A: Our industry is becoming more non-traditional in the way women are now truck drivers, interpreters, mechanics and managers. We are slowly seeing a shift within the industry to be more gender equal.

## A MOMENT WITH...

**Noelle Parlier**  
Chief Engineer  
PACCAR Australia

**Q: What does the 2019 International Women's Day theme mean to you?**

A: The theme for this year's International Women's Day is a great challenge to everyone - regardless of gender - to always strive for improvement. Never accept the status quo - just because it is, doesn't mean it is how it should be.

**Q: What advice would you give to women looking to work in the industry?**

A: We need and want you! The transportation industry is the lifeblood of our country. Everything moves by trucks - yet our industry is overwhelmingly under represented by women. Don't be afraid to enter an industry where you will be unique - it's when you are unique that you can shine your brightest and make the biggest impact.
