NUTRITICS SOLUTIONS

MENU MANAGEMENT, ORDERING, LABELLING, CARBON FOOTPRINT SCORING

OUR MISSION

To be the world's most trusted food data management software, delivering valuable insights to enable anyone to make better informed food choices.

To continuously innovate to make food information more reliable, more accessible and more valuable.

FEATURES

MENU MANAGEMENT

A unique user experience that allows you to make daily changes and accommodate specials. Automatically provide nutrition and allergen information and adjust prices at the touch of a button.

ORDERING

Display your menu across different devices, on your website or via QR code. Let customers apply dietary requirement filters and place orders for in-house meals, click & collect or delivery.
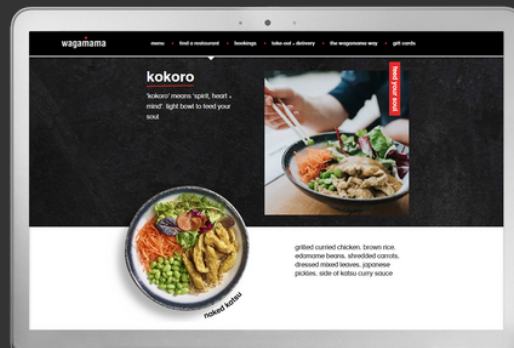

LABELLING

Easily create your product labels in line with food law using Nutritics' end-to-end labelling system. Any changes to nutrition or allergen data are instantly reflected on your labels.

CARBON FOOTPRINT SCORING

A fully automated, easy-to-use carbon footprint scoring, display and Scope 3 reporting system. Add the score to menu items, packaging and promotional materials to build trust in your brand.

SAVE TIME AND MONEY AND PROVIDE CONSUMERS WITH ACCURATE AND ENGAGING BRANDED EXPERIENCES ACROSS ALL DEVICES.

"

TRANSFORM YOUR CUSTOMER EXPERIENCE WITH ONE SEAMLESS, AUTOMATED SOLUTION.
