

MSS50116 - Diploma of Sustainable Operations

For full course information please visit:

(Please read the QR Code with the camera from your Mobile Phone)

Envirotech reserves the right to amend the content of the course based on industry needs.

- ✓ How to develop workplace policy for sustainability risk management practices
- ✓ How to develop and improve holistic sustainability practices in the workplace and how to implement the changes
- ✓ How to measure and report the carbon footprint and evaluate the impact of the businesses sustainability processes
- ✓ How to conduct a range of environmental impact audits

"By studying Sustainable Operations, you will be learning how to identify sustainability issues within different business industries. Learn how to tackle these issues by improving the sustainability levels of the business and use it as an asset thus improving the competitive advantage of the business."

*Roberta Beltrao,
Trainer and Assessor*
