C1 CHAIR SLATTED

Like its name, the design of the C1 is reduced to the minimum. With contours reflecting basic practicality, this outdoor chair is made from a delicate tubular steel frame with a simple seat and slatted backrest.

Classy European to its core, the C1 Slatted was conceived by Swiss designer Fabian Schwaerzler and is manufactured in Italy. Made from robust steel, this design is light, portable and can be stacked up to 16 units, making it a perfect candidate to quickly deploy in your outdoor dining or alfresco terrace. It is also able to be powder coated in any colour of your choice, making it easy to suit the C1 Slatted to the look of your dining or social area.
