KINGQUAD 500AXI 4X4 POWER STEERING

For MY19 the best 500cc Farm ATV just got better. The new generation KingQuad has been developed utilising feedback from Australian & New Zealand farmers to produce the toughest, best performing and most reliable workhorse on the market.

The new edgy and dynamic bodywork surrounds an impressive list of updates to the New King. The updated stronger frame with 25% thicker tubing, helps this ATV tackle just about any riding terrain. Towing capacity has been boosted to 600kg and now features a receiver type trailer hitch as standard. Steering has never been easier with a new, higher output Electronic Power Steering system and recalibrated front end geometry. The fully-independent suspension is fitted with new, gas-charged shock absorbers that feature 5-way pre-load adjustment to match the spring rate to the cargo load. The rear brake features a sealed oil-bathed multi-disc system which delivers strong and consistent stopping performance and is virtually maintenance free. A gate-styler lever makes it easy to select between L-H-N-R, simplified servicing and over 10 litres of storage make the new KingQuad 500AXi Power Steering the benchmark ATV for Australian Farms.

\$13,540 RIDE AWAY*

At Suzuki, we believe that it's important riders understand safe riding practices. This is why we support the motorcycle industry's All Terrain Vehicle safety video/DVD "You and Your ATV". This is supplied free by your Suzuki dealer at time of purchase.

KEY FEATURES

All new bodywork and styling featuring sharper lines with well-defined angles. The high-clearance fenders offer great protection for the rider from flying debris. Australian-spec KingQuad ATVs also come standard with overfenders for extra protection. The refined panels simplify maintenance needs, such as checking oil level, fuel filter and air filter servicing.

Suzuki's class-leading Quadmatic™ CVT-type automatic transmission provides versatility and convenience with a fender-mounted gate-type shifter for L-H-N-R selection. The advanced engine-braking system minimises free-wheeling with the throttle off and helps control the vehicle during steep descents.

A handlebar-mounted push-button allows easy selection between 2WD, 4WD and differential-lock 4WD. An override button on the left handlebar can be used to override the normal speed limiter when stuck in the mud.

Gate-style drive mode selector lever lets the rider easily and securely select between Low, High, Neutral or Reverse setting. Unlike some of its competitors the KingQuad features In-gear starting ability for user convenience.

KEY FEATURES

- The powerful 493cc, SOHC, single-cylinder, liquid-cooled, 4-stroke engine produces 28.50kW @ 6,500rpm with 46.0Nm of torque @ 5,500rpm and has delivers exceptional low-to-mid range torque.
- The cylinder and head are canted forward for a low centre of gravity, resulting in reduced engine height and lower seat height. High-mount air intake avoids water and debris.
- A lightweight aluminium cylinder uses SCEM (Suzuki Composite Electrochemical Material) coating for excellent heat transfer and ring sealing, resulting in superb combustion chamber efficiency.
- Suzuki's Advanced Fuel Injection improves throttle response and fuel efficiency while delivering power consistently across the full rev-range, and improves engine starting in all conditions.
- High-capacity aluminium radiator with large diameter, thermostatically controlled cooling fan provides stable engine operating temperature.
- Engine braking function has also been improved to boost rider's confidence and comfort during downhill descents.
- A compact torque-sensing limited-slip front differential offers potent traction plus light steering. A differential-lock system provides serious 4WD traction.
- High traction 25-inch CARLISLE tyres are mounted on strong steel wheels with a durable, powder-coated matte-black finish.
- Polyethylene skid plates provide protection with minimal resistance over rocks and rough terrain. Durable plastic guards protect the front and rear half shafts.
- High-output, 3-phase charging system feeds an 18-amp maintenance-free battery for abundant power for easy starting and accessory use. A sealed 12V accessory outlet is standard.
- The large 17.5L fuel tank is positioned for a low centre of gravity. It includes a vacuum-operated petcock and a ratchet-style filler cap, which prevents overtightening so it can be easily unscrewed for refilling.
- The rugged steel-tube cargo racks have wrinkle paint finish for durability and scratch resistance.

SPECIFICATIONS

ENGINE	SINGLE CYLINDER, 4-STROKE, DOHC, LIQUID-COOLED
STARTER	ELECTRIC
TRANSMISSION	V-BELT, CVT AUTOMATIC, HI/LO RATIO, 2WD-4WD, FRONT DIFF LOCK
FRONT SUSPENSION	INDEPENDENT, DOUBLE WISHBONE, GAS CHARGED ADJUSTABLE SHOCKS
REAR SUSPENSION	INDEPENDENT, DOUBLE WISHBONE, GAS CHARGED ADJUSTABLE SHOCKS
FRONT BRAKES	TWIN 200MM DISCS WITH LIGHTWEIGHT CALIPERS
REAR BRAKES	SEALED OIL-BATHED, MULTI-DISC
FUEL CAPACITY	17.5 LITRES
COLOURS	FLAME RED
WARRANTY	3 YEARS UNLIMITED KM
SEAT HEIGHT	920 MM
LENGTH	2150 MM
WIDTH	1215 MM
HEIGHT	1285 MM
WET WEIGHT	324 KG
WHEELBASE	1285 MM
FRONT RACK LOAD CARRYING CAPACITY	30 KG
REAR RACK LOAD CARRYING CAPACITY	60 KG
MAXIMUM TOWING CAPACITY ON UNEVEN GROUND	180 KG
MAXIMUM TOWING CAPACITY ON LEVEL GROUND	600 KG
MAXIMUM VEHICLE LOADING	197 KG
