microwave.
- Do not use harsh abrasive cleaners, steel wool, or metal scouring pads on 1handPlate. For safe scrubbing, use a light-duty white scrubbing pad.
- Do not use chlorine bleach on 1handPlate.

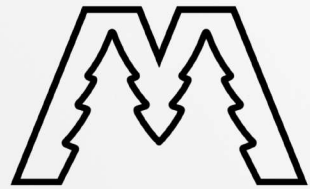

One plate, one story.

Based in Denmark an architect Jóannes Petersen while attending one of the events found himself juggling the two tasks of eating and greeting people. Socializing was a tricky feat while holding both a plate of food and a welcome drink.

His quest was clear: to design a plate that allows for chatting and handing out business cards while at the same time being able to enjoy your food and drink. No dinner plate shall ever limit your social possibilities at an event again! So, the idea was born and inspired by the shape of prawn the architect designed the perfect dish for receptions and gatherings.
