## Could Trade & Investment be part of the answer?

5

- **Trade.** MENA could produce more if it were to export more. Excluding oil exports, the MENA region of over 400 million people exports roughly the same amount as Switzerland
- **FDI.** Excluding oil and real estate investment, FDI in manufacturing—the type of investment rich in employment—has remained marginal, accounting for just a fifth of all FDI inflows in the region

## Report on Trade and FDI

Deauville Partnership Finance Ministers tasked the Center for Mediterranean Integration (CMI), drawing on the expertise of the World Bank and in partnership with the Islamic Development Bank, to coordinate an analytical report “to provide an appropriate framework to enhance trade and FDI”

# Outline of the report

16

- Section 1: ***The new global Trade & FDI landscape***—dealing with the fragmentation of production (i.e., global value chains)
- Section 2: ***Market access and rules***—creating opportunities to trade and invest across borders cheaply, securely and predictably
- Section 3: ***Competitiveness and diversification***—implementing complementary domestic reforms of the business climate
- Section 4: ***Trade facilitation and trade finance***—oiling the Trade & FDI engine especially for SMEs
- Section 5: ***Inclusiveness, equity and sustainability***—making economic integration a sustainable and inclusive long term political economy proposition

# Trade facilitation: Key selected recommendations

17

- *Short-term:*
  - **Pursue the modernization of customs, including through computerization and by training staff in techniques for efficiently controlling violations.**
  - Upgrade the quality of logistics service providers in air and maritime transport and freight forwarding, including by rationalizing and simplifying regulations and increasing competition in a range of service providers (e.g., truckers, brokers, agents).
- *Medium-term:*
  - Automate the operations of all other border agencies through single windows to better coordinate and accelerate communication among agencies.
  - Improve sub-regional trade corridors and regional trade facilitation frameworks, including agreement on transit regimes to facilitate movements from origin to destination along several borders (building on the International Road Transport convention), and coordinate policies and regulatory changes as well as transport and border crossing infrastructure in key transport corridors.

# The New Transition Fund

18

- The details of how the Fund will operate are being worked out and the Fund is expected to be launched at the IMF/World Bank Annual Meetings in Tokyo.
- The Fund is expected to be around US\$250 million, and each program financed by the Fund could be multi-year and multi-million
- Early requests will be extremely welcome to get the Fund moving this year.
- The Fund is expected to be managed by the World Bank, with countries accessing it in collaboration with an international financial institution (i.e. the IFI helps prepare the request for funding and also supervises its implementation as it would for a project, but the country implements - that is it defines the tasks, writes ToRs, chooses consultants etc.).
- For countries who will be negotiating and implementing DCFTAs, the Fund could be a great opportunity to provide support during at least the first years of the process.
- It is expected that the call for proposals would be formally launched around the time of the IMF/WB Annual Meetings, but could start informally now.

# Merci
