ISUZU
RELIABILITY IS EVERYTHING

1 EXTRA

STEER AXLE

THE LEGEND CONTINUES

For almost a quarter of a century Isuzu has held the title of Australia's No. 1 truck in the light to medium range. A feat achieved through an unrivalled reputation for truck reliability and performance. The new twin steer FY Series will

continue this reputation. Its extensive model range ensures industries of all sizes can benefit from Isuzu's multi-application engineering decisions. And whilst there are others that have come before us, we believe it's our respect for the diverse needs of each

industry that will make the FY Series not only your favourite twin steer truck range, but in time, Australia's as well.

Tilt Tray

Garbage Front Loader

Unique twin steer axle.

The load sharing twin-steer axle opens up numerous heavy-duty applications by increasing your total gross mass by a tonne and spreading the entire weight evenly across your wheelbase. The twin steer axle also has a unique dampener system that gives you a better ride while taking the strain off your chassis.

Isuzu's 9.8 litre engine.

To leave plenty in reserve for the tough jobs, all models come fitted with Isuzu SITEC III 350 9.8 litre engines that produce 257kW at 2000rpm and a very respectable 1,422Nm torque at a low 1450 rpm.

Three North American transmissions.

From the Allison HD 4430, the construction industries' transmission of choice, through to the rugged Eaton 10 and reliable ZF-9 speed, the FY Series gives you a choice of three tried and tested transmissions for each model.

MADE FOR YOU

The massive application potential of the FY Series is no accident. It came from several years of methodical research and planning to create a diverse range of models that could cater to the milk industry as well as it does the

concrete. The result is a range of trucks with two choices of wheel configuration – 8x4 and 10x4, three unique models and an impressive nine factory built variations. There's also a choice of three North American transmissions and two suspension options to

cater for a variety of applications. These specifications make the FY Series one of the most comprehensive on the market, and ensure its heavy-duty trucks can handle whatever your industry throws at them.

PERFORMANCE PLUS

With a range of applications this diverse, 'under-specing' was not an option. The result? Isuzu 9.8 litre SiTEC III 350 engines installed across the entire range, Allison HD 4430s in our automatic trucks (when 3200s are the

standard in many 8x4's) and wheelbases that match a wide range of applications. Our pursuit for performance extended to Isuzu designed load sharing front suspension with damped equalisers for a smoother ride, plus, diff locks and cross locks to keep your truck

from getting 'hung up' on uneven terrain. The outcome is a truck that you can drive confidently into any situation and will stand the test of time getting out of them.

100'S OF EXTRA APPLICATIONS

Concrete Pumper

Tipper

Cross locks and diff locks.

With factory fitted cross locks and diff locks your truck will never get hung up on uneven terrain again. Simply flick a switch to engage all of your driving wheels to get power reliably to the ground.

Euro V Compatible.

To meet tough Euro V environmental standards we have fitted a Diesel Oxidation Catalyst (DOC) and an Exhaust Gas Recirculation system (EGR). The DOC offers greater simplicity for body builders and operators, while the EGR not only reduces harmful emissions, but also delivers improved driveability and enhanced engine braking.

Two suspension options.

Depending on your application's demands, you can select either the reputable North American Hendrickson HAS 461 suspension or the ever-reliable Isuzu 6-Rod.

FUPS.

To be compliant with new safety standards, the FY Series comes pre-fitted with the Front Under-run Protection System (FUPS).

Entertainment/GPS System.

Cabin entertainment is at your fingertips. Simply reach out and navigate through the simple menu to play your favourite songs, or for even greater convenience, use voice commands. Hands free calling is standard via Bluetooth connectivity, plus, with the purchase of optional accessories, GPS satellite navigation and four multi-view safety cameras can also be installed.

Visibility.

Despite the heavy-duty engineering packed under it, the dashboard sits surprisingly low, which when paired with a high ceiling, provides excellent field of vision.

YOUR HOME AWAY FROM HOME

The trend for going above and beyond industry standards continues inside the cab. The ISRI 6860 seat, widely accepted as the industry's best, has been enhanced with

top-rake seat adjustment for superior upper back comfort. Seat safety has also been improved with seat belt pretension that works seamlessly if the airbags are deployed. These thoughtful comfort measures allow you to better focus on the road, which can now be seen in

its entirety through your huge windscreen and massive mirrors. And as expected with every Isuzu Truck, space and generous storage within arms reach is abundant.

Agitator

Refrigerator Van

Storage and space.

There's nothing quite like an Isuzu cabin. The big, roomy cab with ample storage and generous legroom provides a quiet oasis detached from the outside world.

Entry.

With non-slip two-step entry and big doors that have a 90° opening range, getting in and out of your truck has never been easier.

Care.

An Isuzu doesn't just come with a key and an owner's manual, it comes with a company. This means you have access to ISIS, the revolutionary chassis/body selection programme, three years of complimentary roadside assist (Freecall 1800 947 898), plus, access to our helpful Customer Care Centre (Freecall 1800 035 640).
