ONEZO

ONEZO Tea, the world's first on-site handmade boba tea brand, was founded in Taiwan in 2015 and has now entered more than 30 countries around the world. The brand's territory covers Taiwan, Southeast Asia, North America, Europe and other regions. Recently, it has entered new markets such as Africa and India, and continues to promote "high-quality Taiwanese flavor" to the world.

ONEZO adheres to the spirit of pure handmade and preservative-free production, creating pearls with various flavors such as brown sugar, mango, and taro, opening up new possibilities for pearl milk tea. In recent years, it has broken through new boundaries and developed low-calorie high-protein pearls to meet consumers who love health and sports, as well as high-mountain roasted oolong pearls, adding new flavors to customers who love tea.

We carefully select high-altitude tea and use exclusive roasting technology to subdivide various types of Taiwanese oolong teas that have been roasted, so that each cup of drink has a rich and delicate taste. We hope to provide consumers with a refined tea drinking experience. In addition to beverages, we also launch snacks such as egg waffles, red bean cakes, and snowflake ice to enrich the overall tea drinking experience. ONEZO firmly believes that a good cup of tea starts with a carefully handcrafted boba.
