

The Reference in Portable Metrology-grade 3D Scanners

HandySCAN 3D

BLACK Series

The HandySCAN 3D™ lineup is the industry standard in portable metrology-grade 3D scanners, and a proven and trusted patented technology. Optimized to meet the needs of design, manufacturing and metrology professionals, the BLACK Series provides the most effective and reliable way to acquire accurate 3D measurements of physical objects anywhere.

Portable, accurate and simple to use, the HandySCAN 3D | BLACK Series features unmatched speed that captures high-quality measurements. Since it performs regardless of environment changes or part movement, it represents the ideal tool for quality assurance and product development applications.

Powerful, Intuitive Software for Optimal User Experience

Creaform.OS™ is a powerful, integrated operating software that provides the best 3D measurement experience across all Creaform systems.

Featuring an intuitive interface, user-friendly tools, embedded content, and learning tutorials, the platform is designed to streamline onboarding for new users and overcome a lack of experience, ensuring they can fully leverage the capabilities of their 3D scanners and optical CMMs.

Creaform Metrology Suite™ provides a comprehensive portfolio of application software modules designed for any metrology task.

- Scan-to-CAD**
The most intuitive reverse engineering toolkit for transferring data extracted from 3D scans to any CAD platform.
- Inspection**
Comprehensive and powerful software designed for efficient and accurate dimensional inspections.
- Automation**
The most user-friendly and integrated programming platform for deploying automated quality control solutions.
- Dynamic Tracking**
Enables simultaneous position and orientation of multiple objects in space and time.
