STECA STOOL

Known as an outdoor solution to the bentwood, the Stecca Stool combines classic seating design with modern construction. Due to its light, curved shape, this stool can bring hard-to-find elegance and class to your outdoor area.

Classy European to its core, the Stecca Stool was designed by Frenchman Alban le Henry and is produced in Italy. Made from robust aluminium, this design is light, portable and can also stand up to harsh outdoor environments. As well as being stackable, the Stecca Stool also comes in a range of on-trend colours.
