Dulux PG288 Industrial Powder Coat range.

Dulux Protecture™ - textured range.

Finish your space beautifully.

Ikon is 100% NZ-made, designed and crafted in our own manufacturing facility in South Canterbury. Our in-house manufacturing gives you as the designer an exceptional degree of creative control.

Raw timber is transformed and finished by our in-house team of craftspeople to your specification, making it easy for you to be unique and fulfill your project brief.

Made for life.

At Harrows we believe in sustainability and responsible manufacturing.

Latest technology and time-honoured craft go hand in hand to create products that bring people together and are designed with longevity in mind, extending the useful life and in turn reducing waste.

Ikon + Sustainability.

We see sustainability as an ever-evolving challenge. We are constantly innovating to reduce waste and minimize our impact on the world around us.

Sustainable Design.

Ikon is a collection with social relevance and timeless design principals, made from quality materials and built to last. When the objects around us are inclined to lose value, Harrows have set out to create beautiful and sustainable products that add value to their environment for years to come.

Bio-based Focus.

Ikon is constructed entirely from solid American Ash sourced from certified responsibly managed forests.

New Zealand Made.

Being 100% NZ-made means choosing Ikon minimises international freight volumes and supports local all while giving you full control and transparency over the quality and origin of all materials.

Circularity.

We believe in circularity. Alongside our passion for making beautiful products designed to last, we acknowledge that requirements for interior spaces will change and evolve over time, as will their furniture needs. Ikon can be refurbished, initiating a fresh lifecycle for the product with minimal waste.

Reducing Consumption and Waste.

Ikon is blanket wrapped and freighted in kitset where possible to reduce freight miles and packaging. Timber offcuts are able to be efficiently repurposed or recycled in alignment with our consumption and waste reduction initiatives.
