ROYAL ENFIELD HIMALAYAN

Decades of expeditions. Thousands of kilometers of traversing the most challenging terrain. Years of living and evolving with a machine that responds to the mountains. That's how we made the Himalayan, our first dual-purpose motorcycle. Here is how it was built to be tough, versatile, and adaptable to all kind of terrain.

**BUILT FOR ALL ROADS
BUILT FOR NO ROADS.**

LONG STROKE EFFICIENCY

The engine has been designed keeping in mind real world riding. A healthy spread of torque across the RPM range will ensure the rider is not left hunting for drive—good low end and midrange torque to clear obstacles; and sufficient top end power for all-day highway cruising. True to Royal Enfield's engine DNA, the longstroke LS410 delivers the key low-end torque, giving you usable power at lower RPMs for in-city conditions and all the pulling power required when you go off-road.

SWITCHABLE ABS

Dual channel ABS as standard with the option of switching it off at the rear wheel for an engaging ride and for more control while riding on off-road surfaces.

TYRES

Hefty 17" and 21" wheels with dual purpose, tread-pattern tyres for a steady grip on all roads and no roads.

ADVENTURE READY HANDLING

The half-duplex, split-cradle frame and long travel suspension keep you grounded, in control and in harmony with roads, rocks and everything in between.

SUSPENSION

The Himalayan has monoshock suspension at the rear. The long travel suspension keeps the tyres of the Himalayan in contact with the road at all times and delivers a smooth ride regardless of terrain. 220mm of ground clearance means crossing deeper rivers, going over bigger rocks, traversing further and finding that special place off the map.

ERGONOMICS

Its 800 mm seat height, perfectly-positioned foot pegs and handlebars reduce faatigue and give you a comfortable, upright riding position whether you sit or stand.

TOUR MINDED DESIGN

The new improved seat lets you cover longer distances with even more comfort. Designed for Panniers at the back, Jerry cans in the front. The Himalayan's mounting points let you strap on and set off anytime. The LCD dashboard lets you track everything from miles to maintenance.

OFFROAD

A high-placed angular up-swept exhaust mean unprecedented water wading capacity and ability to take on deeper river crossings

T ROYAL ENFIELD TRIPPER

Perfectly in sync for modern-day riding, the Himalayan features an analogue-style speedometer along with a digital LCD screen that tells you everything you need to know and is now fully compatible with the Royal Enfield Tripper Navigation System*.

*The Tripper Navigation System is available to be purchased as an optional extra.

TECHNICAL SPECIFICATIONS

ENGINE

Type	Single Cylinder, 4 stroke, Air cooled, SOHC, Fuel Injection*
Displacement	411cc
Bore x Stroke	78 mm x 86 mm
Compression Ratio	9.5:1
Maximum Power	24.3 bhp @ 6500 rpm
Maximum Torque	32 Nm @ 4250 rpm
Ignition system	Digital electronic ignition
Clutch	Wet, multi-plate
Gearbox	5 Speed Constant Mesh
Lubrication	Wet sump
Fuel supply	Electronic fuel injection
Engine start	Electric

CHASSIS & SUSPENSION

Type	Half-duplex split cradle frame
Front suspension	Telescopic, 41 mm forks, 200 mm travel
Rear suspension	Monoshock with linkage, 180 mm wheel travel

DIMENSIONS

Wheelbase	1465 mm
Ground Clearance	220 mm
Length	2190 mm
Width	840 mm
Height	1370 mm (Fly Screen Top)
Seat Height	800 mm
Weight in running order	199 kg
Fuel Capacity	15+/- 0.5 lts

BRAKES & TYRES

Front tyre	90/90 - 21"
Rear tyre	120/90 - 17"
Front brakes	300 mm disc, 2-piston floating caliper
Rear brakes	240 mm disc, single piston floating caliper
ABS	Dual Channel ABS (Switchable to Single Channel ABS - Rear Wheel ABS Control Deactivation)

EQUIPMENT

"Tripper" Navigation	LCD Cluster with Compass
Centre & side stand	Side stand switch
Emergency stop switch	Burst switch
Engine Guard	Luggage Rack
Tool Kit
