FOLD BENCH SEAT

The Fold Bench Seat is designed to be installed alongside the Fold Table. The folded steel plate ends create playful shapes that draw the eye and the diner, creating shadows and planes that almost appear as an optical illusion. The slatted timber seats are mounted to the steel frame and end plates, which are in turn bolted down. This setting is tough and uses robust materials such as galvanised steel and Iroko hardwood to ensure it withstands day and night.

The bench seats are available in set lengths to fit nicely inside of the table footprint and still allow access in and out at the ends. Make a real statement with this design, either in raw galvanised steel or powder coated in a colour of your choice.

CUSTOMISABLE ELEMENTS

Size, Finish
