

**Roseanne Perez**  
Head of Products

If Roseanne left the room – what would someone say about her?

“

As a knowledgeable, innovative, and personable leader, if there's something Rosey doesn't know about products, it isn't worth knowing.

”

With a vast background in the legal industry spanning over the course of 19 years, Rosey joined InfoTrack in 2015 as a highly-experienced product manager with a significant background in product development and the creation of software to automate manual processes and streamline workflows. As Head of Products and responsible for InfoTrack's overall product strategy and long term development, Rosey has her finger on the pulse and ear to the ground when it comes to safe guarding our library of offerings.

Involved in every stage of the product development process, Rosey plays a vital role progressing InfoTrack's products - from inception to implementation and right through to enhancement, no stone is left unturned to ensure that what goes out to market is first class. Responsible for everything from market research initiatives and determining customer needs, to reviewing product specifications and requirements, and bringing new products to market – Rosey's days are as varied as they are exciting.

Rosey also works closely with InfoTrack's development team to ensure each and every product provides value to our clients. She keeps up a constant line of communication with our ever-growing client base in order to understand their pain-points, so as to deliver innovative solutions in line with customer needs - and she's always on the lookout for new ways to improve our clients' day-to-day workflows.

As an active mother of two, when Rosey's not busy working up a storm in the office, she enjoys spending time with her family, and on weekends can often be found supporting her children from the sidelines of their various sports teams, or taking them to dance classes.
